MISS VEAZIE WON IT

SUCCESSFUL CONTESTANT FOR THE ORATORICAL PRIZE

A Reception Was Given in Honor of Her Victory at Parsons' Hall in Eugene.

FOREST GROVE, Or., Feb. 25 .- At the state oratorical contest Friday night, Miss Julia Veszie was the successful contest-ant. Following was the programme pre-

University of Oregon, Miss Julia Veazie, "Alexander Hamilton": Pacific college, H. F. Alien, "Whittier": McMinnville college, Charles V. Galloway, "The Native Races of the Pacific Coast": Albany college, Abble J. Fry, "Siren's Song"; Oregon state normal school, Irving E, Vining, "The Western Acropolis"; Williamette univer-sity, J. W. Reynolds, "The Proving of a Nation": Portland university D, Ch. Portland university, D. D. Glass, Labor Reform": Oregon agricultural col-lege, Austin T. Buxton, "Prospects of a Brighter Future"; Pacific university, W. S. Shiach, "The Criteria of Success," A large crowd was present, a number com-ing up from Portland, among whom were the following who claim the old University of Oregon as their alma mater: Messrs E. Woodworth, J. R. Greenfield, A. L. Platt, of Portland; Rev. Cowan, of Oren City, and Dr. T. W. Hams, of Eu-

of her victory. Miss Veazie's oration was

In the sea of the tropics lies the little island of Nevis. Upon that sunny island, near the middle of the lith century, a boy, was born, a British subject, destined for American citizen. From his mother inherited the vivacity of France; from his father, the permistence of Scotland; tropical luxuriance enriched, English sym-metry strengthened his nature, and later struggling America awakened his patriotmetry strengthened his nature, and later struggling America awakened his patriotiem, and made it the dominant motive of his life. Five nations molded that boy's character; nations whose meetings dyed crimson the beath of Bannockburn, the gray ledges of Bunker Hill, the field of Waterloo; but in him they forgot hostility. and, fusing, formed the one man in the principles obpolitical history of the United States tained acceptance. Had they gained full whom Daniel Webster regarded as his acceptance, the battle for disunion must political history of the United States whom Daniel Webster regarded as his intellectual superior; formed Alexander intellectual superior; formed Alexander have been fought, not under the banner Hamilton, one of the mukers of America, himself a type of the America to be its real ensign of slavery and rebellion.

West Indian counting-house, managing his absent employer's large trade. Soon awe-inspiring portals of Princeton col-lege, amazed the president by requesting freedom from class restrictions, liberty to advance as his ability dictated. He was refused. At 17 he might be seen at King's college, now Columbia, walking in the shadow of the trees, a small, slight youth, with clear cut features, piercing dark eyes bent down, hands clasped behind him, mind absorbed in meditation. staermen; calmed turbulent revolutionary udiences by wisdom of speech; advise ongress; unprotected, championed hate Tories, risking popularity, even life, until with truth he was called the "Little Lion." The revolutionary alarm in one mo ment transformed the youth into a ma ture man. Advising statesmen, encouraging patriots, combining untiring energy originality and courage, he hastened into the army, passing with almost incredible swiftness from a soldier, captain, military secretary, lawyer, orator, writer, financier, to full majesty of statesman

The revolutionary war, left America impovished, without central governmen estitution or commerce; with debt oppressing, anarchy threatening, uncertain ty whether to revere or abhor the Declaration of Independence. Pre-eminently through Hamilton's influence, a federal convention of 55 men met at Philadel-phia; men immortalized as framers of the constitution of the United States, a docu ment instinct with Hamilton's thought son and Jay, wrote the "Federalist" educating, convincing, persuading the colon-les to unite. When writing failed, by eloquent appeals attacking and reattackhe won. The coning opposition, finally he stitution was adopted. achievement ame not from a political aspirant, a believer in the people's voice, but from a foreigner, called "British," He might have wen less laboriously by dazzling promises. We picture pairiots struggling through the revolution, each encouraged, upheld by visions of a great republic. Beyond re-sisting oppression, had they clear vision? After gaining liberty, they did what? They invited George Washington to be-come king. Bravely Hamilton answered every opponent. To monarchists replying: "The fabric of American empire ought to rest on the solid basis of the consent of the people;" to calm indifference, "We have neither troops, nor treasury, nor government." To all he declared: "Our national government is the rock of our political salvation." His magnetic mind. overcoming all lesser attractions, quickly frew political forces into one vast, radiating system, whose center was the con-12 tomorrow" into the "Union forever."

As secretary of treasury under Wash-ington, he did even more. It was Hamilton who created our nation's financial policy. It was Hamilton who lifted the unconquerable, yet enslaved by poverty, prostrated with debt, stung by forcign contempt, to security and honor. It was Hamilton who established com-merce, trade and credit. It was Hamilton who, scorning dishonesty, assumed debts, national and state, instituting pubintegrity. America has never seen deeds greater, more sudden than his. I'n equaled in constitutional writing, brill-iant in statesmanship, fareering in finance, such was Hamilton. How worthy of admiration, of a nation's following; how adapted to arouse bitterest enmity. Abruptly in his life's fullness enmity entangled him.

Auron Burr, in revenge for political opposition, challenged him to a duel Both knew it meant the death of Hamil-Was Hamilton weak to accept that challenge? He obeyed custom. Many scorn custom in dress, manners; few its ende of honor. Obedience is the price demanded for human championship. Ham-liten avoided isolation. He abbored duel-tug, yet he must live dishonared or die dishenerably. Hew he struggled! Everything inclied, everything checked him. Desperately he repressed the

"Angels, powers, the unuttered, unseen, the alive, the aware;

loosed with her crews;
And the stars of night beat with emotion and tingled and shot

Out in fire the strong pain of pent knowl-

He yielded, as meekly as nations yield to war to vindicate their honor. The fato war in visidicate their honor. The fa-tal morning arrives, and fascinating Aaron Burr stands carelessly on a rocky ledge by the Hudson, with the picturesque heights of Weehawken, darkened with follage, rising behind him, the whole romantic scene illumited by the early morning sun. But see! A boat rapidly crosses the water! A figure ascends the bank. A moment more, the great states, bank. A moment more, the great states-man and great politician stands face to face. The distance is decided. The signul is given. One raises his arm, aims exceptilly; the other, firm and creet, holds his pistol at his side. A flash, a quick

noble Hamilton has fallen! Pale and still are the powerful features, dull the brill ant eyes, unresponsive the eloquent lips. Hamilton has fallen: but that fall startled a nation; that fatal shot reverberated throughout the land a curse upon Aaron Burr; a mourning nation saw overshad owing that death the hideous spirit of the duel, and vowed to banish it forever.
Patriotism, nobility, wisdom, ability to
place national interest before self in-

terest, to see present events modified by past and future—these are requisitions of great statesmen. Hamilton possessed great statesmen. Hamilton possessed them all. For his great aims, enduring structures, and part in the creation of a nation, he deserves the crown of high est, purest statesmanship. Washington was president of a government distinctly expressing Hamilton's thought, of a peo-ple united by Hamilton's labor, of a nation prospering under Hamilton's policy.
At 20 Napoleon had overthrown the French
constitution and liberty; at 20 Hamilton
had stamped his thought upon the greatest constitution ever recorded. Before he
was 25 Beethoven composed symphonies
unrivated in majesty, before he was 25
Hamilton transport. Hamilton transposed discordant colonies into the harmony of a nation. Moses of old held peculiar glory as constitutional law-giver, Alexander Hamilton holds the glory of writing the greatest constitu-tional treatises. Raphael painted pictures that turned minds from sordidr to purity; Hamilton pictured thoughts which lifted a nation from co poverty to prosperous peace. Talleyran said that of history's three greatest mer. Napoleon, Fox and Hamilton, Hamilton is greatest, a world's wonder, a man who after having made a nation's fortune worked to support himself. A statesman in the highest sense. More than that. Hamilton belongs to the greatest of great men, the illustrious circle of men whose history is the world's history.

Overcoming difficulties beside which

those of today seem mere chimeras, he hewed away obstructions of popular prejudics. He was the sculptor whose masterly skill shaped a nation's govern ment; the wise prophet whose voice pro-claimed the way of progress. His genius At the age of 13, Hamilton sat in a ceptance of Hamilton's principles the Nest Indian counting-house, managing champions of the Union stood, and bloody war determined the issue in their favor afterward the precocious boy entered the Scarcely more in success where accepted awe-inspiring portals of Princeton colprinciples been justified. Only within a He of a mighty government, harassed by seen internal disorders, unable to justify protection of lives and property except unde pretense preventing of interference with mails and commerce. The triumph of principles of loyalty, unity and obedience inculcated by Hamilton, in the people's hearts, has supplied in the past, can supply in the future, the deficiencies in th written groundwork of national organiza

No blood stained Hamilton's victories no selfishness darkened his ambition; his influence shall endure with America. Countless eulogies may be pronounced, but none can vie with history in honoring him; tributes may be paid to his memory, but none can equal the tribute paid by the inspiring march of the republic; odafter ode may be sung, but none can exalt him as shall the voice of the people in the years to come.

LEGISLATORS' WATCHES.

Tom Reed Has the Boss Timepiece in

A great rivalry has sprung up in the nouse, says a Washington letter in the Springfield Republican. Members are contending with each other, and there is a deep interest in the contest. It is all over the question of time. There never was a man owning a watch who did not believe it to use, and they were covered with arrownot the passing minutes. Every man in the house of representatives carries a
watch of some sort. The member, when
first elected from a rural district, may
have an old-time silver, or even a Waterbury. His second term is usually marked,
however, by the purchase of a gold watch.
Sometimes, after long, service, the cheap
legends of their race and the history of
legends of their race and the legends
legends of the life of the life of
legends of the life of the life of
legends of man owning a watch who did not believe however, by the purchase of a gold watch. Sometimes, after long, service, the cheap gold watch of first purchase is discarded for a more expensive one. At present there are not more than eight or ten silver watches and two or three Waterburys in the house. Each member, preserving his instinct in human nature even in his hour of greatness, relies upon his own timepiece, swears by it, and questions either the sincerity or the intelligence of all other members who go by some other

There are two clocks in the hall of representatives in plain view of every one on the floor. One of these is a very or nate timepiece over the entrance, and the other, which hangs over the speaker's desk, is corrected at noon each day by electric communication with the observa-tory. But members almost invariably ignore these and consult their own watches Some have been known even to dispute the allotment of time for speeches upon the ground that, by the record of their own watches, their minute, or two min-utes, or five, had not expired by several seconds. One old member from the West, whose Waterbury shifted all over the dial during the Source of a week, reluctantly came to the conclusion that he must buy a new watch, and he has recently appeared with one of gold. It is observed that the character of a member is to a considerable extent denoted by his watch. The careless and indifferent man, who has considerable extent denoted by his watch. The careless and indifferent man, who has on his hands as a burden all the time there is between roll-calls, seldom keeps his watch right, while the watches of the One time he commenced in a low tone systematic, precise and active members reflect their characters.

So it happens that Tom Reed's watch is the most accurate watch in the house. On the start there was a lively contention between Reed, Sibley, Hayes of Iowa and Turner of Georgia as to the relative merman gave out; his powers were limited. its of their watches. It was demonstrat-ed by the chronometer that Reed's watch was superior to them all. It is a very plain hunting-case gold watch, considerably worn from the pocket, and it does not vary more than about two seconds in a week. The watches of the other three are of about equal merit as timekeepers. Sibley's is an open-face gold stop, with a black dial, which cost him \$750 in Geneva. Hatch of Missouri has an old watch, the cases of which are worn thin, in which he has abiding faith. bought it in 1858, carried it through the war, and has worn it ever since, except when sent to the jeweler's to be cleaned. The whole earth was awakened, hell Repairs beyond cleaning it has had none

With a Broken Shaft.

SAN FRANCISCO, Feb. 2.-The steamer Scotia arrived today from the North.

Off Point Arguelio, she spoke the steamer Jewel Iving to with a broken shaft.

The Scotia stood by the Jewel until temporary repairs were made to the latter's machinery. The Jewel is now under way to this city. She is making about four knots.

his pistol at his side. A flash, a quick report, a murderer's bottified face; Hamil-l billousness. One is a door. Try them.

NEARFIFTYYEARSAGO

REMINISCENCES OF LIFE IN THE

Gleaned From Tales Told by a Settler Who Is Still Living.

On the 20th of September, 1831, W. H. Riddle and family reached Canyonville, having come across the plains via the southern route and Humboldt, and on the 21st Joe Knott took him over to the valle of Cow creek, only six miles distant, where he built a small foundation of logs on the spot where his son, George W. Riddle, still lives. He took up his residence there the same fall and claimed a donation. The discovery of mines in Southern Oregon caused much of that re-gion to be taken up that same year.

at that time the Cov creek indians were in two bands, being on either side of the creek, which is one of the main branches of the Umpqua, the beautiful valley, surrounded by the romantic hills of Umpqua, eing scarce a mile wide. In these hills looking down on the Riddle farm, is the famous nickel mine, on which the future of that region places so many hopes—if It ever gets out of the courts and into op eration. Its value is shown by the fac that one of the Douglas county banks had at one time naif a million, or more, on de-posit to pay for it, if it could be purchased. posit to pay for it, if it could be purchased The Indians talked the Shasta tongue which was used by the natives of the Rogue river valley, adjoining on the south, as well as the Shastas, over the Sisklyous, on the Khamath and waters of that river.

Mr. Riddle says the Shasta language is very suphonious, distinctly different from all other Indian languages, and far more pleasing than that of the surrounding tribes—as the Modocs, Klamaths and others. It was so melodious and usefu that he learned to speak it, and as he was a boy of some 12 years, he knew the In-dians well and often acted as interpreter to his own family, and afterward to Hunt ington, superintendent of Indian affairs when he held conferences with the na-

was that the Klickitats were often there to trade, coming from their homes on the Columbia, at the Cascades or east of there, on the plains of Klickitat, north of The Dalles. I have written of this trib and said they were the Yankees of abo riginal days, for they traded far and near. It seems now that they not only took in the Sound country and Western Washington, as well as the Willamette valley, for they were looking out for chances to profit about Pertland 50 years ago-or where Portland now is-but made trading trips to this far south, showing enterprise that belonged to no other of the Columbia.

In that early time Captain Cowles had a ferry on the Umpqua, near the town site of Riddle, below the junction of Cow creek with the main stream. In those days they never had trouble with the natives. My-wa-lee-ta was chief of the band occupying the west side of Cow creek, and Quen-ty-yu-sa lorded over the east shore. They were pretty much the same people, but each had his own side, The last named ruled back to Canyonville. The Indians down the Umpqua were the Myrtle creek kind; each preserved its autonomy. My-wa-lee-ta was the most in-fluential chief of all, had the most to say and commanded the implicit obedience of all who came under his control. He had rather a remarkable character, was arbieneficent and his people happy under it He was between 70 and 80 years old. The two bands were nearly the same in size, and contained 150 to 200 together. The old man had been a great warrior, and when in his war paint and in his majesty wore an elkskin garment that enveloped his body. This had been his protection in the wars, for there seemed to be a great many wars in the previous years, and this elkskin coat was made loose so the arrows could not go through it. All over its surface were sears left by arrow points it had caught, but that could not penetrate the tough hide. The old man was very proud of this coat and those arrow-marks but prouder yet of the many scars that left their record on his arms of wounds received, for while the eliskin coat pro-tected the body the arms had to be free

his own fighting days—of the time when he had rather fight than eat—and now he fought his battles over again until his eye-lids would no longer wag. In the olden times their enemies were the Shastas-or Rogue rivers- and his tales of long ago were of raids made to the southward, when they swooped down on their enemies and made m meat of them-murdered them, in fact-then cut down oaks and built brush de-fenses to shield themselves from sudden attacks in reprisal. The coming of the ned to let in an era of peace on them all. The Shastas, or Rogue riv-ers, had all they could do to hold their own against the miners who possessed their land, and came over to induce the Cow creek bands to become their allies and let loose the dogs of war all along the line. But My-wa-lee-ta had grown old. His elk-skin armor was so full of arrow holes as to be covered with glory, and his white neighbors had become his friends; they did not molest the camas fields, drive away the game of the hills or the fish that came up from the ocean.
It was in the early days of settlement
that these emissaries of war came over the hills and through the canyons to find allies in their old enemies, but My-wa-lee-ta was smoking the pipe of peace and grew eloquent in advocacy of a quie of voice and wound himself into an argu-ment that was so conclusive that it oc-cupied two days and nights to conclude it. Yet the ambassadors of the Shastas sai Human nature, even in its wild state, caunot run like a mill tale in perpetuity. So the old chief's voice, that had risen like a cyclone, died away to a whisper,

war. So they wended their way home-ward, sadder, but not much wiser men than when they came.

After all, while not willing to go to war with the whites, these same Indians warred much with each other. I am sor warred much with each other. I am sor-ry I cannot say the primitive inhab-itants of this Eden set a good example for us to follow. They quarreled, they fought, they murdered and robbed each other with a profusion and abandon that was not so romantic as it was antic. Every little band was in constant fear of some other band; they lived in a state of war while they were at peace. They sold their squaws to the detriment of family relations. They believed in witchcraft, and one squaw was killed because she was supposed to be a witch. Somebody died and somebody else laid it to this poor squaw that she caused the death witchcraft. So Curly, the accuser, killed the squaw for a witch, and one day Mrs. Riddle heard Indian Charley threaten to kill Curly to get even. Without malice prepense, rather in the way of a joke, Mrs. Riddle—who had no great faith in Charley's promise—told him she would give him a calico shirt when he did so Curly was a desperado, and a week or so later went to Charley's fortified camp, and, standing his gun up in the brush that was piled at the doorway, he walked in. Curly thought himself invulnerable— a very Achilles—for it was claimed that a warrior who should go without ment could not be killed by an arrow. So he walked in fearlessly, but while he was talking inside to others, Charley stepped outside, took the way and poking it the country. These men make public ion. They constitute public opinion. sutside, took the gus, and, poking it through the brush heap, shot Curly dead, and ran for dear life and the calloo shirt. It was fully five miles to the Riddle place, but he ran such a race as no tale or song of a shirt ever told or sang. He reached the house out of breath, and lisped that he had carned the shirt. He broke his in Yakima Valley.

wind and his life in that race, and died within a month. Such was the fate of Curly and Charley. It is sald that Curly, and Big Jim, and Little lke were three big Jim, and Liftle ike were three brothers of the Myrtie creek band, and Myrtie creek and its beautiful valley lands were not far away—say five or six miles. These brothers were desperadoes and always in mischief or in some murderous work at the expense of the whites and their own people. Little like was taken, tied to a tree and shot to death by

excellent state of preservation, while circular tusks, measuring six feet in cir-cumference, were distinctly outlined although they crumbled somewhat upon exposure. Mr. Olsen took measurements and drawings of these, as well as other whites for some deed he or they did not iong after.
In 183 a fever broke out among the Inportions of the huge frame which would dians, and most of them died. It was called the "mountain fever," but no one not stand moving. He also secured the socket joint of the forearm or leg, which knew its real character; old My-wa-lee-ta went to his fathers in his old age from this disease, and most of his people went the same road. Several died a day, is entirely too large for any animal of these modern times. From all indica-tions the bones were those of the hairy mammoth. That this country was once but none of the whites suffered. When the good old chief was gathered to his inhabited by these animal giants has long been more than suspected, as other bones of mastodons have been found in various sires, then Quen-ta-you-sa was supreme and reigned in his stead. There ware not parts of the Yakima country at different many to rule over, but there was great grief and deep sorrow among all the peo-ple, and they wept sore because My-watimes, some of which are now in the Smithsonian institution. The bones of another prehistoric animal can also be seen could not share hisuness and imbedded in the Yakima river, between Zillah and Snipe's mountain. It is apounsel with them. He must have been a good old savage.

The original inhabitants of Myrtle creek were a hard lot—I am glad to say the present population are a clever and kindly parently standing, and six feet of the frame are above the river bottom. Those who are versed in the subject believe that it is the hyracotherium, an animal of the people and they tell a story to illustrate their wickedness, that once on a time, when a party of the Cow creeks were ape division, which are supposed to have existed in the Eocene period. Several in-effectual attempts have been made to seon a mountain spur-probably cure these bones, which are in a good state of preservation, and another athunting or gathering berries—a lot of the Myrtle creek scoundrels went there-no doubt in the night time—and killed almost every one of mat inoffensive

France is the land of politeness. Within 48 hours after President Faure's election the Paris newspapers had described him Curly and Little Ike-were killed off as examples to those murderous Myrtle creek natives. as follows: Reactionary; choice of the monarchists, of the lukewarm, of the monarchists, of the lukewarm, of the clericals; prisoner of the reaction; coad-jutor of Leo XIII.; creature of the vatican; quartermaster for Prince Victor or for young Orleans; suspect; choice of the canteen; a wretched fellow, who is In 1855, late in the fall, the Indians joined the Shastas and went on the war path—as Nichols had ill-used them. These were inhuman brutes, who passed aged among these people until all the man there was in Quen-ta-you-sa was roused, and he could stand no more. He or his people never did harm to the whites Shastas. When it was known that the Indians were roused, George Riddle, then a boy, was sent to them and was glad to
