

COMMERCIAL AND FINANCIAL NEWS

There was considerable business in the wholesale district yesterday, the country trade being exceptionally good. Receipts of fruit and produce were quite liberal, and in some lines a slight weakening is noticeable. Poultry is dragging this week, and there is an easier demand for pork and veal. The egg market is a shade steadier, and butter is clearing up at quotations. The strawberry market has about struck bottom, and prices yesterday ranged around 30 and 40 per pound for best quality on the streets, with good shipping berries occasionally selling a fraction higher. Potatoes continue firm for good stock, but receipts are increasing again. The grain markets are dull, but there is some activity in wool.

GRAIN, FLOUR, ETC. Sales of Walla Walla wheat were reported here yesterday at 50c for No. 1. At the same time 52c was offered by buyers for future delivery. At neither figure has very much wheat been disclosed, and from present indications these markets will drift without very much doing at this price. The holiday is still on in Europe, and the Eastern markets are steady. Freighters are firm, with no new business reported.
