

CITY NEWS IN BRIEF

WHEAT FOR PARIS EXPOSITION.—At the office of the Pacific Coast Elevator Company are to be seen a number of magnificent samples of wheat. Duplicates of the samples forwarded to Washington will be sent to the Paris exposition. These samples were grown in Eastern Oregon and Washington, and Vice-President Kennedy and Secretary Deaver, of the company, say no better wheat has grown anywhere. Among the samples which are displayed in glass jars is Sonora wheat, from Walla Walla, weighing 46 pounds to the bushel; Martin Amber, a new variety, weighing 45 pounds; Little Club, 45 1/2 pounds; Velvet Chaff, from the Palouse, first of the kind seen here, weighing 45 1/2 pounds; Blue Stem, 45 pounds; Salt Lake Club, 45 pounds; Italian Club, 45 pounds; Red Chaff Club, 45 pounds. A jar of wheat of the standard adopted for Walla Walla wheat for this season is exhibited with the above-mentioned samples, and weighs only 35 pounds to the bushel. As wheat which comes up to the standard of 40 pounds to the bushel is considered very good, it will be readily understood, without further explanation, that the wheat which is shown in the jars is something extraordinary. It is not likely that any better samples of wheat than those sent by the Oregon Elevator and Storage Company will be seen at the Paris exposition, where there will be samples from all the wheat-growing regions of the world.

WOOD FOR DEMOCRATIC GAVEL.—Some time ago E. T. Smith, a new inventor, who is building a gavel for the national democratic convention of 1900, out of wood from every state and colony of the United States, wrote to C. J. Schnabel, of this city, in a plea for assistance. The matter was turned over to George H. Holmes, assistant secretary of the Oregon Historical Society, who has forwarded three specimens of wood, with the following notes: Secretary Deaver, of the company, says no better wheat has grown anywhere. Among the samples which are displayed in glass jars is Sonora wheat, from Walla Walla, weighing 46 pounds to the bushel; Martin Amber, a new variety, weighing 45 pounds; Little Club, 45 1/2 pounds; Velvet Chaff, from the Palouse, first of the kind seen here, weighing 45 1/2 pounds; Blue Stem, 45 pounds; Salt Lake Club, 45 pounds; Italian Club, 45 pounds; Red Chaff Club, 45 pounds. It is not likely that any better samples of wheat than those sent by the Oregon Elevator and Storage Company will be seen at the Paris exposition, where there will be samples from all the wheat-growing regions of the world.

ONLY ONE BODY ARRIVED.—The body of Edwin Hampton, first member of the regiment killed in action, General Sumner and several ex-members of the regiment were at the depot to receive whatever came for the return. They were met by a comrade buried in that long-gone with-out a prayer to God for the home that went with a breaking heart. Here they have laid the flowers of the home country on him as we laid the wild ones some time ago. Let them be the symbol of Hampton's life.

SUNDAY IN THE PARK.—Several hundred people enjoyed the fine weather yesterday by rambling around the City Park. Everybody who had a camera or kodak took it along with him, and so numerous were the black boxes that five of them were seen leveled at the fountain at one time. Another object that was frequently photographed was the owlhouse, just above the drinking-place. The owl sat at the window and appeared glad to have their pictures taken, but they said nothing, and continued to look wise. The view to the east and

THE PORTLAND POSTOFFICE.—The sale of seats for the engagement of Emma Nevada, Thursday night at the Metropolitan theater opens this morning at 10 o'clock. Telephone calls will be attended to as soon as the line is broken. Many inquiries concerning the sales have been made at the theater during the last few days, and the indications are that the house will be packed.

THE PALATIAL OREGONIAN BUILDING.—Not a dark office in the building! Absolutely fireproof, electric lights and artesian water; perfect sanitation and thorough ventilation. Elevators run day and night.

THE OREGONIAN PUBLISHING CO. IS NOW EQUIPPED FOR DOING FIRST-CLASS. Also... DESIGNING AND ZINC ETCHING. SAMPLES... of Work and Prices upon Application.
