**Science AND Invention**

The London physician's discovery that scars may be prevented or removed by cutting the skin slantwise instead of vertically is pronounced one of the most important of recent advances in surgery.

Caterpillars have been found to be greatly agitated by musical vibrations, descending from a tree in a shower at the sound of a cornet. This should suggest an effective means of fighting the gypsy moth and other caterpillar plagues.

French aeronautic authorities have given the name "aeronef," or aviation apparatus, to a flying machine that is heavier than the air. The varieties include: (1) the helicopter, sustained and driven by one or several propellers; (2) the aeroplane, chiefly sustained by one or more flat or curved surfaces, and (3) the orthopter or mechanical bird, sustained and propelled by beating wings.

A growing evil reported by Dr. Aba Sztankay among the Slovaks of Upper Hungary is the habitual use of camphor internally. For fourteen years he has persistently questioned buyers of the drug, and he concludes that at least twenty-five per cent of the large and increasing amount sold is used by the camphor-eaters. An increase in epilepsy seems to be a result of this indulgence.

Flaming arc lights have now become an established feature of downtown Chicago streets. They are new, comparatively, for such commercial purposes, but their principle has long been known. The flaming arcs thus far shown in this country produce a light yellow, red or vivid white light, according to the carbons used. The addition of the salts of fluoride, bromide and iodide of lime give the light the yellow tint, while other salts of lime give the flame a red color.

Leprosy is increasing in both North and South America. Colombia, where there were only 400 lepers forty years ago, is said to have 40,000 now, and many find their way into the United States. Such a medical authority as Dr. Ashmead, who was formerly chief medical adviser to the government of Japan, says the increase is alarming. When leprosy is brought into a new country it takes fifty years for the seeds to take root, and it becomes epidemic after some 200 years. It has been shown that mosquitoes are active in transferring the bacilli of leprosy.

The first section of the railway across the Andes between Chile and Argentina has been officially inaugurated, and work has been begun on the highest part of the line, where, at an altitude exceeding 10,000 feet, great tunnels are to be constructed. The largest of these tunnels will have a length of 3,405 yards, not far from equally divided between the Chilean and Argentinian sections. With the use of that portion of the line already completed, the journey between Valparaiso and Buenos Ayres will be shortened several hours.

An important use has been found for the Cooper Hewitt mercury vapor lamp in scientific investigation. In optical experiments in the laboratory it is often important to have at command a monochromatic light. Formerly the mercury arc light was employed for this purpose, but after being used for a short time the efficiency of this source of light seriously falls off. It has been found, however, that the Cooper Hewitt lamp gives the same monochromatic light, with very fine rays, so that it is admirably suited for the study of interference phenomena, and it possesses the great advantage of being steady and trustworthy in its output. Moreover, being a commercial apparatus, it is easily obtained, and can be used at a comparatively small expense.

**No Extra Trouble.**  
 It was in the dead of night, and a cold night at that. Mr. Smith was away and Peterson Smith, aged 6, was getting over the measles.  
 "Mother, may I have a drink of real cold water?" he asked, waking Mrs. Smith from a refreshing slumber.  
 "Turn right over and go to sleep!" commanded Mrs. Smith. "You are a naughty boy to wake mother up when she put a pitcher of water on your table the very last thing before you went to bed."  
 Ten minutes later the small voice piped up again: "Mother, I want a drink of water."  
 "Peterson," said Mrs. Smith, sternly, "if you say that again I shall get up and spank you!"  
 There was five minutes' silence, and again Peterson spoke.  
 "Mother," he said, cheerfully, "when you get up to spank me, may I have a drink of water?"—Youth's Companion.

**The Natural Way.**  
 A philanthropic person heard of a negro family that was reported in destitute circumstances, and, calling at their domicile, he found the report true. The family consisted of the mother, a son nearing manhood's estate, and two young children. The benevolent old gentleman after hearing the mother's story gave her eldest son \$1 to get a chicken for the Thanksgiving dinner and took his departure. No sooner was he gone than the negroes said to her son, "Sambo, you done gib me dat dollah and go get dat chicken in de natural way!"—Chicago Inter Ocean.
