The money value of the coal mined
in the world every year is more than
four times that of the gold mined in
the same time.
Canada is called upon to subsidize
forty-three new railroad lines, at a cost
of \$9,320,000. They are to cover a
length of 2,885 miles.

Robert Jones, a surgeon of Liverpool,
advocates that in cases where the
patient cannot take other anaesthetics
the spinal cord be treated with cocaine.
A report comes from the headquar-
ters of the Pelly River, in the State of
Washington, that an old crater there,
supposed to have been long extinct,
is sending out smoke in large quan-
tities.

The world's production of Portland-
cement has increased from 2,500,000
tons to some 11,000,000 tons in the last
twenty years, and the center of the
industry has shifted from Europe to
the United States.

Instead of the long celluloid film, a
London photographer uses circular glass
plates for the cinematograph. The
pictures are taken in a spiral, and a
plate fifteen inches in diameter holds
several hundred, recording a story last-
ing about four minutes.

Aluminum, cadmium, zinc, magnesi-
um, etc., affect the photographic plate,
though not classed as radioactive. A
late remarkable observation is that the
electric spark sometimes increases the
effect, sometimes lessens it, while this
influence—though so superficial—per-
sists for months.

In the latest fight against the rabbit
pest in Australia, the attempt is made
to destroy the animals in their bur-
rows. A specially constructed boiler
is used with a length of flexible metal-
lic hose, and steam at high pressure
is forced into the burrow, after first
closing all openings except that for the
hose. The early results have been very
encouraging.

Ordinary clothing, it is pointed out,
keeps the skin of man in almost com-
plete darkness. A London physician
advises that consumptives wear white
clothing and that it be of linen or cot-
ton, never of silk. Blue and violet
pass the higher rays fairly well, and
might be worn, but red, black, yellow
and green transmit little but heat rays,
and should be avoided.

For five days after the completion of
the great Simplon Tunnel it was prac-
tically given over to the Swiss Geode-
tic Survey, in order that a most care-
ful measurement of a new geodetic
base-line, running through the axis of
the tunnel, from Brigue to Iselle, a
distance of about 20 kilometers, might
be made. This measurement was so
successfully carried out that a differ-
ence of only three millimeters was
found between the two measures that
were made—one from Brigue to Iselle,
and the other back again in the op-
posite direction. This is the longest
geodetic base yet measured, and the
only one whose two ends are on op-
posite sides of a great mountain mass.
It is also believed to possess certain
advantages in accuracy over previous
base-lines. It is the only case in which
a railway following the line has been
used for the direct carriage of the ap-
paratus, and the only one in which the
work has been done in artificial light.

OLD MRS. EUROPE MENDING A BOOT MAY
READILY BE SEEN BY STANDING A MAP
OF EUROPE ON END.

A "Private" Allen Lorn.
"Private" Allen, of Mississippi, while
in Congress was fond of telling about a
fine old gentleman down in Tupelo
whose habit was to sit on a dry goods
box and talk politics. His hobby was
that the office should seek the man
and not the man the office, and he
waxed eloquent in the discussion of
his chosen theme. Finally he deter-
mined to become a candidate himself
and went out upon an electioneering
tour. When his friends twitted him
about his change of front he replied:
"Oh, yes, the office should seek the
man, but the man should be around so
that the office may find him."

Not Far to Seek.
A prominent Christian worker went
to Jacob Rits and told him that he and
his family wished a family of foreign-
ers to look after. Mr. Rits found him
such a family, and it was a Norwe-
gian woman who, for years, has been
scrubbing the Christian's office.

Eyes on Boats.
The Chinese always paint an eye on
either side of their junk's bows, so
that the boats can see their way.
