Quarantine May No. He Raised fo Six Weeks-In the Infected

SAN FRANCISCO, May 30.-The City Board of Health today held an autopsy on the body of a Chinaman found last night in a Chinese undertaker's establish-ment. A member of the board stated that the result of the autopsy strongly indicated that the Chinese died of the bubonic plague. In order fully to demon-strate whether or not it was a case of plague, cultures were taken from the

plague, cultures were taken from the glands for the purpose of making an animal inoculation. Dr. Shrady, of New York, assisted in the autopsy. Dr. Kellogg, bacteriologist of the Board of Health, was asked if the case was similar to the nine already reported. He said:
"No, it is not. In fact, we have not yet had two cases alike, and this last one is different from any of the former cases. It has not yet been verified, but all indications point to the conclusion that it is cations point to the conclusion that it is another case of plague. We shall use the same test as in the others, and after the cultures have sufficiently developed, will inoculate a number of animals with the bacillus. That is the only infallible test. According to Dr. Williamson, president of the Board of Health, the cordon around the skirts of Chinatown may continue for

things being equal," said he, "we might feel justified in raising the quaran-tine in six weeks—that is to say if the eleanliness of the district is such as to preclude the possibility of infection re-maining in the various habitations of the Chinese and others living there."

The doctor then referred to the deduc-

tions of Dr. Shrady, of New York, whom he gescribed as "one of the most eminent specialists in the United States." Dr. Shrady has not only indorsed the action of the Board of Health, but has stated that every death reported by the board as having resulted from plague was ac-curately reported by the board's bacte-Dr. O'Brien, who has charge of the force

Dr. O'Brien, who has charge of the force inspecting the Chinese district, was asked if any cases of resistance had been met with by the inspectors on their rounds. "Only a few," said he. "The doors were barricaded in some instances, but as a rule, the Chinese have offered no stubborn resistance. They are rather inclined to yield to the wishes of the inspectors, and

in a few days we expect that all trouble in this respect will have passed."

The mail service in the Chinese quarter will not be impaired. A fumigating sta-tion has been established, and everything passing out is treated. This morning there was great activity along the ropes that surrounded the quarantined district, and the Chinese had to resort to many de-vices in order to obtain their supplies of food. As market time approached, nu-merous butcher wagons and delivery carts from grocery houses drew up along the line, and Chinese, laden with pork and other eatables, were soon engaged in fer-

other catables, were soon engaged in ter-rying the supplies to the quarter.

The Chinese merchants are preparing to institute legal proceedings against the Board of Health to compel that body to lift the embargo. The Chinese, they say, would be willing to sid the health officials if an epidemic existed, but, knowing that such is not the case, they refuse to subsuch is not the case, they refuse to submit to being shut off from the outside world without at least some show of re-

The quarantine is being rigorously orced, 159 policemen being detailed maintain a cordon around the district bounded by California, Kearney, Mont-gomery avenue. Broadway and Stockton streets. The parts of blocks fronting on California and Kearney streets are not included, as they are occupied by whites. Ropes are stretched across the streets, and the Chinese are closely hemmed in, even the secret extra through some blocks being closed against them.

The Asiatics took the quarantine stolc-ally. They had warning of what was coming, and many left the district before the arrival of the police. The proportion of those who fled was small, however, and there are thousands behind the lines. All whites in Chinatown were allowed to pass out, but people outside the lines are not Many teamsters were caught being warned that they

could not re-enter.

The Sacramento and Clay-street cable cars are permitted to pase through the quarantined district only on condition that the passengers go inside the cars beallowed to get on or off the cars in Chinatown. Another condition is observed by the railway men in fumigating the cars at both ends of the line.

GERMAN MEAT BILL.

DELAGOA RAILROAD AWARD

State Department Will Probably Ac cept the Verdict.

WASHINGTON, May 20 .- It is proba that the State Department will accept the result of the arbitration in the Delagoa railroad case. The McMurdo heirs, the only American claimants against th Portuguese Government, are very much dissatisfied with the outcome of the arbitration, which reduced their allowance from about \$1,500,000 to an insignificant fraction of that sum. Naturally, they are anxious that the United States Govern ment should refuse to accept the arbitra-tion. But the British Government, repre-senting a very much larger claim in th-same arbitration, so far has shown b sign of a disposition to reject the verdict, and as it would be an unparalleled action for one party to an arbitration to rejec the conclusions, the United States Gov ernment must accept the findings of the Swiss arbitrators in this case, though additional duty of 10 per cent on all matisfied of the Inadequacy of their almports from Germany in the event of the lownnes. DIAMOND JUBILEE CAPTURED THE ENGLISH DERBY STAKES.

Equaled the Record Time-American Turf Events-National and American Lengue Scores.

LONDON, May 30,-At the second day's acting of the Ersom Summer meeting to-day, the race for the Derby stakes was was by the Prince of Wales' Diamond Jubilee, in 2:42. This equals Persimmon's time, which is the record for the Derby. In the paddock prior to the big race there was a brilliant gathering. Diamond Jubilee was the center of attraction, and continually increased in popularity. As the horses paraded, the Prince of Wales left the club enclosure and stood on the course, raising his hat in response to the greeting to Diamond Jubilee as the colt

led the procession. The present generation will never efface the scene when the Prince of Wales' Per-simmon captured the blue ribbon of the turf, but today's demonstration, when

formances on the running track were very creditable, and in two instances French records were broken.

In the 800-meters handicap, the record of which, 2:01, has been held by M. Solhat, of France, since 1886, H. P. Smith, of Yale, chipped four-fifths of a second off the record. John Bray, of the New York Athletic Club, beat the other French record—i minutes 19 2-5 seconds, for 1800 meters—by 1 2-5 seconds.

Of Spring and Summer Treatment in Catarrhal Affections-Its Supreme Importance to Those With Enfeebled Constitutions, Weak Lungs and a Tendency to Consumption

\$5.00 a Month All Medicines Free \$5.00 a Month

The lesson to those with enfeebled con- | SEVERE STOMACH stitutions, weak lungs or a tendency to bronchial trouble or consumption, of the vital opportunities that Spring and Sum-

mer offer them. The best teaching is the teaching that will save the most lives.

And this lesson to those with the slight-

est predisposition to consumption will save ore lives than any that can be taught. In the Spring and Summer catarrh may be more speedily cured; with Nature helping the work, the result is more certain; after the cure the constitution resumes its normal condition more quickly; those so feeble that they should not even expose themselves to the weather during the Win-ter may visit the offices, and are helped in the progress of treatment rather than in-

jured by the exposure to outdoor air.
This is what the opportunity of the
Spring and Summer months means.
Indeed, with many of the more serious cases—where long-neglected catarrhal dis-eases invading the bronchial tubes which convey the air to the lungs, has taken its advance into the tissues of the lungs themselves, has reached the end of the road lined with the mucous membrane upon which it lives and feeds, and finding no new tissues settled down to feed upon the lung cells—with many of these serious cases, treatment durang the Spring and Summer months is the only hope. Little if any help can be promised them during the Winter. It is, then, during the Spring and Sum-

mer that catarrh in its early stages, in volving, maybe, the masal passages and throat and vocal cords and windpipe, may be most speedily cured, and the danger of its extension into the deeper part of the pronchial tubes or lungs averted

Mrs. A. H. Mnegly, 455 Fifth Street, Portland: Our little daughter Monta was seriously affected with catarrh of the head and throat. Her whole system was affected. She could not breathe through her nose. She was pale and weak, and al ways tired and exhausted. Drs. Copeland Captain W. H. Foster, of the

Albina ferry, residing at 439 Goldsmith street, Portland: When I began treat-

ment at the Copeland Institute I had long been a sufferer from catarrh of the head and stomach. I could not eat or sleep, and hed lost 20 pounds. I am now in good Mrs. J. P. West, Scappoose, Or.; When our son Wilfred began treatment at the Copeland Institute his condition was very serious. He had a terrible, racking cough. He had no appetite, and had lost flesh and strength. We had grave fears his lungs were affected. Now he

TROUBLE AND CATARRH.

Mr. Harry Caldwell, Oregon City, Or., employed at the Willamette Pulp & Paper Company's mill: "Until a year and a half ago I was strong and well, enjoying the best of health, and never an ache or pain. Then my health began to fail. I consulted a physician and took his medicine right along, but

Kept Getting Worse. "I had headache, and at times would be so dizzy that everything swam and whitled before me. I lost all relish and natural desire for food. For days I ate hardly enough to keep me up. At other

times I would eat ravenously, yet would not feel satisfied. Everything I are lay like a dead weight in the stomach. It did not digest, but caused bloating and belch-ing of gas, with frequent Attneks of Vomiting. "There was always a soreness in the pit of the stomach and around the waist line If I pressed on the stomach with my hand I would flinch with pain. My tongue was thickly coated, and I had a bad me-

tallic taste in the mouth. I was also

Mr. Harry Caidwell, Oregon City, Or. spitting to clear it out. On getting up in the morning I coughed for some time, and

there was a soreness under the breast bone and through the chest. I Lost 15 Pounds

And my strength was gradually being sapped. I was unable to work and in misost flesh and strength. We had grave ears his lungs were affected. Now he s well and strong.

American Museum Journal. There can be little question that in all of their forms, large and small, they were ravenous and sharklike in their habits. The large Dinichthys was cer-tainly a dangerous neighbor, easily the master of all other kinds of animals livto Even Help.

That they quarreled among themselves is known positively, for a specimen has been taken from the rock whose stout backplate had been completely crushed in two, bearing in its solid bone deep imprints and gashes which fit the jaw-tips of this species. In another case a portion of a jaw was found separate in the rock, with marks of having been broken off during the animal's lifetime. The particular form, Dinichthys, appears to have been nine feet or more in length, but it was by no means the largest member of the family. Titanichthys was probably half as large again, but its jaws were less formidable. Other types of these ancient fishes had jaws which were long and delicate, set with a bristing row of teeth. It may be noted that in all of these forms the mouth paris appear to have been capable of a certain degree of independent movement, so that the tips of the jaws could be opened or drawn together, like fingerng in his time. That they quarreled among themselves is known positively, for a specimen has been taken from the rock whose stout backplate had been

in the middle of the forehead; this may possibly have been occupied by a "pineal eye," which lizards have retained up to the present day.
