IN HONOR OF VICTORY

PORTLAND BRITISH TO REJOICE TONIGHT AT THE ARMOY.

All English and Scotch Societies Join in a Call for Expression of Patriotism.

British residents of Portland will celebrate at the Armoiy this evening the success of their nation's arms in South Africa. The spirit of jollification of which the world has read so much through the dispatches from England and her colonial possessions since the double triumph of Generals Roberts and Buller, has been strongly echoed in the Portland circle of British residents. Yesterday several prominent members of local British societies took up the work of arranging a happy programme, in which all might join to express common joy. Speeches and music by competent persons in both lines of entertainment will be served to all guests.

made to pay a license, although they have heretofore kept 100 gallons or more in stock. As it is deemed proper that dealers in coal oil should pay a small license, the only way of getting around this will be to amend the law so to require persons keeping 100 gallons or less of coal oil in stock to pay a license of \$3 per quarter, and this will probably be done when the council meets to the license officer. License Officer Beach has failed so far to collect license from a man who looks after the distribution of Schlitz beer in this city. He denies that he sells any beer, and says he attends only to distributing what is sent here among the dealers who have ordered it. Another snag Mr. Beach has run against is that he takes orders for liquors, New York, by whom the orders are filled. This agent asserts that he does not sell the liquors, but he comes so near doing that this a legal opinion is necessary on the case, and Mr. Beach has referred the matter of agents or distributors to the City Attorney for his opinion.

"The Countess Guek" one of the brightest and most enjoyable comedies in the repertoire, will be the attraction, and the welcome it has received is assurance that it will prove popular with the matinee-goers. CANADIAN LOGGERS COMING

Many of Them Will Be Employed in Oregon Forests.

The present demand for loggers indicates a scarcity of men for logging camps on the Columbia and tributaries this Summer, and a leading employment agent is arranging to bring in several hundred workmen from New Brunswick.

"In that portion of the Dominion of Canada," he said yesterday, "ages for three months and never get a month and board, and when these men hear of the prices paid in Oregon and Washington logging camps, they prepare to change locations. The present wages here range from \$35 per month and board to \$45, and if a man is a good feller he can earn \$20 to \$24 a day.

Back on the Atlantic Coast, logging is pursued only while snow is on the ground, but out here logs are moved in the woods all the year around. The introduction of railways and donkey engines enables Oregon loggers to bring their timber to the water's edge at all seasons of the year, and as ice never forms sufficiently to prevent the transportation of rafts, logging may be considered a business that is seldom if ever suspended on account of the weather.

"This Summer a great many men will leave the logging camps for Nome and the Yukon Territory fields, and a few logging camps are to be started and old ones enlarged, a real scarcity of hands will result unless help can be obtained from outside sources. The New Brunswick men, who signify their intention of coming out here, are a hardy set of descendants of the English, Irish and Scotch who are engaged in the woods, and these are the people to succeed in the soil and take the wild nature of it.

"Laboring in our logging camps is the most profitable of all the unskilled occupations, and is considered a business that a man wants to be in, and he is enabled to save the bulk of his wages. He can therefore clear several hundred dollars a year, and if he desires can spend the rainy season in Portland and live very comfortably. Most of these New Brunswick people, however, are sober and industrious, and they will put in their spare months improving their new homes in the woods."

DECLARATION OF PRINCIPLES

New Association of Lawyers Make Public Its Demands.

The Multnomah Republican Bar is the official name of the organization of certain lawyers in this city, and it is in judicial reforms mentioned in yesterday's Oregonian. Last night a meeting was held, and the following declaration of principles was adopted by the organization:

"The objects of this organization are to advance and disseminate among our members and the bar generally the principles of the profession and to prevent the prostration of said profession by any of its members in the seeking or soliciting for business in any manner or by any means of the same by means of political or official connections; to secure a just, fair and honest administration of the affairs of our city, county and state, and to use our best endeavors to prevent the diversion by our county or city officials of the moneys collected or realized by taxation or otherwise, except as by law allowed; to prevent the illegal draining of our city and county or any of their departments by any one, and especially by any member of our profession, for the purpose of profiting for or assisting such a party or parties that honest men only be urged or nominated as candidates for the offices to be filled from the ranks of our profession; to assist in the enactment of good laws and the enforcement thereof, and to promote economy in the administration of our government and affairs."

SHORT ROUTE TO NOME

PORTLAND HAS THE ADVANTAGE OF 300 MILES.

With the Rush to Fresh Gold Fields, New Opportunity Offered for Increased Trade.

Other cities may owe their position to the enterprise of the citizens or the combination of transportation lines. Portland is the metropolis and principal seaport of the Pacific Northwest by the grace of God. For herself she has done that which she should have done, and left undone that which she should have done. So situated as to be the natural center of the Alaska trade, she left it to Seattle, which has fattened there, and left undone that which she should have done. So situated as to be the natural center of the Alaska trade, she left it to Seattle, which has fattened there, and left undone that which she should have done. So situated as to be the natural center of the Alaska trade, she left it to Seattle, which has fattened there, and left undone that which she should have done.

It is time that Portland took account of the situation. The entire Alaska trade belongs to her by right of location and natural advantages. She has but to make her own effort to secure the trade for herself. She should make this effort and make it now. The Klondike boom is over. It is not improbable that other Alaska booms will follow the same course. The Klondike boom, however, has been a general trade of the country, and to that extent produce permanent results. There are now facing a Cape Nome boom. What will be its extent or how long it will last none can say; there is hardly a probability that it will be over before the end of the present season. The Klondike boom was a passing trade, and it is time that Portland take account of the situation. The entire Alaska trade belongs to her by right of location and natural advantages.
