THEY WON'T TROUBLE YOU LONG. Children grow up—nothing on earth grows so fast as children. It was but yesterday, and that boy was playing with tops, a baoyant boy. He is a man, and gove now! There is no more children to the boy the base of the base of the boy the base of the base claimed him. When a beginning is made, it is like raveling a stocking; stitch by stitch it gives way till all are gone. The house has not a child in it. There is no more noise in the hall—hoys rushing pell-mell; it is very prederly now. There are no more skates or leds, buts, balls or strings, left scattered orderly now. about. Things are neat enough now.

There is no delay of breakfast for sleepy

folks. There is no longer any task before you of looking for anybody and tucking up the bedclothes. There are no disputes to settle, nobody to get off to school, no complaints, no importanties for impossible things, no rips to mend, no fagers to the up, no faces to be washed, or collars to be arranged. There never was peace in the house! It would sound like music to have some feet clatter down the stairs!

Oh, for some children's noise!

What used to ail us that we were hushing their lead leach speaking their noisy frolic.

What used to ail us that we were mushing their load langh, checking their noisy frolic, and reproving their slamming and banging the doors? We wish our neighbors would lend us an urchin or two to make a little noise in these premises. A home without children! It is like a lautern and no candles; a garden and no flowers; a vine and no grapes; a brook and no mowater gorgling and rushing in its channels. We want to be tried, to be vexed, to be run over, to hear child life at work with all its va-

During the secular days this is enough mar-During the secular days this is enough mar-ked. But it is Sunday that puts our home to the proof. That is the Christian family day. The intervals of public worship are long spa-ces of peace. The family seems made up on that day. The children are at home. You can lay your hands on their heads. They seem to recognize the greater and lesser love— to God and to friends. The house is peace-ful but not still. There is a low and melodi-ous trill of children in it. But Sunday comes as still now. There is a silence that aches in so still now. There is a silence that aches in the ear. There is too much room at the table, too much at the hearth. The bedrooms are a world too orderly. There is too much leisure and to little care.

Alas! what mean these things? Is some-

body growing old? Are these signs and to-kens? Is life wearing?.—Henry Ward Beecher.

OIL A REMEDY AGAINST INSECTS - Many years ago experiments were made by some medical students on the destruction of insect life by oil. The slightest drop of sweet oil, put on the back of a hornet, beetle, bee, or similar thing, caused its instant destruction.— The breathing pores were closed by the oil, and life was literally smothered out. A scientific writer says greasy water has always been a favorite method of his for destroying

insects, and says : We are astonished to find how little the hint has been acted on Almost every day we meet p aple who ask how to destroy the insect or that, and our drawer is filled with similar enquiries; and to all, the idea of grease or oil enquiries; and to all, he idea of grease of of seems as a new one as if we had kept the matter a most profound secret. Of the mill-ions of people in the United States, how few are there who would not "give anything" as they say, to know how to keep the cabbage fly away from their seed beds, yet about a table sponful of coal oil put in a common garden water pot of water, and sprinkled over the seed bed when the hittle jamping beetle is noticed as having appeared, will instantly destroy the whole broad. A correspondent of this journal recently gave us an article on the virtues of coal oil in killing scale insects. We have repeated the experiment on some daph-nes with entire success. In short, we have no doubt that coal oil, well diluted with water, is death to all kinds of insects, and there is no reason why it should not be in as general use as tobacco is for destroying aphides—more valusble, in fact, because it can be applied in so many cases where smoke cannot. One great point in favor of coal oil is, that it acts as a nure to vegetables while dealing out death insects. We have seen cabbage beds nearby destroyed with the cabbage fly, have the whole crop of beetles destroyed almost instantaneously,—while in a few weeks afterwards the plants, as if by magic, would cover the hed with luxuriant leaves. We do not believe that the undiluted oil would prove injurious to the leaves, but such extravagence is unneces sary, as the small quantity we have given is effectual. No doubt the egg-plant fly, and all insects that can be reached by the oil, can be insects that can be reached by the oil, can be destroyed. There is scarcely one of our readers to whom we are sure this hint alone will not be worth many annual subscriptions. We may add that any oil is as good as coal,—but that being likely to be more easily obtained when wanted, is recommended; also care must be used to keep the water in the pot stirred when used, so that a portion of the oil gets out as the water rous,—otherwise the oil donting on the tan of the water will stay there till all the water goes out and only the oil will be left for the last. For this reason, a syringe, in many cases, will be preferable to the water pot, as the oil and water will have a better chance of getting out together.

Sometimes it turned to the first out in the various ways for years, Sometimes it turned invertioned distressed one at the stomach. Two years ago it brisks out on my hands and arms, sometimes it turned invertoned distressed one at the stomach. Two years ago it brisks out on my head and covered my scalp and care with one acre, which was paintal and louthoune beyond exception. I tried many medicines and several physicians, but without much relief from anything. In fact, the disorder grew worse. At length I was reploced to read in the topic June of the first point of the copel Messenger that you had prepared an alterative (Samparilla), for I know from your reputation that anything you made must be good. I sent to Cheimanti and get It, and used it till terred me. I took it, as you advice, in small doses of a tempounful over a month, and used around the bodies. in mail does of a tenspoonful over a month, and used aimout three bottles. New and healthy skin soon began to form under the seab, which after a white fell off. Myskin is now clear, and I know by toy feetings that the discuss has gone from my system. You can well believe that I seed what I am saying when I tell you, that I hold you to be one of the aposthes of the age, and remain ever gratefully.

Da. J. C. Averax Str. I cheerfully comply with the request of your again, and report to you some of the effects I have realized with your Sursaparilla.

I have called with your Sursaparilla.

I have called with your Sursaparilla the complaints for which it is recommended, and have found its effects truly wonderful in the circumstance of the complaints for which it is recommended, and therefore truly wonderful in the circumstance of the complaints for which it is committed by secondary or my life throat. One of my patients had Syphilite alone is life throat. Another was attached by secondary or my limit in his mose, and the theory is the throat which were constituted by secondary or my doministration of your Sarsaparilla; the alone head, and lee is well again, not of course without some diagraration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bouse. They find become as senaitive to the weather that on a damp day she suffered exernicating pain in her joints and bosons. She too, was cared entirely by your sarsaparilla in a few weeks. I know from its formula, which your againt gave me, that this Preparation from your houses and bosons ory made a great remedy; consequently, these truly remarkable readits with it have not surprised me Fraierandly yours, G. THIS CELEBRATED INSTITUTE has enjoyed on this coast an uninterrupted success of Fourteen years, and has become one of the renowned Respitals of the use. What the celebrated Lock Hospitals is to London, and the no less renowned establishment of Ricord to Paris, this Institute has become to the Pacilic Coast. The thousands annually received and cured, place it in point of number of patients among the very first of the world, and the success of its treatment ranks it second to none.

PRIVATE DISEASES IN MALES and IRREGULARITIES IN FEMALES are the great destroyers of health. They insiduously attack the system and gradually undermine and destroy it; they drive the bloom from the cheek, the lustre from the cye, the strength and vigor from the frame; they give to the world puny and diseased offspring, and poison, through successive, generations the race of man. The marks can be seen in Scrofula, Consumption, Cripples, the Idiotic, the Paralytic, the Insane, etc.

There is no more terrible scourge to the human race than those diseases arrising from the contamination of Veneral Poison. The mildest forms, by retreating to the blood, hold ever over the one afflicted, the avord of destruction that is liable at any moment to fall and blight—to afferly destroy—all earthly kopes.

Important to Females.

When a female is in trouble ora fflicted with disease, and requires usidical or surgictl assistance, the enquiry should be. Where is there a physician who is fully competent to administer relief, and whose respectable standing in society recommends him to the confidence of the community? The Duetor, understanding how imperatively necessary these requirements are, feels called upon to interpose, and by calling the attention of the afflicted to the fact that he hat been a PRO-PESSOR OF ORSTETRICS and FEMALE DISEASES for twenty years, and is fully qualified to administer in all cases, both medicully and surgically, not in a superfical manner, but in as thorough a manner as years of study and practice—both in hospitals and private families—can unke, to save them from the bands of the unqualified, macrapultums, and dosigning. Therefore, families can rely upon him as upon a father. All in affliction can Sud in him one who can feel and sympathies with and betriend them in trouble—one in whose secrecy the atmost confidence can be placed. Weitman's Patent Horse-Shoe!

THE under-igned has purchased the right to make and put on WEITMAN'S PATENT IMPROVED HORSE SHOE, and is how prepared to put on this new and improved shoe, without nails of any kind. Farmers and horsemen will please call and examine it, at the shop in the rear of my livery stable in Salem.

AMOS L. STARKEY.

Weitman's Patent Horse Shoe This new shoe offers the following advantages:
The first would be in the case of tender footed horses, such as have flat and thin hoo's and those whose hoofs will not admit of mails being driven into the hoof. This slow being fastened entirely by the me canical contrivance on the outside, will save all such horses, and make them really as useful as horses with the best feet.

2d. Should a man be driving on the road or traveling over the mountains, as is the case often in this country, where a man is hundreds of miles from a blacksmith, and his horse cast a shoe, he could shoe him again with this patent shoe in two minutes time, needing nothing but the shoe, risp and screw driver.

3d. For horses whose feet are troubled with cores and such diffications this shoe is the very thing, as every shoer and farrier will see at a glance. This shoe can be used by the farrier during a certain season, or over a certain read, or on certain rough ground and then taken off whenever desired, without a cent of expense, or the least injury to the shoe or the horse's foot.

Horrible Diseases.

How many thousands of persons both male and female, are the e. who are suffering out a miserable existence from the effects of secret indulgences, or from
virus absorbed into the system. Look at their pallid,
emaciated, and disfigured faces and their broken down
constitutions, disqualifying them for the happiness of
marriage or the enjoyment of life. In this horrid sitmation thousands suffer until death closes the scene.

Let parents, guardians, and friends attend to those
who are suffering with any of these borrible, life-destroying maladies—see that they are cared for and
stroying maladies—see that they are cared for and
sees as minutely as possible, general habits of living,
occupation, etc., etc. All cases taken under treatment

Caution to the Unfortunate.

Beware of the San Francisco quarks and pretenders, who,
with bogus swort-to certificates, singe the answay. Some of
the self-styled occors, whose names are to be found in the
daily and weekly newspapers of San Francisco and other
places, are tradesmen, and became too larg to work at their
trades. Some are thandiths, aboundard, newspaper carrest,
intelligence office keepers, etc. Look over the San Francisco
Directory, and you will not find their Medical Institutes in
it, but you will find their former occupations in it. Look at
the Directory, and you will not find their Pondiy may to avoid imposition is to make Inquiry—it will cost you nothing, and
may save you many regrets, for, as advertissing physicians
in eight cases out of ten are bogus, there is no safety in trusling any of them until you know who and what they are. Dr.
Gibbon does not decreve people by exhibiting bogus titles,
certificates, pectended patients letters, etc. Doctor Gibbon
will satisfy persons who may call at his office of his ability tereal

offering to the public an advertisement of this kind, for it is universally acknowledged that the treatment of these particular disenses constitutes a branch of medicine which has NEVER BeEN SUFFICIENTLY CULTIVATED, in consequence of the fautidiousness of the profession, who have shandoned those specialities to the care of UNQUALIFIED PRACTITIONERS. There exists here no power to repress the impudence and effectively of mon who are totally incompetent to perform the dates of their so-called medical practice, thereby inflicting miseries to a degree unpumilielled in any other class of human disorders. The only way to remedy this swil is to call the attention of the public to a WELLINFOLMED MYMBER of the MUDICAL PROFESSION, LE CALLY QUALIFIED, and who davores his exclusive attention to discusses arising from the undue excitant of the generative originals, together with those incidental stagms of acute disorder which, when negindertal stages of acute disorder which, when neglected terminate in the horribly wasting form of constitutional disorganization.
