COMMERCIAL AND FINANCIAL NEWS

Business yesterday was of the usual Monday proportions, and produce receipts were if any-thing lighter than usual. The weather was not allogather favorable for trade, and buyers have apparently watted for the rain to cease falling. The grain markets were firmer all along the line, but business was of small proportions. In the produce markets, the demand for old potatese its about over. New potatoes are down to sie and bide per suck in San Francisco, so there is not much of an opportunity to unload any of the curplus stock of old spuds in that direction. Singularity but raspherries were more pleutiful, and are lower. Eggs were more pleutiful, and are lower. Eggs were more pleutiful, and are lower. Begs were more pleutiful, and are lower. Eggs were more pleutiful, and are lower. The decline at one time averaged from 1 to 24 in a full plus and a lower of the market was classed and the eggs of the week previous.

There was a boom in Chicago wheat yester-day that carried the trade back to the days of the Letter boom. The foreign market is very stubborn, however, and, while futures were up nearly a penny, cargoes falled to re-flect much of the strength that was so ap-parent in American markets. In the Portland market, the influence of Liverpool backward-ness and high freights is preventing the fullest participation in the advance, but dealers are quetting like for No. 1 Walla Walla, with about 1c more possible for choice stock. NEW YORK STOCK MARKET.

A Large Amount of Liquidation a Slight Expense of Values. NEW YORK, June 18.-The stock market d NEW YORK, June 18.—The stock market di-gested a large amount of liquidation today at what seems slight expense of values, consider-ing the appearance of extreme weakness manifested by the market at times. This re-sult was due to the fact that prices were lifted in the early dealings to a level sumewhat above Saturday's close, and that there was a substantial rally in the late dealings on cov-ering by the professional bears, who had taken advantage of the softness of the market to put out extensive short lines. But the weakness of out extensive short lines. But the weaks the market was none the less evident. Buying throughout the day came largely from the short interest, and from inside interests with the purpose of supporting prices in their own

Proparations for this had been made on as elaborate scale in expectation of acute depres-gion on foreign exchanges as a result of Sat-arday's development in the Chinese complica-tions; but the weakness in foreign markets was not as extreme as had been feared, partity owing to the fact that the slarming rumors of the destruction of the foreign learning. the destruction of the foreign legations in Pekin and the death of the German Minister were somewhat discredited in speculative

of American stocks advanced in Lonfore the opening here, and London

rado Fuel were firm. The tone of the market was steady, and the majority of set changes were small. The export of \$2,500,000 gold to Germany was not without its effect on the weakness of the market, and further engagements are looked for further in the week by the French steamer.

The Subtreasury has laken nearly \$2,000,000 to the banks since Friday, and New York exchange at Chicago rose further to 50c premium. But the Government's call for deposits to the

participation in the advance, but dealers are quoting like for No. 1 Walla Walla, with about for more possible for choice stock. Valley is steady at 54935. There is wery little selling, and very little wanted, as it is impossible to get early ships. If crop conditions continue favorable and there should be a good selling inversent a blockade is inevitable.

extreme gravity of the crop situation in the wheatgrowing states of North and South Dakots and Minnesota made a widdly excited opening in wheat. The demand for wheat, especially from the Northwest, was far ahead of any this year. The commission houses were stuffed with buying orders from all sections. There was scattered selling for profits, but this was readily absorbed, and the advance began at the ringing of the grong at 0.20. July opened kippe higher, at 10½ to 75½c, and almost without a check went beoming up to 70½c, be under the high mark last year.

The top was reached half an hour before the close, and such dips as occurred on the advance were comparatively frail. From the pinnacle of its strength July reacted to 75½c, and closed 3½c over Saturday, at 75½c35½c.

The great mass of reports may be briefly summarized as follows: Saturday and Sunday were the worst days of the season for the Spring wheat crop in the Northwest; many, sections in the Northwest will not raise enough wheat for seed; 20,000,000 bushels is an outside rosability for the North Union contents. NEW YORK, June 18, The Times' London inancial correspondent cables: NEW YORK, June 18.—The rimes loaded financial correspondent cables:

The bank reserve is a little better on the week, thanks to the return of coin and notes from internal circulation, but not much. In fact, it is not appreciably stronger than at the beginning of this year, when the bank rate was 6 per cent and the open market was only buying the finest paper affoat in the neighborhood of Tour cent.

od of I per cent. The shipments of gold from New York to Paris encouraged the directors to look for re-lief from the demands for our gold, and the expected receipt of \$500,000 of metal from Russia, known to be on the way, further ancouraged them to take the step. Even without these gold movements it might have been advisable to come down, because the open market had gradually been depressed to a figure fully I per cent below the 3½ per cent Russia, known to be on the way, further

bank rate. Business is not as good in various dire as it was some months ago. Our trade re-turns for the month of May seem to contraturns for the month of May seem to contra-vert this statement, showing as they do in-creases of upward of T per cent on both ex-ports and imports. But that increase is a matter of price only. The volume of business is narrowing, particularly to the east, to South Africa and to some of the routh American

Coal with us continues monstrously dear, and Cal with us continues monstrously dear, and there ought to be an opportunity for the producers of this fuel on your side to open up a market with us, beneficial to both countries. Steam coal is about 40 per cent above the price at which it stood a year ago. With a pause not only in business and in the manufacture of bills of exchange arising from legitimate commission, there is also at the present time a remarkable persistency in the full in speculation upon the stock exchange.

It is not the London market alone that suf-fers. Business between London and New York is still either the importation of bonds by American bankers and investors or gambling

within a narrow compass by professional operators. All the markets are phenomenally idle. EASTERN LIVESTOCK.
