NEW YORK STOCK MARKET. Increased Interest Manifested by the

Buying Public. NEW TORK, Feb. 2.-Today's stock spec NEW TORK, Feb. 2.—Totaly a stock speculation furnished adequate proof that increased interest was being manifested by the public in the market. There was extensive trading in railroad stocks, which comprised properties traversing a wide area. Professional operators, perceiving that support from commission bouses could be relied on in an upward movement in the searchest stocks. Sevoted their energies in the standard stocks, devoted their energies in this direction, causing the specialties to o cupy a secondary position in the market. This change of front was in a measure due also to the fact that some of the industrials which had sustained a substantial rise showed sydeness of good realizing. Recognition of the secouraging general situation and indifference of the local market to foreign complications was the primary cause of the revival of outside interest.

Chicago Grain, Produce, Etc.

CHICAGO, Feb. 2.—May wheat opened a shade under yesterday, at 6th 1967bc. Cabbee were harely steady, and Argentine shipments indicated that the plaque was not curtailing the export business to a great extent. The market soon turned firm, as Paris at the close showed some recovery, and some apprehension was felt for the domestic crop. Upon the arrival of private cables announcing a serious prospect for the French crop. the afrance, which had been rather irrugular, received new impetus, which carried May to 85%c. The close was help higher higher, at 65%c. The close was help higher higher, at 65%c for May. The last hour of the session, trade previously. Important movements appeared to be under way by substantial interests as bods, a strength developed in first one group of railroad stocks and then another, until the list showed gains running from 1 to 3% points. In connection with the engrances buying of Baltimore & Ohlo im a statement that the management had and \$8,000,000 d per cent bunds of the road, and \$2,500,000 of that of a substitute line, to provide improvements, accounted for their busy-mit rise. As the terdency of prices because pronounced arbitrage increase took advantage of the level to unbased, but their offerings of 10,000 the level to unbased, but their offerings of 10,000 the level to without but their deprine of 10,000 alone presented no effection; check to the current. Long-standing short lines in some of the middle-grade railroade were evered, and thooks of 1000 thoses flaved pentifully being rather quiet, was active.

Com.—Small country offerines and a good those of 1000 thoses flaved pentifully thouses were factors in the strong corn market. May closed by up, at 33%.

The weather yesterday held up the liberal receipts of potention, which have been coming along this week with a regularity which was almost monotonous, but the standering in receipts had no effect in strengthening prices. Early operations indicated that the powerful interests were engaged in the mean stocks, as prices of the minor securities followed with a function as the dealers, and yesterday they sold in round lots as life per domen, with single cases moving at life. There was a considerable number of dressed turkings on the street yesterday, and beet stock sold at about 15c, with some very fair going at 18c. Chickens were quieter than had been expected early in the week, but no material reduction was made in prices.
