COMMERCIAL AND FINANCIAL NEWS

There is yet a prospect that the timehonored prophecy, "we are bound to have cold weather yet," may come true, but the their eyes out for mohair at the present chances for it are daily becoming beautifully less. With nearly all the farmers in the field, there naturally is an easier since last week, and from present indicafeeling in some lines of trade, but com- tions the usual pooling methods will prepared with the same period last year, business to date since January 1 shows a large increase except in a few lines, which would have moved better had cold weather been prolonged a few weeks. During the past week there has been a stendier market in wheat, hops, veal, pork. eggs. chickens and livestock with wool holding its own. The most apparent weakness in the produce markets is in potatoes, which are dun at about the lowest prices of the season. Butter is also weaker on increasing receipts. Fruits are still plentiful, a carload of apples, another of bananas, and several cars of oranges arriving within the past few days. Garden truck from California is quite plentiful, and hothouses at near-by points are turning out considerable lettuce and other early vege-

WHEAT-The wheat market is still bumping along on the bottom, occasionally hitting a high place and taking a slight rise, only to tumble back on the other side. The Portland market is perhaps more erratic than any other on the face of the earth, and the prices paid when some of the dealers are out for wheat bear but slight relation to the values ruling in the rest of the world's markets. All sorts of prices are reported, and it is a difficult matter to secure a quotation that will retain its accuracy more than 15 minutes. The export value, based on what charterers would like to pay, but which shipowners will not accept, is in the neighborhood of 53 cents per bushel for Walla Walla, and in order to make things interesting, 54 and even 55 cents is frequently paid where the wheat is wanted for a special purpose. Naturally no great amount of wheat could be unloaded on the Portland "farmers" at the top price quoted, as there are no ships in port that have not been taken care of and the limited number which will be coming along in the next 60 to 90 days will not carry such a wast amount that it is necessary to pay much more than export values at the pres-

The flour demand from the Orient has been very large thus far in 1900, and a great deal of wheat has passed through the mills. Ships have been so scarce that had it not been for this demand the business would have shrunk to very small proportions during the past few months.

Valley wheat continues to drag more than Walla Walla. As there has been less than 400,000 bushels of this variety exported since the season opened last July, will be seen that the movement per month has been so restricted that it was hardly worth bothering with, where it had to be divided up among half a dozen firms. This difficulty in securing a cargo has had a detrimental effect on the price, and were it not for the milling demand the Valley farmer would have been wors off than his east-of-the-mountain brother. This week prices are nearer on even terms with Walls Walls than they have been for a long time. As high as \$55 and \$4 cents has been paid for some choice Vailey, and the ruling quotations are around IZ and M cents. The European situation is thus reviewed by Broomhail, under date

Dull, rainy weather has generally conthrued to prevais throughout the United kingdom. It has been possible to do very little in the way of preparing the land for apring seeding, and it is much to be hoped that dry, bright weather will soon set in and continue for some weeks. The young prises is creating an additional demand wheats are said to be going off

Easy and declining markets have con tinued to be the order of the day since we last wrote in this column, but we must make an exception in favor of curfent month delivery in Liverpool, which tions of tenders on the score of deficient quality; also the Paris market is again moving upward after a charp drop, improvement there being caused by un-favorable crop weather.

The general disposition today must still be ascribed to the influences which we mentioned last week, viz., large supplies coming forward in Argentina and North movement to some extent, but the effects of this influence so far is more noticeable in France than in this country.

.The total shipments to Europe last week smounted to nearly one million quarters, and this cannot be called anything but a liberal quantity, although it is rather less than that of corresponding weeks last year or in 1838. Argentina is shipping very freely, and there are some indications of an increased movement from North America, where primary receipts are larger and the visible supply increasing, the latter being most unusual at this advanced period of the season. In farmers' hands, too there are large reserves, Mr. Snow esti-mating this wheat at 164,000,000 bushels, or the largest on record except in 1898. From these sources of supply we may ex-pect good quantities of wheat during the coming months, but on the other hand India will supply nothing, and, lastly, we have to consider what Russia is likely to do. That the movement from the chief European shipper is bound to have an important influence on the course of the market is self-evident, and we may here say that it is almost a certainty that in latter part of this season the Rus sian shipments will not be supplemented by Roumanian and Bulgarian quantities, except to a small extent only. If Russian growers and holders conlinue the policy they have pursued hitherto this season, and refuse to sell either because wheat is really scarce or because they will not sell at current rates, then it is evident that an unusually heavy demand will be thrown on the Argentine stuff, which should be taken off the markets quickly enough to prevent its becoming burden

POTATOES-The market for potatoes is very weak, and the supply yet to come forward is apparently unlimited. There is still a demand for fancy Burbanks at 60 cents, and even 65 cents is offering, 50 cents is nearer the top, and some watery, low-hand potatoes have sold as low as 40 cents per sack. New potatoes have declined to 2 cents per pound in San Francisco, and their presence in the market will soon be felt by the old stock. There is some demand for Early Rose for seed, and in a small way this variety sells at 75 to 85 cents per suck. Sweet potatoes have been rather scarce, and prices are firm. Onions are inclined to weakness except for the best stock. The local demand takes up the bulk of this grade at prices slightly higher than can be realized for

FRUIT-A carload of apples from India came in Monday, and there has also been fairly good receipts from points in Oregon and Washington. The supply this season seems inexhaustible, and prices for the latter part of March are much lower than usual. The best in the market are selling at \$1 75 per box, and from that figure down as low as \$1 per box. Oranges and lemons are still plentiful, and prices

Spring farm work is on again this week | are reasonable. A car of very fine bahanas in full blast, after a short let-up occa- arrived Monday, and found a very good sloned by a few days of rainy weather. market, although some of the stock was a shade riper than was desirable.

WOOL - The woolbuyers are keeping time, and this clip will be marketed very soon. There are no changes in prices vail, and the bulk of the clip be sold in a lump. Wool is steady but quiet, and prices are nominally unchanged. American Agriculturist has the following

the wool market: Under present favorable surroundings the coming year should prove profitable ic all engaged in the production of sheep and wool. As shown in our columns the past few weeks, the average price of sheep on farms has gained during the past year, and wool prices have scored positive advances, the strength in the market continuing to the present, with un-dertone one of great confidence. We re-cently touched upon the excellent demand for raw wool from manufacturers in all parts of the country. This makes enormous drafts upon stocks of domestic wools

regarding the world-wide conditions of

and imports of foreign fleeces. In this connection it is interesting to glance at present world-wide conditions, as these so keenly affect values of American fleeces. As shown in the subjoined table, indicating stocks of wool in Europe. it will be seen these were very much smaller at the beginning of this year than at corresponding date for some time past. Just now there enter strongly into this problem of European supplies the serious war in South Africa, which is almost sure to disturb agricultural conditions on the Cape and result in a shortage of the supplies to be furnished by that part of the world. The effect of the series of wide-spread drouths in Australia, in reducing sheep and wool supplies there, has been touched upon in our columns, and it is now estimated that during the coming year the supply of wool from that con-tinent will be 100,000 bales less than the previous year. Argentina has suffered somewhat from drouth, although it is probable that South America can ship out a normal quantity. The latest United States wool clip, as noted in these col-umns November 11, showed a slight gain over one and two years ago, but still away below what may be known as a full crop. It will thus be seen that the various sources of supply do not promise any ple-thora of wool during the coming year. Meanwhile, industrial conditions are favorable to heavy consumption of wool and woolen goods in both Europe and America.

.... 185 225 213 218 192 EGGS-Despite heavy receipts, the egg market continues firm, and prices are holding up around 12 and 12% cents, the

latter for single-case lots. There is a steady shipping demand to interior and northern ports, which have generally been dependent on the East for stock. Eastern legge are now too high to admit of shipment to the West, except for old stock, which is not wanted. BUTTER-The butter market is approach

ing another soft spot. Portland does not take kindly to California botter when the same price is asked that is obtainable for Oregon creamery, but now that the Cailformians have reduced the price, there is considerable of it being sold. This together with the fact that the output of local creameries is steadily increasing, has onused degiers seriously to consider reducing prices 5 cents per roll, and it is hardly probable that it will be much above 50 cents next week. Dairy and store butter are also week, although the starting up of many logging camps, railroad camps and other industrial enter-

for this cheap butter, POULTRY-Chickens are very scarce and choice stock is bringing the best prices that have been paid this season. Some fancy coops of old hens sold yesterday at \$6.50 per dozen, and any good stock was salable at \$5 50 to \$6 per dozen; mixed coops and large roosters selling up to \$5, with hardly anything moving for less than \$4.50 per dozen. There is a larger supply of brollers in the market than usual, and prices are not as high as they usually are for the first spring chickens. Good-sized stock sells at \$5 per dozen, and America. The continued wet weather in Western Europe is checking the downward sells at \$5.50 per dozen. Ducks, geese and comething a shade larger than "peepers"

turkeys are quiet at unchanged quotations.

NEW YORK STOCK MARKET. Confident Buying of Railroad Stocks

Inspired Strength. NEW YORK, March 21.—There were impresstive elements of strength in the stock market
today, due to the large and confident buying
of some of the railroad stocks. The market
and ribs shorts covering, but lost the advance,
and ribs shorts covering, but lost the advance,
and ribs shorts covering, but lost the advance,
and ribs shorts covering, but lost the advance, not very broad, the demand being restrictod to comparatively few stocks, and there was not much evidence of what is called in Wall street public interest in the stock market. Toe buying was undoubtedly based, however, on he expectation that the public will shortly some into the stock market. It is contrary to the custom of this outside public to come in and buy stocks when prices are at an invitingly low level. They wait until a rise be in full progress, and apparently the present movement has been inaugurated with a view to afford an bject lesson increasing values.

The price movement today was actively ma-sipulated and was carefully nursed. It was based primarily upon the generally prosperous condition of businers, the high level of railroad surmings, which is being maintained, the symp-toms of an early relaxation in the money mar-ket. While the movement thus far is confined to the taking on of stocks by wealthy profes-sional operators or by lasiders in the various properties, it is to be remembered that such a movement is a necessary forerunner of the breader and more comprehensive advance which comes with an active speculation. The revension of the Third Avenue Railroad

to the strong hand of the Metropolitan affords not a little relief to all circles in Wall street, as not only removing a daturbing influence from the stock market, but business circles generally. The speculative movement of today has its basis in the relief afferded by this de-partment in Third Avenue affairs. The shorts in this speck spent another bad day, the price running up to 112, and fluctuating between that and 100. The other local stocks were active, but showed a notable tendency towards elapse later in the day.

relapse later in the day.

The convincing evidence that Third Avenue stock is cornered leads to diligent efforts on the part of the bear operators caught short to effect a private settlement. The possibility of buch a result makes the professional traders timid and cautious about operating in the stock, after the recent violent advance. There was a disconsider to refrait from eather. ras a disposition to refrain from active opera-lons elsewhere in the list while Third Avenuwas going through its erratic changes. It was after the stock had become rather quiet that he aggressive demand developed for the Parifics, including Missouri Pacific, South

Western.
Baltimore & Ohio and Union Pacific were easily the leaders of the movement, the former advancing an extreme 4% and the latter 24. There were sharp gains in the active stocks, including Wheeling & Lake Eric, Great Northern preferred, Chicago Terminal Transfer, Min-neapolis & St. Louis and a few others. London bought stocks here liberally, and sterling ex-change cased off as a result. New York ex-change at interior points was rather easier, but the local money market showed no hardening tendenor. tendency.

Dealings in bonds were small and price to no one.

The Metal Markets. NEW YORK, March 21.-Business was slow

in the metal market today. Cables were about as expected. Locally tin reacted a partial 12% points from restorday's decline, ruling steady all day. Pig-iron warrants, quiet; Lake cop-per, \$16.50; tin. \$31.85-902; speiter, \$4.509 4.00; lead, unchanged, \$4.675,984 72%. The firm that fixes the selling price for miners and smelters quotes lead at \$4 45 at the close. But

SAN FRANCISCO, March 21.-Bar silver

LONDON, March 21 .- Bar stiver, 27 11-16d. Boston Wool Market.

BOSTON, March 21 .- The American Wood and Outton Reporter will say tomorrow:
"There has been more inquiry for wool during the week under review and the tone of the market is rather steadler. There has been n advance in prices, but the downward tendence in values appears to be temperarily arroste at any rate. The market seems to have extile upon a basis on which actual business can be consummated to some extent, and the genera feeling pervading the trade certainly more hopefulness and confidence. N amount of business has been done, h and if it were not for a large eale of 1,000,000 pounds reported by a certain well-knownshouse, the business of the week would foot up a pretty small total. On the average there has been a decline of 5674, per cent on domesti wool from the top edge, touched by the market inst November, but for the time being the market is in a steady position as to prices. "The raice of the week in Boston amounts to 3,607,600 pounds demestic and 588,000 pounds foreign, making a total of 3,585,000 pounds against a total of 1,507,600 pounds for the pre-vious week, and a total of 2,390,300 pounds for the corresponding week last year. Sales since January I amount to 35,003,000 pounds, against 41,066,500 pounds for the corresponding time last year."

Foreign Financial News NEW YORK, March 21 .- The Commercial Ad

today, and buying was more ragged with the movements fregular, although the close was firm. Americans were active and strong, Lon-don buying freely, particularly Baltimore & Ohio, which New York holsted a dollar, and further in the street, Atchison preferred was the soft spot on rumors of pool troubles. Paris advanced Pintos to 55 5-16, but they relapsed to 54%. It is rumored that there will be a smaller dividend than recent expectation. No gold was shipped or received. Calls were only in fair demand. About half the sum due the bank was repaid. Bills were more plentiful and active.

Coffee and Sugar.

NEW YORK, March 21.-Coffee options close steady at 5 to 10 points higher. Sales, 11,000 spot Rio, irrogular; No. 7 invoice, 81483%; No. 7 jobbing, bree Sige; mild, quiet; Cordova

The Albany band is rehearsing for the summer campaign.
