Whooping-Cough.
This common affection of childhood—pertussis, the doctors call it—is usually regarded as one of the things a child has to have, and it is supposed that the only thing to do is to put up with it, as with all unavoidable ills, the best one can. The philosophy of this state of mind of mothers is good, but the indifference it sometimes engenders is distinctly bad, so far as it causes the parents to neglect treatment. Whooping-cough is often a trivial affair, but it is sometimes fatal; and even when not so, it may pave the way for serious ills by weakening the resisting power of the child to other germ diseases, such as scarlet fever, measles, and especially pneumonia; or the strain of the cough and of the forced holding of the breath may cause a blood vessel in the brain or in the eye to break, with resulting paralysis or blindness, or it may produce a rupture. Fortunately these troubles are rare, but the possibility of their occurrence should be borne in mind. Whooping-cough is a dangerous disease, occurring with greatest frequency in the winter and spring. No age is exempt from its attacks, but about half of the sufferers are babies under two years of age. One attack usually insures safety against any subsequent ones. Owing to its great contagiousness, a child with whooping-cough should be kept away from other children, and should never be carried out in street cars and other crowded places to give the disease to every susceptible child or even adult in its vicinity. The patient must be well wrapped up when outdoors or when getting air by an open window, and the living room should be warm, although well ventilated. The diet should be simple, and food should be given frequently but in small quantities. During the entire course of the disease, even in the mildest cases, the child should be under the constant supervision of the doctor, for the disease may take a bad turn when least expected, and the best way to prevent an evil outcome is to be always on the watch for it. Children with whooping-cough often go through it with but few signs of illness, but care should not be relaxed for this reason, and the mother, nurse, or some adult should be present always to do what little can be done to ease the paroxysms.—Youth's Companion.

Making a Machinist.
"There is, perhaps, no other trade, and very few professions," writes Wm. Haddock in the Technical World Magazine, "that require the high order of intelligence, the study, the application, the real hard-headed common-sense, the surgeon's delicacy of touch—for instance, in fitting of fine work—that the machinist's trade demands to give the excellent work and the interchangeability of parts found in the modern rifle or sewing machine. The range of his work is from a needle to a battleship; from automatic machinery that would talk French had it one more movement" to measuring machines guaranteed not to vary more than the fifty-thousandth part of an inch from the absolute. This precision will perhaps be better appreciated when it is remembered that 150 times this limit of variation is only equal to the diameter of the average human hair. Standard plug and ring gauges, to take a specific example, are so accurately fitted to each other that the expansion due to the warmth of the hand, if the plug be held in it for a few moments, will make it impossible to insert the plug in the ring; while, if the ring be expanded in the same way, the plug will drop clear through it. When the machinist has become skillful enough to fulfill the above requirements, he may receive from \$2.50 per day up to whatever he can make himself worth and prove it."

How John Hay Regarded Critics.
John Hay was chatting with an intimate friend, when the latter asked: "John, what feature or phase of this writing business has impressed you the most?" "Well," was the reply, and the speaker's eyes twinkled mischievously, "so far as I am concerned, it's the things that the critics fish out of a fellow's printed stuff that he never put there. But I suppose that critics, like the rest of us, have to show excuses for living."—Success Magazine.

Just Summer Love.
"See here!" cried the jealous lover to his giddy fiancée, "I want an understanding with you."
"Indeed?" she replied.
"Yes, I want to know what you mean by being engaged to Jack Huggard and me at the same time?"
"Nothing."—Philadelphia Press.

It has always seemed to us that Job had too much patience to have good sense.
Fishing tackle lying about a man's desk always reminds one of shiftlessness.
Yes, Alonzo, foul weather sometimes boosts the price of eggs.
