

COMMERCE AND FINANCIAL NEWS

Yesterday was steamer day, and the produce and commission houses on Front street enjoyed a thriving trade in distributing garden truck and fruit from California. There was a somewhat considerable rain last night and this has interfered with the shipment of new potatoes and new onions, there being some on the steamer just arriving. There were a good business of nearly all lines yesterday, country orders coming in from freely than usual for the close of the month. There were no changes of importance in prices, although there is another firm and poultry is cleaning up about as fast as it comes in. The grain markets are easy, with prices nominally unchanged.

which are subjects of teaming rumors of prospective combinations or consolidations. The determined firmness of sugar and its buoyant up-turn had a sympathetic effect on the market. The movement is still attributed to the demand from abroad, but the many assertions of favorable developments in the trade war may have had their effect. A number of unusually favorable railroad statements also had a strengthening effect on the market. Increases in net earnings for March were reported in principle, although there is another firm and poultry is cleaning up about as fast as it comes in. The grain markets are easy, with prices nominally unchanged.

The wheat market yesterday laid the greater part of the strength which was apparent on Wednesday, and prices were off all round. In the local market there was the same inactivity that has characterized a prominent feature of the market for the past few weeks. Fifty-three tons were offered for Walla Walla wheat, but a cent more was offered for some heavy stock for milling purposes. Wednesday's strength in the market secured holders back on the perch again, although there is another firm and poultry is cleaning up about as fast as it comes in. The grain markets are easy, with prices nominally unchanged.

Foreign Financial News.
NEW YORK, April 26.—The Commercial Advertiser's London financial cablegram says: The markets here were quiet today, but there was more investment business. The bank return caused a firmer tone, although the close was rather unsettled. Consols were fractionally higher, and the war loan touched 114 1/8 premium on strong buying, finishing at 115 1/8. Americans were inactive but cheerful, being made hard here, despite the absence of Continental support. New York responded, and the close was near the top. The features were Baltimore and Ohio and Wash. bonds, the latter on a quarterly basis. Coppers were again wanted at a quarter off. The London bank loan touched 470,000 gold to South America, and bought 400,000 in German coin. The fall in sterling exchange reduced the talk of American exports, but it is reported that gold is going out soon from London to Paris. Call money was firm at unchanged rates, and bills were harder and fewer were offered. The bank renewed the few sums due, and also lent slightly, besides doing a moderate business in discounts. The bank return shows a rise of \$2,500,000 in public deposits, merely representing bankers holding back funds for the end of the month and the war loan call of 10 per cent on Thursday.

Chicago Grain and Produce.
CHICAGO, April 26.—The corn market opened erratically, because many had expected a rush of orders, in place of which only a few scattered orders were buyers. A broad general demand developed at the start, and the price went up on the jump, longs, shorts and traders buying and selling only 10 or 15 cent, but having some corn. At the top the demand slackened, and in proportion the offering increased. The cash business was poor, and New York received only 10 or 15 cent for export—a poor showing in comparison with recent export business. Under these conditions the market proved to be rather dull, its early gains and the result was a weak close. July from 41 1/2c to 40 1/2c, closing depressed at 40 1/2c. The market for wheat was 148 cars. Trade early was characterized by great activity, but in the latter part of the session the animation was much less marked. In the declining market the price of wheat was felt at the cables, which did not reflect the advance here. In addition to this the weather was reported perfect, and the crop prospects good. With these facts in mind, the beginning of trade saw the market easy and depressed. The corn strength, however, was felt almost immediately, and under the influence what rallied, shorts covering freely. The cash business was very slack, and the trade in futures most of the time quiet. With the latest bearish break in the wheat market followed, early buyers selling out. The close was weak. May ranged from 60 1/2c to 60 1/4c, and closed 60 1/4c. July opened at 47 1/2c and declined to 47 1/4c, closing at that figure. Oats were steady at one time, but finished weak in sympathy with the wind-up in corn and wheat. The market for wheat had a strength in corn and wheat, this market responded very heavily. The cash demand was reported good, and wheat advanced a few cents, but the market was not strong. Local receipts were 132 cars. May ranged from 23 1/2c to 23 1/4c, and closed 23 1/4c. July ranged from 23 1/2c to 23 1/4c, and closed 23 1/4c. The leading futures quotations are as follows:

THE METAL MARKETS.
NEW YORK, April 26.—Trading in the market for metals was not very active. The market, however, continued generally weak, owing to the unprosperous cables and the overproduction of iron. Tin in London was 10c lower, this, together with the falling off in consumption, causing prices here to ease off materially. Lead continued dull and nominal. Copper fell but steady here at fully sustained higher. Pig-iron warrants continue weak and nominal. Northern No. 1 foundry was quoted at \$21 1/2 per ton. Lead continued dull and nominal. Short clear steel—head, \$7 50 per ton. Butter—Firm; creamery, 13 1/2¢/17 1/2¢; dairy, 12 1/2¢/15 1/2¢.
Eggs—Firm; fresh, 19¢.
