HIS FRIENDS MADE SMALL EFFORT

Of the 101 Delegates Elected in Sa lem, but 15 Are Conceded to Be McBride Men.

SALEM, Or., March 21.—The Republic-an primary election in Salem today was practically a clean sweep against George W. McBride for re-election to the United States Senate. The four Salem precincts, together with the six adjoining precincts known collectively as the 10 Salem precincts, elected 101 delegates to the county convention. The best estimate in favor of McBride tonight is that possibly 15 of his friends will get seats in the county con-vention from the Salem precincts. Of vention from the Salem precincts. Of these 15, it is said that at least nine agreed, before being placed on the slates, not to support McBride for re-election. The total number of delegates in the

convention will be 256. Salem, No. 2, McBride's stronghold. 18 delegates were elected. A leading Re-publican worker, who is taking no part in the fight against the Senator's re-election, said tonight that the McBride Legislative slate could not get a single vote out of the 18, unless an attempt should be made to piedge a Legislative

slate in favor of some other candidate.
So far as McBride's friends are concerned, the election went by default.
There was only one siste in each precinct, with the exception of Yew Park, where there were two. Some of the prominent McBride workers did not go to the polls, and in no case was there an attempt to elect a McBride slate in the face of the opposition. Englewood, with 12 delegates, is claimed by some to be half McBride, though this is denied. There was no op-

position to the slate presented.

In Yew Park, where two slates were in the field, George W. Davis, a supporter of both Tongue and McBride, was on one of the slates. The fight was made on him and he was defeated with his ticket, by a vote of 26 to 36. Although the county precincts have not

all been heard from, it is generally stated by political workers in Salem tonight that there is no chance of a McBride Legisiative slate being nominated.
