Dr. Slocum, the famous scientist, whose lectures and demonstrations in New York and London this winter have astounded medical circles, has at last perfected his new system of treatment for the absolute cure of tuberculosis and all pulmonary diseases.

This triumphant victory over the deadly bacilli is far-reaching in its ffects, for there is no longer room for doubt that the gifted specialist has given to the world a boon that will save millions of precious lives.

Dr. Slocum's System of Treatment is both scientific and progressive, going as it does to the very source of the disease and performing the cure step by step.

FIRST STEP .-- Killing the life-destroying germs which invest the ungs.

SECOND STEP .- Healing the raw, inflamed mucous surfaces which are favorable to germ growth.

THIRD STEP .- Toning the entire system and strengthening the nerves filling the veins with tingling new life.

FOURTH STEP .- Building healthy flesh and fortifying against future attacks.

The Slocum Treatment is revolutionary because it provides a new application for every stage of the disease. The failures of inoculation by Paris scientists are overcome by Slocum through progressive drug force. The diseases leading to consumption are also mastered so that once the acilli are removed from the lungs there remains no other germ-breeding menace

The Slocum System cures grip and its baneful after-effects, dangerous coughs and colds, catarrh, bronchitis and every known form of pulmonary disease.

It makes weak lungs sound, strengthens them against any ordeal, and rives endurance to those who have inherited hollow chests, with their long train of attending dangers.

To enable despairing sufferers everywhere to obtain speedy help before too late, Dr. Slocum offers
