NEW YORK, Jan. 18.-The stock marke tellitions showed no marked change from those consistence aroses no married change from these prevailing for some time past, and general lassitude was the characteristic. One or two rail-road stocks reflected a fair demand, notably the Norfolk & Western issues and Union Pacillos. The Baltimore & Onio stocks were also bought in moderate volume. Covering by the bears in Sugar and the late demand for Union Pacific stiffened the market demand for Union Pacific stiffened the market again, and served to retrieve a part of the declines, making the close firm, and the net changes mixed. There was a very marked absorption of new and reorganization bonds, which served as a background to the strength of the whole market for securities. The undertone was unmicrakably firm, and, in spite of the very light demand, there was no pressure to sell stocks. The further reduction in the Bank of England's private rate of discount the very light demand, there reduction in the bound of England's private rate of discount and the weekly return of the bank served to confirm confidence in the money outlook. The strength in London on this score and on the hopes empendered by the meagerness of the news from South Africa, caused some reflected strength in the New York stock market.

The hardening tendency of sterling exchange is viewed with tranquillity, because exchange is viewed with trainformer its cothe Hank of Engiand has withdrawn its con-cessions on gold exports, thus raising the gold-export point for exchange considerably above that at which gold has recently gone out. The improved demands for bonds is a natural result of the cheapened raises for money, and the pressure of capital for production employ-ment. Chicago Grain, Produce, Etc. CHICAGO, Jan. 18.—The scanty array of news today served its daily purpose of emphasizing the fact that the supply of wheat is away over the present demand. HOTEL ARRIVALS.

The equilibrium between production and consumption of pig iron, which was reached in December, had changed to an insignificant gain in stocks on January 1, the report of the Western Pig-Iron Association showing 13,000 tons more on that date than on December 1. Foundry buyers, who will need considerably more iron for the first half of the year, are watting believing that lower prices are due. But from the standpoint of the furnace men the conditions do not suggest concessions.

The effect of the rod-mill strike upon the steel market would be to increase the billet supply if there were a general interruption of operations. The outcome is uncertain, but as yet the strike has not assumed important proportions, and there is a lack of unanimity among the men. From the standpoint of finished materials, the general outlook had improved in the week.

In structural material the indications point to an advance, though action may not be taken at once. The attitude of producers indicates an expectation that the reheaved plans for a THE PORTLAND.
