

ON THE AMENDMENTS

Official Canvass of the Vote of Oregon, June 4.

NO CHANGE IN THE CONSTITUTION

Equal Suffrage and Repeating Amendments Got Heaviest Votes—Not Complete for State Officers.

SALEM, June 24.—Secretary of State Dunbar today received the official election returns from Curry County, and now every county has reported the results of the elections. The returns are not complete, however, for the reason that some of the returns have been sent back for correction, and Curry County failed to transmit the transcripts of the vote for state officers. The missing sheet may arrive in a few days. The force of clerks in the secretary's office are busily engaged in tabulating the returns. Thus far only the vote on the proposed constitutional amendments has been ascertained. On these the vote by counties and the total for the state are as follows:

Table with columns: COUNTY, Municipal edness, Judicial met., Irrigation, Repeating, Equal Suffrage. Lists counties like Baker, Benton, Clatsop, etc., with corresponding vote counts.

The majorities against the proposed amendments appear small in some cases, but that appearance is due to the large number of ballots cast that were not marked as to the amendments. A blank vote on the amendments counts a "no" vote, according to the constitution...

The annual closing exercises of the Chemawa Indian Training School began this evening, when Rev. T. E. Elliott, pastor of the Methodist church, delivered the commencement sermon. The final day of the school year will be Thursday next, when appropriate exercises will be held...

Earl Mundell was struck on the head with a baseball while playing at the fair grounds this afternoon. He walked home without difficulty, but late this evening a clot of blood from the forehead, with serious consequences are feared. Mundell is 22 years old, and resides in North Salem.

Opened the Annual Campmeeting With a Joyous Dance. OREGON CITY, June 24.—The annual gathering of the Campmeeting Association began on their grounds at New Era yesterday to continue three weeks. A dance in a hall across the road last night was an opening feature, the electrical program really beginning this morning with a lecture on "The Lights and Shadows of Mediums," by L. C. Bowman, of California, who was the lecturer at the annual meeting last year...

ABERDEEN PAPER SOLD. Wisconsin Man to Take Charge July 3.—Phytia Lodge Reinstated. ABERDEEN, Wash., June 23.—The Aberdeen Bulletin, the Republican paper of this city, has changed hands. The purchaser being James P. Sullivan, of Chipewaut Falls, Wis. The politics of the paper will remain unchanged, and various mechanical improvements are contemplated. Under the terms of sale, publication is to be given to the purchaser July 1.

The formal reinstatement of Wiskahk Lodge, No. 44, Knights of Pythias, occurred last evening in connection with the initiation of a number into the order. Visiting knights from Olympia, Centralia, and Elma, to the number of 35, participated in the exercises and the banquet which followed. The officers of the lodge were elected and installed.

A GOPHER DID IT. Burrows a Hole and Turns the Water Company's Ditch Into the Fields. Yakima Republic. Last Sunday night the ditch of the Water & Light Company broke banks about half a mile above the power-house and flooded the surrounding fields. The break was caused by a gopher burrowing through the bank and giving the

TWO COMPANIES IN CAMP

THOSE FROM SALEM AND WOODBURN SPEND DAY AT BROOKS.

Reminded the Boys of Campaigning in the Philippines—May Go to Dallas for the Fourth.

BROOKS, Or., June 24.—Bugle calls, flash of bayoneted guns, officers' commands and martial tread gave to the boys of the anti-foreigner riots now in progress in China. The development of this feature of modern enterprise in China is described in considerable detail in a recent publication of the Bureau of Statistics, entitled "Commercial China in 1899." It shows that the telegraph system of China included in 1899 about 3000 miles of line in operation, and that the railroad system included 100 miles of road in active operation and over 3000 miles of projected. The telegraph system connected the capitals of the provinces with the national capital, Peking, and in turn connected with the Russian trans-Siberian telegraph line and the ocean cables; but it appears from the recent reports that those lines have in many cases been destroyed by the anti-foreigner mobs and armies.

The railways thus far constructed belong to the Chinese government, and are constructed under its own control and at its expense. They connect Peking, the capital, with Tien Tsin, which lies at the head of the Gulf of the Chi Li, and the national capital, Peking, and in turn connected with the Russian trans-Siberian telegraph line and the ocean cables; but it appears from the recent reports that those lines have in many cases been destroyed by the anti-foreigner mobs and armies.

Washington Teachers' Examination. OLYMPIA, Wash., June 24.—The total number of applicants who took teachers' examination in May amounted to 730, a number about equal to the average for the May examinations. About 600 of the applicants took the examination in some or all of the branches; the remaining 130 applied for certificates upon college diplomas and papers from other states. The total number of successful applicants was divided as follows: First grade, 41; second grade, 22; third grade, 14. The number of applicants failing in their examination was 1,000. One hundred and seventy-two applicants wrote for the purpose of raising their previously earned grades, and 75 succeeded in doing so. The next quarterly examinations will be held August 2-11.

Patents to Northwesterners. WASHINGTON, June 23.—The following Northwestern patents have been issued: Oregon—John B. Kelly, Portland, rotary steam engine, motor, valve gear for steam engines, piston, steam-power cross-cut saw and valve regulating mechanism for saws and other machinery. Portland, separate leaf book, and Corwin C. Coffinberry, Union, plowshare. Washington—Clifford L. Cambren, Walla Walla, saw for cutting wood with whiplike trees; James C. R. A. and W. J. Munro, Sedro, Wolley, grain door; and Henry Romo, Ophir, water elevator for irrigating purposes.

Baker City Notes. BAKER CITY, Or., June 24.—A civil service examination was held here yesterday, conducted by Captain Bartlett Shipp and Carl Jones, of the local postoffice. There were 12 applicants. Joseph Drripp, of Union, who took the examination for clerkship in the Surveyor-General's office. A successful attempt has just been made by clerks and some of the business men of the city to have stores close at 6:30 in the afternoon, except on Saturdays. This has been greatly damaged here, but always failed after short experience.

Shingle Mill and Stock Burned. SEATTLE, June 24.—Donoghue & Robertson's shingle mill, at Smith's Cove, on the edge of the city, was destroyed, entailing a loss of \$16,000. All the stock, consisting of 1,000,000 shingles in dry kiln, was consumed. The mill is a new one, completed in May, and had been running about a month and a half. The origin is a mystery.

Lynn Reife's Body Found. VICTORIA, B. C., June 24.—The steamer Amara, of the British Columbia Navigation Co., was found today, bringing news of the finding of the body of Lynn Reife, who is supposed to be a victim of murder, for which one O'Brien is now held by the police. The last "bring-in" from Dawson district aggregates \$170,000.

Damage to Linn County Wheat. ALBANY, Or., June 24.—Reports from the country are general that the fall wheat has been greatly damaged here, but in many cases it will not be harvested. Spring wheat is in good condition, and if favored with good weather will present a fair crop.

Washington Notes. The Battle Creek, Mich., Sanitarium will establish a branch at Spokane. The Waitburg electric-light plant received a new 300-light dynamo Friday. Sunnyside farmers are irrigating their grass lands for a second crop of hay. A Republican club has been organized at North Yakima with 209 charter members. A Government transport at Seattle is receiving a cargo of hay for the Philippines. The South Bend shingle mill closed down Friday until after the Fourth of July. Spokane mills have advanced four cents a barrel, and give notice of a further increase in price if wheat shall remain as high as at present. C. H. King of Elensburg, is reported to have sold a ton of grain to a Mr. Timothy for \$19 a ton. Last year the opening sale was made at \$9 a ton. The prospects this season are bright for the grower.

By the adjustment of the indebtedness of Kittitas and Chelan counties the latter assumes \$28,000 of the bonded indebtedness and receives \$2500 of the current tax collections. The new county now has a total indebtedness of \$128,000. Probably the largest log ever hauled on trucks in Chehalis County, if not in the state, was taken down Montano's main street last night, and the log was a spruce log, measuring 63 feet in length at the small end, 24 feet in diameter. QUIET DAY IN ST. LOUIS. Labor Union Arranges to Operate Opposition Conventions. ST. LOUIS, June 24.—The day just ended has been the most quiet and uneventful since the great street railway strike began on May 5. Cars were run on all branches of the Transit Company's system without molestation, and carried thousands of passengers. This week will see the force of Deputy Sheriff on duty reduced to 500 men. J. H. Stilson, a motorman in the employ of the Transit Company, died today as the result of wounds received in a riot in South St. Louis, May 25. The Central Trades and Labor Union met this afternoon and received the first report of the committee appointed two weeks ago to appeal to organized labor and its sympathizers for funds to procure conveyances to run in competition with

THE SUMPTER DISTRICT

RICH GOLD STRIKE MADE IN THE SUMPTER GROUP.

Immense Ledger With Numerous Quartz Stringers—Snow About Gone—Prospectors Coming.

SUMPTER, June 22.—The snow is about out of the Greenhorns, and prospectors are flocking in. Many locations are being made, and some are reported to be rich. It will be necessary to verify these reports. Colonel F. V. Drake, of Portland, who is operating some claims in the Sparta district, is at present inspecting the Straburg group, on Olive Creek, in which he is interested. While the Colonel is an ardent advocate of free silver, he is partial to gold-bearing ore, and prefers them free.

The event of the week in the rich ore encountered in the cross-cut tunnel being run on the Umpqua group, situated four miles from Sumpter, on the Ixex road, between McCullough Fork and O'Farrell Creek. Who in 230 feet the ledge was cut and a sample of blue black ore, similar in appearance to that of the Golconda and Columbia, average assay, assayed \$348.48. The ledge has been cut seven feet, and there is no sign of the wall yet. As the surface showing is very strong, about 20 feet, it is thought at least 30 feet of a ledge will be encountered. Two other ledges were cut, but the amount of ore showing values of \$5 to \$3 and the other \$2. The whole formation is highly mineralized and streaked with quartz stringer. The assay values in this property are low, seldom showing more than a trace of assay, however, going \$7.40, furnishes an other proof that values increase with depth. The tunnel cut the ledge at a depth of 12 feet. This rich plum was plucked by Messrs. H. W. Miller and J. C. Alken, of Roseburg. James Drennan and W. F. Burleson, members of the claim, and endeavored to interest the public in the property, but to no avail. It was presented to Miller and Alken, who made a thorough examination and accepted the property on March 20. The ledge was cut by the work has been pushed day and night. The ledge originally consisted of the Gold Hill, Grand Prize and American. A few weeks ago M. F. Blodgett, and added it to the now famous group.

There is an abundance of timber and good water power at hand, but the ore is not as rich as it was at first. The character of the ore will give a low rate for treatment. The other claims will be opened up at once, so the extent and value of the property can be determined. The fortunate owner will be rewarded over a thousand fold for their investment. This property is only a short distance from the box, Build Mountain, Grand Trunk and other properties. An illustration was furnished this week of the richness of the world for riches, while golden treasures are lying untapped in the earth. The ore is rich, and the owner will be rewarded over a thousand fold for their investment. This property is only a short distance from the box, Build Mountain, Grand Trunk and other properties.

Domestic and Foreign Ports. ASTORIA, Or., June 24.—Arrived at 8:30 A. M. and left at 10:15 A. M.—Steamer Santa California, from San Francisco. Arrived down at 9:40 A. M.—British bark Pinnore. Condition of the bar at 5:30 P. M. smooth, wind southwest, weather cloudy. San Francisco, June 24.—Arrived—Norwegian steamer Lina, from Nansai; steamer Progress, from Tacoma; ship Linn, from Seattle; schooner Sacramento, from Siuslaw River. Sailed—Schooner Queen, for Gray's Harbor. Arrived June 23.—Steamer Columbia, from Portland. New York, June 24.—Arrived—City of Rome, from Glasgow and Moville. Southampton, June 24.—Sailed—Etruria, from Liverpool, for New York.

On the Continent's Backbone. Wesley Parker, who lives in the southwest corner of Noble County, Ind., owns and occupies a house which runs one way, at least, is thought to be absolutely unique. The house has a peaked roof. The rain which falls on the west side of the roof runs down the gutter to the east side of the roof, on the other hand, flows into the Blue River, and thence by way of the Eel, Wabash, Ohio and Mississippi Rivers into the Gulf of Mexico.

Energy in Plants. Mehan's Monthly. Live plants are plants with their particles in motion building up the plant's structure. This motion is known as vital energy. Physical energy results in decomposition. The material out of which plant structure is formed is known as protoplasm, and it is this protoplasm, from varying degrees and directions of vital energy—but what starts the motion of protoplasm, and so directs the energy that a little cell may develop in one instance to an oak tree, and in another, but-tercup, has not been demonstrated.

Lady Randolph Churchill to Wed. LONDON, June 25.—It is understood that the marriage of Lady Randolph Churchill to General George Cornwallis Lytton, of the Scots Guards, will take place quietly in London Wednesday.

Energy in Plants. Mehan's Monthly. Live plants are plants with their particles in motion building up the plant's structure. This motion is known as vital energy. Physical energy results in decomposition. The material out of which plant structure is formed is known as protoplasm, and it is this protoplasm, from varying degrees and directions of vital energy—but what starts the motion of protoplasm, and so directs the energy that a little cell may develop in one instance to an oak tree, and in another, but-tercup, has not been demonstrated.

Lady Randolph Churchill to Wed. LONDON, June 25.—It is understood that the marriage of Lady Randolph Churchill to General George Cornwallis Lytton, of the Scots Guards, will take place quietly in London Wednesday.

Advertisement for DON'S EXTRACT. Includes text: 'Used by people overhailed because of its varying purity and strength. Quickly reduces redness of skin, chapping, itching, tan or oily complexion. For itches, scratches, sprains, stiffness, or when overworked or especially fatigued, thorough bathing with Pond's Extract and brisk rubbing will be found most refreshing and invigorating. After shaving, Pond's Extract is healing and cooling, and leaves the face white, soft, and smooth. Gives immediate relief to eyes irritated by winds or dust. AS A REMEDY it cures all inflammation, heals wounds and burns, stops pain and bleeding. Used Internally and Externally. CAUTION: Watch Hazel is NOT Pond's Extract, and cannot be used for it. Ordinary Witch Hazel is sold in bulk, diluted, easily turns sour and generally contains a quantity of alcohol, which is an irritant to the skin. Pond's Extract is sold ONLY in SEALED bottles, enclosed in this wrapper. This face cream will guide you when you call for a bottle at the drug store. Pond's Extract Co., 76 Fifth Ave., New York. Pond's Extract Ointment first soothes, then permanently CURES itching or bleeding Piles, however severe. It is a specific in all skin diseases, and gives quick relief to burns and blisters.
