When the Hair Falls

Then it's time to act! No time to study, to read, to experiment! You want to save your hair, and save it quickly, too! So make up your mind this very minute that if your hair ever comes out you will use Aver's Hair Vigor. It makes the scalp healthy. The hair stays in. It cannot do anything else. It's nature's way. The best kind of a testimonial—"Dold for over sixty years."

Two Lovers.

Two lovers by a moss grown spring, They leaned soft cheeks together there Mingled the dark and sunny bair, And heard the wooing thrushes sing. O, budding time!

Two, wedded, from the portal stept, The belis made happy carolings, The air was soft as fanning wings, White petals on the pathway slept.

O, love's best prime!

O, pure eyed bride! O, tender pride!

Two faces o'er a cradle bent, Two hands above the breast were lock These pressa each other while they

rocked. hen watched a life that love had sent. O, solemn hour! O, hidden power!

The red light fell above their knees On heads that rose by slow degrees, Like buds upon the lily spire.

O. patient life! O, tender strife!

The two still sat together there; The red light shone about their knees But all the heads, by slow degrees, Had gone and left that lonely pair.

O, voyage fast! O, vanished past!

The red light shone upon the floor And made the space between them

wide; They drew their chairs up side by side; The pale cheeks joined and said "once

As a Beam O'er the Waters.

As a beam o'er the face of the waters may glow

While the tide runs in darkness and coldness below. So the cheek may be tinged with a warm

sunny smile, Though the cold heart to ruin runs darkly the while.

One fatal remembrance, one sorrow that throws

Its bleak shade alike o'er our joys and our woes, To which life nothing darker or brighter

can bring. For which joy has no balm and affliction no sting-

Oh! this thought in the midst of enjoyment will stay, Like a dead, leafless branch in the sum

mer's bright ray; beams of the warm sun play round it in valo,

It may smile in his light, but it blooms not again. Thomas Moore.

WORLD'S SUPPLY OF PINS.

Complicated Machine Has Greatly Simplified the Manufacture.

Though the demand for pins the world over is enormous, the mills of the United States practically supply the entire demand, says the New York Herald. Formerly plus were expensive, but now they cost a mere trifle. In 1905 the 75,000,000 people in the United States used 60,000,000 gross of common pins, which is equal to 9,500,-000,000 pins, or an average of about 126 pins for every man, woman and child in the country. This is the highest average reached anywhere in the use of pins. Ten years ago we used only about seventy-two plus each.

In a single year the total number of plus manufactured in the United States was 68,889,260 gross. The total number of pins manufactured in the Unit-Yes, you might," interrupted an old ed States during 1900, the census year, farmer in the audience; "but if you did was 68,889,260 gross. There are fortythree factories in all, with 2,353 employes. The business has grown rapid-Mothers will find Mr. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Dioyes. The business has grown rapidly during the last twenty years, for although there were forty factories in although there were forty factories in 1880 they produced only half as much. employed only about half the capital

There has been a considerable increase in the number of women and children employed in pin factories of late years, which is an indication that the machinery is being improved and gan to jabber back. It then was learnsimplified and that its operation does not require so high an order of mechanical skill. Hooks and eyes are a byproduct of plumaking and are produced fellows that you kiss them good night at most of the factories from material when they go away, the same as you do that will not do for plus. The output of hooks and eyes in 1900 was 1,131,824

The automatic machines which turn out pins and hooks has minimized the cost of their manufacture till the cost is practically only that of the brass wire from which they are made. A single machine does the whole business. Colls of wire, hung upon reels, are bles on me, and I passed into machines which cut them into proper length and they drop off into a receptacle and arrange themselves in the line of a slot formed of two bars. When they reach the lower end of the bars they are selzed and pressed between two dies, which form the heads, and pass along into the grip of another steel instrument which points them by pressure. They are then dropped into a solution of sour beer, whirling as they go, to be cleaned, and then into a hot solution of tin,

which is also kept revolving. They here receive their bright coat of metal and are pushed along, killing thieves are not held in high esteem. time, until they have had an opportunity to harden, when they are dropped into a sevolving barrel of bran and up in himself is a bundle of conceit.

sawdust, which cools and polishes them at the same time.

America imported \$418,004 worth of ordinary needles, most of them from England, last year. Hairpins and safety pins and other kinds of pins are bowever, are decidedly American, and bar, and used for irrigating purposes, 000 gross a year.

INJURY TO WATCH FROM FALL. Moisture Bad for Timepleces-

Breaking of a Spring.

of a well-known jeweler. have suffered in that way," was the reply; "It is the most frequent accident are many other ways of allowing much used in interior work. watches to fall."

"Who handle their watches most carefully, men or women?"

less danger of falling."

"How is it with children?"

and their watches fall less frequently. creased the infantile mortality. Some boys will allow a watch to fall three or four times a day; others seem to play with it as with a football."

"Does a fall always harm a watch?" "Most assuredly, and a little fall may be as injurious as a great one. Moisture is very bad for a watch; at times it penetrates where it could scarcely be expected. More than once take a servant with you." "I will," a caressing father, who has allowed his child to play with his watch, finds that it begins to rust. The breath of the child has affected it, or perhaps it has been taken into the mouth. A frequent case for repair is the breaking of the spring, which will happen to the most careful person."-Horological Review.

Bridge Has Longest Span.

The structure is of the cantilever type, and consists of two approach by ninety feet, the two cantilevers of late, and recently it was discovered in length.

The total width of the floor is eighty feet, and provision is made for a double-tracked railway, two roadways for vehicles and two sidewalks. In a cantilever of this magnitude the individual Grotesque and Horrible Practices members are necessarily of huge proportions, the main posts, for instance, being 325 feet in length, and each weighing 750 tons.

Spoke Apache. "When I was serving my time as 'house' on the surgical side at Dunning," said an active physician, "the are worshiped under different names, county sent a man over to us to have a I know a little temple in Bruges where badly cracked skull patched up. The patient's card was a blank except for the not far from the Pantheon in Paris one detail of the injury. Just what nationality the man might be none of us could imagine. When we had lifted the piece of bone that was pressing on the brain he made an address ten minutes long, and not one word could anybody comprehend. During his recovery he must have been seen by 100 visitors first and last, and no one could understand a word he said. One day we had an army surgeon visiting us who was going to show us an operation that was his particular stunt. After the operation we showed him through the wards. As soon as he came near our convalescent mystery the patient began his customary address. You can imagine our surprise when the Colonel beed that our patient was an Apache, the jetsam of some Wild West or medicine

How the Kathr Smokes.

"The Kaffir smokes on his stomach." said a tobacconist, "using the earth for a pipe. This benighted savage, when have influence enough to secure, now the tobacco hunger seizes him, selects and then, a right of midnight entry a piece of clayey soil about a foot to the catacombs; there amid skulls square, and puts a curved twig there- and bones, with orgies I do not care to in, so that both ends stick out. Then describe, they have worshiped the spirhe builds a fire over the place, and it of evil-calling upon Baphomet, upon when the fire has sufficiently hardened Lucifer and Beelzebub and Ashtoroth the clay, he draws out the twig, and a and Moloch, with cries and wailing hyschannel, a kind of pipe stem, is left, teria. This attempt to re-establish the One end of the channel he hollows into worship of the fallen archangel is, I a bowl. The other end is his mouthplece. He puts his tobacco in the tion of modern occultism." bowl, drops a live coal on top, and, lying down, falls to. The Kaffir sucks away vigorously, and very black and strong are the fumes that enter his large mouth. He will not use an ordinary pipe. He likes his own way of smoking best. He is .I suppose, the only smoker whose pipe is the earth." -St. Louis Globe-Democrat.

The average man has more respect for a thief than a deadbeat. And

The London milkmen have a cow spans of 210 feet each, two shore arms, whose function corresponds to the each 500 feet in length, and a great "Sitzredakteur," prison editor of the central span, 1,800 feet in length. The German press. When a milkman is artotal length of the bridge is 4,200 feet, rested for selling below legal grade he and although in extreme dimensions it is entitled to summon his cow to his does not compare with the Firth of defense and have her milked before Forth bridge, which is about one mile the judge, and so prove that the poor in total length, it has the distinction of milk was the cow's fault. Many milkhaving the longest span in the world men have evaded fines in this way of the Forth bridge being each 1,710 feet that there was one cow which was famous for her bad milk that could hired for court purposes.

MODERN DEVIL-WORSHIP.

Still Observed in Europe. Vance Thompson in Everybody's makes the following remarkable reve-

lations: "The dark forces which science recognizes but does not define exercise marvelous attraction op minds of a certain order. In scores of temples they the followers of Lucifer gather, and there is an altar to Pandoemon. This may seem grotesque; perhaps it is, but it is formidable.

"It need hardly be said that the rites wherewith Lucifer is worshiped are hid in much mystery. A couple of years ago I visited one of the 'chapels;' it was in the Rue Rochechouart. The black mass, which I have no desire to describe, was celebrated. It was Friday at 3 o'clock. Over the altar was a winged figure of Lucifer, amid flames; he trampled under foot a crocodilesymbol of the church. A few days ago I found the chapel closed. Only after patient research did I find the new abode of the Satanists. Their chapel now is in a great new apartment house at No. 22 Rue du Ruisseau, within the shadow of the Cathedral of the Sacred Heart on Montmartre. As of old, Satan is worshiped; every Friday the Luciferians gather. I could name many of them-men not unknown in the learned professions. Some of them think, the most remarkable manifesta-

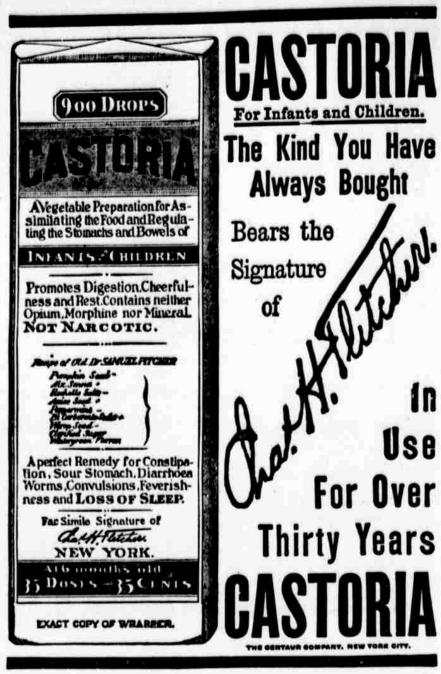

Stauch Affection.

"Are you sure that man truly loves your daughter?" asked the friend of

the family. "Yes," answered Mr. Cumrox, "he has heard her sing and speak pieces and he wants to marry her anyhow."-Washington Star.

The Other Side. "Did you ever get into Brown's confidence?"

"Oh, yes, it was costly, too." "What was costly?" "To get out."-Yonkers Herald.

Daintily Expressed. The author had been dragged faint ing from a crowd of shoppers.

"Almost like my last book." he mur mured, recovering his senses. The listeners, being of delicate per ception, knew then that the book had fallen dead from the press .- Philadelphia Public Ledger.

ELEVATES WATER by WATER POWER

THE COLUMBIA HYDRAULIC RAM

PUMPS AWAY UNCEASINGLY WITHOUT ANY ATTENTION

THE COLUMBIA HYDRAULIC RAM is a simply constructed and inexpensive machine that can utilize a small fall of water for the purpose of raising a portion of it to any desired height. It is the farmer's friend in the "dry season" and is indispensable to those owning land high above ditches. It will furnish water for domestic purposes, even elevating pure water of the spring by means of the impure or muddy water, as found in some streams. Requires no attention. Practically no cost of maintenance, there being no parts to get out of order. A ram will pay for itself in a short time. Every ram installed is giving utmost satisfaction. We keep a large stock constantly on hand. Write to our Hydraulic Department today for illustrated literature.
