I believe I can fully and conscientiourly indorse each qualification claimed for the Florence Machine. I have thoroughly tested it on work of all grades, and each trial has been eminently satisfactory. It takes held of a delicate fabric delicately, and of a strong one with strength. To me it seems more than a machine—an almost intelligent, willing belper. Its use is easily learned and its construction is certainly simple. I know something of the other first class Machines, learned to operate several. This is the only Sewing Machine I have found RELIABLE. MRS PERRY G TEFFT
San Andreas, Calaverus county, Cal.

I have used the Wheeler & Wilson about two years, the Taggart & Farr six months, the Siont Eliptic about the same length of time, the Williams & Orvis nearly two years, and have dealt in several of the sonall Machines, until thoroughly disgusted with every Machine that sews with only one thread. The Florence is the only Machine that has come under my notice that gives perfect and entire satisfaction on all kinds of work.

No one can estimate it would be supported to the contract of the con Kinds of work.

No one can estimate its value until they have used and tested it, as I have done. Indeed, for thin work it is invaluable.

GEORGE GILLI'S,
Carson City, N. T.

I have used a Florence Sewing Machine for two years; I brought it across the Plans; It has never yet been out of order, and I can truly say it excels all other Machines that I have used. I ran a Ladd & Webster six months; a Wheeler & Wilsen eight months; and used a Grover & Baker, alternately with Shat's for two years.

mouths, and used a trover & baser, mornaged Stout's, for two years.

I am familiar with the Howe, and several of the small Machines, but I never used one that would do all kinds of work to equal the Florence. I do not think it can be too highly recommended.

MIS ISAAC ELLIS, Maryaville.

After having a Florence Machine in use nearly a year. I feel that I can truly recommend it as being all that is claimed for it. I have used Singer's. Grover & Boker's, and the Wheeler & Wilson Machine, and
