The Town Council of Lakeview ordered an election last night, to take place March 27, for the purpose of suthoriz-ing construction of a system of water

works and an electric-light plant, and to incur an indebtedness therefor of \$10,000. The mail route between Paisley and Silver Lake, in this county, is now giving

the citizens more trouble than ever. The contractor is fulfilling his contract to the etter. He has taken off the stage and is carrying the mail on packhorses. Here-tofore he has carried passengers and freight and packages and left mail at the

BAKER COUNTY TAXES

amount to Be Collected This Year Is \$125,000.

BAKER CITY, Or., March 11 .- The County Court has turned over to the Sheriff the warrants for the collection of taxes. The books have been open since March 1, and but few so far have paid

their taxes, the greater part of the taxes of the county being always paid during the month of April. 'The amount of taxes to be collected this year is \$125,022 al. The rate in the city is 54.50 mills, and that of the county, exclusive of specials, 35.65 mills. The levy for both the city and county this year is about 6 mills higher

than the previous year. This is due to the action of Multhomah County here and a long of about \$11,000,000 of state tax, which must be made good by the other counties in the state. The increase in of which assays \$12 in goid, \$12 in silver and

thers equally as good. Four new min were put on a dividend paying basis dur-ing the last year, and it is safe to say

that at least 12 more will be added to the number within the next 12 months. The ores of the district are free gold. which are reduced by stamp mills and the base ores are concentrated and the concentrates are reduced by cyanide rocess, which enables mineowners to treat their ores all at their own mills. The gold output of the miner of the Granite district was about \$400,000 for the year 1599. With four new mills added to the list of producers, it is a safe esti-

mate to place the output of 1900 at \$1,000,-000, and the 12 new properties above mentioned that are preparing for new machinery during the coming season, when in full operation will quadruple the out-

put of 1900. The properties which now have mills and the 12 now ready for machinery only constitute about 3 per cent of the par-tially developed mines and prospects of the district and the prospected territory.

In regard to the unusual proportion miners suffering from various ailments of the eyes, Mr. Dobson says the dim can-dle light by which they are compelled to labor is one cause, as particles of rock and dirt are continually flying into the eyes. Sometimes these particles can be removed by a companion without much difficulty, but in a majority of cases the rock or earth is permitted to remain under the cyclids, causing inflammation, if not ultimate loss of sight.

This morning he received a letter from a prunegrower at Ontario, Mal-heur County, stating that he intended to plant 200 acres in addition to his orchard already growing, in view of the assured prospects for a better market by the co operation plan. Mr. Galloway is now confident that 75 per cent of the growers of the Northwest will be secured to enter into the plans of the co-operative organi-zation. Mr. Galloway said:

"Our plan was adopted from the one which proved so successful under the man-agement of the California Association.

During the season of 1886, California ex-ported direct to Europe less than 6,000,000 pounds of dried prunes, while in 1899, under the co-operative plan, 22,000,000 pounds were exported by December 31, and it is believed that the total exportation by the time the season closes will be 24,000,000 pounds, or 1000 12-ton carloads. There are

die-class people, who want our cured prunes at a price which they can afford to pay. By the plan of bringing the producer and consumer into closer relations, we can profitably supply the consumer with dried prunes at much less prices than they are now paying.
