LARGE CLASS GRADUATES

COMMENCEMENT EXERCISES AT PORTLAND HIGH SCHOOL.

Diplomas Presented by Chairma Warren, of the School Board-Mr. Paxton's Address.

An audience which filled the large assembly hall of the High School was gath-ered last night to witness the forty-third The decorations were very simple, but the long tables, heaped with a great profusion of flowers and the stage, covered with the white-robed graduntes, gave the hall a holiday appearance. Two numbers were well played by the High School orchestra, under the direction of Mr. Milner. Mrs. Albert Sheldon sang Denza's pretty "May Morning" and Liza Lehman's "You and I." Both songs were given in good voice and with inteligence, the delicate planissimo effects in the latter number being done with un-usual skill and feeling. Two violin num-bers were played by Miss Marie L. S. or, with so admirable a technique that an encore was demanded. It proved to be Felix Renaud's "Bereuse, No. 2." and all its lyric beauty and caressing ens were fully revealed.

Mr. Paxton's Address. Hon. O. F. Paxton, who was graduated from the Portland High School in lars, delivered the address to the class. He

"I return with great pleasure to my almo mater to welcome the June class of 1900 from the schoolroom into the world. I congratulate you upon success fully completing the course of study in the High School. It is a fine and honor-able thing to complete that course of study and to commence life bearing the diploma of such a school. It signifies that you have acquired much useful learning; 'that your minds have been trained to the use of knowledge; that you have acquired habits of industry, punctuality and order, indispensable in after life, and that you are upright in character and correct in deportment. These

are spiendid credentials.

"Some of you may contemplate the further pursuit of knowledge in colleges or institutions where instruction is given in technical pursuits or classical learning beyond the curriculum of public schools, but I presume the majority of you go from this school into the active duties of life; to choose your life calling and enter upon your life's work. What I say toht will be more directly addressed those who are thus entering active

Mr. Paxton reminded the graduates with much eloquence, of their broad du ties as citizens, counseled integrity, which is the foundation of every successful character, urged the argument that only by industry can any one advance in the days of fierce competition, admonish them to keep good company, advised them never to abandon hope and recom-mended them to cultivate Nature.

High School Reminiscences. Mr. Paxton, in closing, drew compar-sons between the High School of 1878 and

that of today, as follows: that of today, as follows:

"I think I may be permitted to indulge on this occasion in reminiscence and comparison. I believe it will be interesting and instructive if I tell you something of the High School and the commencement exercises at the time I graduated in June, 1878, and of the growth and changes which have taken place since then. The graduating class of 1808 numbered 11. There was then no separate High School building. The High School was held in the old wooden building which now stands on the north half of the block bounded by Alder, Sixth, Morrison and Seventh streets, then occupying the block upon which the Portland Hotel is now situated. Part only of it was used for the High School, the other portions being occupied by grammar grades. There was no assembly hall, and the commencement exercises were held in the New Market Theater, which was long since converted into a storeroom. The address to the graduating class was delivered by the Hon. J. N. Dolph, then a leader of the who afterwards served the state with great distinction and ability for 12 ars as Senator in Congress. He glou this city a few years ago, generally lamented and honored of all men. His was a character to emulate. He was a noble and patriotic man-fearless, honest and great. I remember well his earnest and forceful address to the class. I recall his saying. Never was there greater need for educated, thinking men and women, and for men and women of moral integrity in this country than at the present time. Whatever tests of the strength and stability of our institutions we have been called upon to pass through in the first century of our National existence, the second century of our history, in my judgment, will bring more dangerous End trying tests. You have learned from your study of history the fact that no republic was ever destroyed by opposing armies. by opposing armies. . . The danger of our country today is from within. I is mainly from the uneducated class of society. It is threatened in the increase of a sentiment that would destroy the oldest of divine institutions, the family; that would blot out religion with its institutions; that would sweep away the rights of property and place the indus-trious and indelent, the economical and prodigal upon an equal footing, which would repeal the laws which protect to a man the fruits of his own industry and compel him to labor for the good of the whole; in a general restlessness under restraints of law, in a growing sentiment which justifies an attempt to right real or imaginary wrongs by violence. The great want of this age is obedience—

"The directors of the school district at that time were Captain J. C. Ainsworth, Mr. A. H. Morgan and Hon. H. H. North-üp. Mr. D. W. Williams was district clerk. Captain Ainsworth, Mr. Morgan and Mr. Williams have passed away, leaving honored names and cherished memories. Professor R. K. Warren, now chairman of the Board of Directors of this school district, who will in a few mo-ments present to you the much-prized diplomas evidencing your graduation, was then principal of the High School. The school never had an abler or more faithful principal. He was loved and respected by the pupils and by the teachers serving with him. He retired a number of years ago from teaching, but has retained his interest in educational affairs, and has served the public with fidelity and ability as a director of the district. Now as then he is a friend of the young people, and now as then he is honored by all who know him.

obedience in the family, obedience in the school, subordination to the law of the state. These patriotic words are worthy to be repeated and remembered.

The City of Portland then had a popul lation of about 16,000 or 17,000 people, and the population of Gregon was scarcely 200,000. No building in the city exceeded four stories in height, and buildings of that size were few in number. There were no elevators, telephones or electric cars. We had no railroad connection with the East or with San Francisco or Puget Sound. Now Oregon's population is nearly 500,000. Portland has grown to be a and city of 100,000 people. The trains five transcentinental railways dally run in and out of our city, connecting us with every portion of the continent. We sit in our offices and converse by tele-phone with all the cities and towns of the coast. More than 100 miles of slectric street railway carry the people to and fro. Great buildings, of size, com-fort and magnificence not dreamed of in 1878, now dot the city. Ships engaged in erce from every country come to harves. The change is great and wharves. The change is great and derful. The change in the next 22 years will be greater and more wonder-

ful still. In that change, growth and de-

velopment in the future you will share. You should congratulate yourself upon the opportunities it offers. 'The first graduating class from the High School graduated in 1875, and was High School graduated in 1875, and was composed of five members—three young ladies and two young gentlemen. Your class numbers 6, and, including your class, 1024 young men and women have graduated from the High School—more than 1 per cent of the total population of Portland are graduates of the High School. It is a roll of names to be proud of, and it is an honor to have our names inscribed upon it. It includes many men and women who have become prominent in the city and state. I think no other school in the Northwest can show so large a number of graduates, and I am sure that no other school can boast of

sure that no other school can boast of having sent forth finer women or men.

"The public schools of the City of Portland have always been its pride., Money and public effort have been freely spent for their support and development. They stand in the front rank of the public schools of the United States. Portland's best citizens have deemed it a privilege. best citizens have deemed it a privilege to serve as School Directors. The list of directors of this district is a roll of honectors of this district is a roll of hon-The High School is the capstone of the system, and it is the city's pride. The history of the girls and boys who have graduated from it is the finest justifica-tion for the existence of the school. They are women and men of whom any city would be proud, and are daily doing hon-or to their school and to the city which educated them. When the late war came upon us and the President of the United States called for volunteers, nearly 30 of the graduates and former pupils of the High School volunteered and became members of the gallant Second Oregon Regiment, of which we are all so proud. Two of them—Elliott W. Ordway and Charles F. McKinnon—gave up their lives in the country's service. May their names be remembered with honor. Company H, of the Second Oregon, was largely formed of High School boys, and such was the excellence of their organization and the perfection of their soldierly qualities that the company was taken intact into the regiment, a distinction not won by any other company of the Oregon National

'Citizens of Portland, are you not proud of your High School boys? "Members of the graduating class, against I congratulate you on the happy and successful closing of your school iffe. Once more, I welcome you to the high duties and splendid opportunities awaiting you in the world. Your parents, your friends, your teachers, the school officers and the community rejoice in your character and success. They have watched with pride your course thus far, and have high hones for your future. and have high hopes for your future Their hearts and encouragement go with you into the buttle of life. Go forth in all the enthusiasm and high hopes of youth! Fight the battle bravely; do your part nobly! Do credit to your school, bring honor upon your city! May your lives be prosperous and happy! May all good attend you, and may you in after time come back as we have done tonight to bid welcome and Godspeed to happy youths graduating from this noble public school in the June days of the century to

Chairman R. K. Warren, of the Scho Board, presented the diplomas, with a few appropriate remarks, and then the 66 happy graduates received the congrat-ulations of their many friends.

First-Honor Pupils. The first-honor pupils are as follows Marie Backie, Eva Leona Bills, Omar H. Bittner Martha Olga Goldapp, Nellie Ha-bighorst, Clyde S. Hanawalt, Florence Des Chutes Hilton, Ruby Ethel Kellogg, Mary Etta Upton, S. Fay Lavenson, Em-ma L. Meador, E. Estella Melrath, Earl H. Parker, Aloista Stampfer, J. Frederick Staver, Raymond W. Steel,

COMING ATTRACTIONS.

Kellar, the Magician.

of home and social life.

Magician Kellar, who is without doub the peer of all magicians, will appear at the Marquam Grand next Monday, Tuesday and Wednesday evenings. The sale of seats will begin Friday morning of this week. He will offer a series of new masterpieces in Oriental necromancy and illusionary work, excelling anything he has achieved in past years. In the way of small magic, he will present a number of new experiments in pure sleight of hand, of which he is absolute master, some of which, with other per-formers, would be entitled to place with larger illusions. His entire programme as given in Boston will be presented in this

PERSONALLY CONDUCTED WEEKLY EXCURSION

Every Thursday.

An experienced excursion conductor whose duties are to look after the wants and welfare of passengers will be in charge of tourist sleeping-car to Chleago, via the Union Pacific. This car leaves Portland on the "Portland-Chleago Special" at 9:15 A. M., making close connections at Chi-cago with similar service to Boston and New York City.

Elderly people and ladies traveling alone or with children will find this service very convenient and satisfactory. For tickets, berth reservations and full information, call on George Lang, City Pussenger and Ticket Agent, or J. H. Lothrop, General Agent, 13 Third street, Portland, Oc.

ANNUAL SESSION OF THE STATE MEDICAL SOCIETY.

Dr. Phelps, of New York, Operated on Patients-Many Interesting Papers Are Read.

Medical Society convened yesterday morning in Artisans' Hall, in this city. The attendance was the largest reported for several years, and the interest mani-

for several years, and the interest manifested in the papers and discussions of the day showed that the Oregon doctor is in love with his profession.

The features of the day were the operations by Dr. A. M. Phelps, of New York, who is looked upon as one of the leading orthopedic surgeons in the United States. The operations were preceded by lectures by the noted sugeon. At 1 o'clock four patients afflicted with club feet were brought in, and upon improvised operations. brought in, and upon improvised operat-ing tables the doctor did his work right in the hall, in the presence of the gath-

in the hall, in the presence of the gathered physicians.

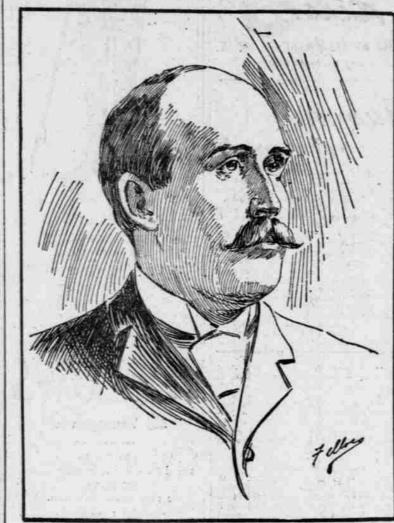

The second operations by Dr. Phelps were at the evening session, and were for hip diseases. These were followed very closely by the great crowd of docwith the fact that structurally man and

middle ear.
"Middle-ear disease is a perpetual men-sce to the life of the afflicted individual, as I have shown. He is in peril every hour, and yet we frequently hear parents state that they thought the child would

grow out of it.
"It is also a recognized fact that in
the majority of cases the catarrhal process begins early in life, and matures as cess begins early in life, and matures as age advances; hence whatever prophylactic measures are undertaken, they should, to accomplish the greatest good. The discussion on this paper was opened by Dr. W. L. Wood and Dr. J. P. Tamiesie, of Hillsboro, and others took part in this discussion.

The Man and the Ape. Following this was a paper by Professor W. L. Washburn, of the State Univer-

sity at Eugene on "Structural Relation Between Ape and Man." From the title, one might be led to ex-

DR. A. M. PHELPS, OF NEW YORK.

Dr. Phelps, who was recently made President of the New York State Medical Sc "is facile princeps among the orthopedic surgeons of the Old World"—according to an expert authority. He has, moreover, a great reputation in the New World. He comes of good old Anglo-Saxon stock. His father and mother came over with the New England colonists. Dr. Phelps was born in Vermont. From attending the University of Michigan with a view to be coming a civil engineer, he took up the study of medicine. From 1880 to 1884 Dr. Phelps studied surgery in the leading schools of Europe. He studied under Schede at Hamburg, under Esmarch at Kiel, under Von Volkman at Halle, under Billoth at Vienna and under Thiersch at Leipzig. On his return to America, Dr. Phelps was called to the chair of orthopedic surgery at the University of Vermont, and also to the corresponding chair in the University of New Tork. Upon the retirement of Professor Wright from the chair of surgery in the first university. Dr. Phelps was appointed his successor, and he still retains the post. The position in the New York University he held for 10 years. In 1887 he was given the chair of orthopedic surgery in the New York Post-Graduate Hospital and School, where he established the orthopedic department, which consists of a large portion of the hospital, and outdoor department, which treats from 1000 to 2000 patients every year.

In connection with this hospital, he also, through the kindness of Mr. and Mrs. Herbert

glewood. N. J., of which he is the surgeon in charge. In 1887 he was elected Vice-Predent of the New York State Medical Society, with Professor Albert M. Loomis as President, and in 1894 he was President of the American Orthopedic Association. He is also surgeon of the New York Hospital, one of the largest institutions of the kind in the country. Dr. Phelps' principal contributions to surgery and orthopedic surgery are his operation for hernia, which differs from all others, in that it obliterates and fortifies the inguinal conal with a mattress of fine silver wire, and all of the stitching being done with very fine silver wire in a continuous suture; his club-foot operation of open incision, which was introduced to the profession in 1889; his lateral traction fixation hip splint, aluminum cor net, and a variety of other braces and mechanical contrivances for the treatment of diseases of the joints and deformities, all of which are well known.

is also a terse and lucid writer, having contributed liberally to the literature of the

the average physician meets with almost daily, and the practical manner in which Dr. Phelps handled them gave many pointers which the attending doctors think will be of advantage to them in the future.

society was called to order at 9:30 President Harry Lane. The address welcome was delivered by Dr. Andrew Smith. The report of Secretary W. F. Amos and that of Treasurer Mae H. Cardwell were read and adopted. The secretary's report showed that the society is in a flourishing condition, there now being 138 members. There were a large number of applicants for membership on file. They were referred to the board of censors. The list comprised the follow-

try is that of acute catarrhal condition of the upper respiratory track, which is commonly called a cold. The mouth breaths, due to adenoids and enlarged tonsils, and with the onset of slight cold, the natural sequence of events will be nasopharyngial catarrh, and it is this

tors in the hall, for they are troubles that the average physician meets with almost daily, and the practical manner in which merly believed to belong to apelike men or menlike apes were now conceded to be individual monstrosities, either of ape or of man, and to have no racial signifi-

The skull and skeleton, the muscular system and viscera of apes and men were compared. Then followed a comparison of special organs, the hand, the foot, face, ear, brain, etc. The lecture illustrated with lantern sildes, showing the points touched upon. The speaker said that the seeming resemblance to apes seen in some of the negro tribes the degraded Australians and others, the thin shanks, undeveloped calves, and brutish habits, need be no proof of man's connection with apes, for we must re-member that privations incident to a wild life, forced marches, insufficient food, etc., have all acted to produce these results. In conclusion, Professor Washburn em phasized the fact that a scientist must, from the very nature of his study, be a religious man; that no man could study religious man, that he being impresse natural science without being impresse by the evident truth that an o and through it all, and that Nature's laws were God's laws.

Other papers were read during the af-ternoon by Dr. R. C. Coffey, on "The Doctor as a Factor in the Fromotion of Charlatanism," and by Dr. E. D. Connell, on "Some Points in the Diagnosis of the More Common Forms of Nasal Obstruc-tion, and Their Radical Relief." Prominent doctors joined in the discussion of both these subjects. The discussion of the former was opened by Dr. R. L. Thomas, of Spokane, and the latter by Dr. J. F. Dickson, of Portland. Both the papers and the discussions were highly profitable to the assembled physicians.

At the evening session. At the evening session Dr. Pheips read a paper on the treatment of the hip, illustrating with appliances and treatments that he used in connection with this work. When he had finished, a boy suffering from hip disease was brought in and laid upon one of the tables. The doctor then proceeded to examine him and to explain to those in the hall just how he was affected, the cause and the treatment. Following this was a little girl, whose hip had long been affected. Both of these The Evening Session. had long been affected. Both of thes cases were used mainly to illustrate the treatment of such cases. The third pa-tient brought in was a man & years old. He has been crippled for two or three years. Dr. Phelps, after examining him, proceeded to operate on the injured part. This work was followed very closely by

There will be a number of other papers and addresses by prominent local and Northwest doctors. In the afternoon President Lane will deliver his annual address. Officers for the ensuing year will be chosen, and any other miscellaneous business that may come up will be disposed of. The session will adjourn this afternoon, and some so-cial features will probably follow in the evening.

> EAST SIDE AFFAIRS. Effort to Improve Grand Avenue

There will be a conference of business men on Grand avenue Friday evening at Justice Vreeland's office concerning the condition of the Grand avenue roadway. Justice Vreeland has kindly tendered them the use of his office for that evening, as he desires to help any movement of that sort. The condition of this street has been under discussion for some time. has been under discussion for some time and it is feit that as it is the main bus thoroughfare in East Portland it to be reimproved, or at least repaired at once, as it is getting worse The timbers are rotting out at innumerable places. Besides, between the car tracks the plank is worn completely out. Yesterday F. L. Keenan and D. Kella-Yesterday F. L. Keenan and D. Kellaher, two Grand avenue business men, made a complete canvass of all the other business men on the street. They were found all to be very anxious that something should be done at once. They feel that all business will be driven away, as it was from Union avenue several years ago. They also think that there should be a full improvement, and not merely a patching up of the bad places.

"We feel that we have a right to ask that something be done with the street, as our rents have been raised on the supposition that the readway was to be reimproved," said a prominent property-

supposition that the roadway was to be reimproved," said a prominent property-owner yesterday, "and we are coming to-gether to see what can be done." City Engineer Chase and Councilman Hol-brook are specially invited to attend the gathering and give their advice as to the best course to take. Grand avenue. hest course to take. Grand avenue was improved six years ago. Incidentally the meeting will also discuss the condition of the roadways which are closed up and see if something cannot be done toward getting them repaired and opened. East Morrison street roadway is now carrying the bulk of the travel that goes over Morrison-street bridge, and the wear on it, although the decking was put down only a few months ago, shows already. So, while mainly Grand avenue will be considered, the discussion will not be con-fined to that subject. All citizens of Central East Portland will be welcome at the gathering.

Band of Mercy Entertainment. The Band of Mercy, composed of pupils of the Stephens School, to promote the study of dumb animals, will give an eustudy of dumb animals, will give an eu-tertainment this evening at Gruner's Hall, Stephens' addition. Following is the programme: Greeting song, 30 chil-dren: recitation, Certrude Christensen; vocal solo, Jessie McConnell; flag drill, 18 giris; piano duet, Thora Maim and Gladys Mackenzie; cuckoo song, six giris; recitation, Ethel Wigginton; mandolin solo; song, six giris; violin solo, Minnie Hatfield: wreath drill, nine giris; min-

Hatfield; wreath drill, nine girls; min-uct, 12 girls. Joint Meeting.
Gilbert Auxiliary Camp. No. 1, and Gilbert Camp. No. 4, Second Oregon, held a joint session at their hall on the corner of East Morrison street and Union avenue Monday night. There was a large avenue aronaly night. There was a large attendance of the camp and auxiliary, and the evening was pleasantly spent. The time was spent in games and general amusements, closing with a dance. The camp and auxiliary have planned to have a taily-ho party July 7, and the members are looking forward to that event with much interest.

much interest. Pleased With the Election. The people of Brooklyn are pleased with the action of the School Board in retain-ing Miss A. L. Dimick and the rest of the teachers in that building. At the closing exercises yesterday afternoon in that building, D. P. Thompson, Director, was present, and stated to the gathering that all the teachers in the Brooklyn School had been re-elected. On this announcement being made, there was vigor-ous applause among the audience as well as among the pupils.

East Side Notes P. Hunter shot a seal in the Columbia River opposite Fairview that weighed 2x

fine remitted. The case of Fay Severe, charged with the murder of Emma Golden, was set for Thursday at 9:30. Walter Brown, Annie Parker, Morton Freeman, D. D. Green, Archie Hill and "Dollar Bill" St. Clair were placed under \$1000 bonds to appear

Seven Were Given Places Who Have Not Taught Here Before-List of

The announcement of the teachers elected by the school board for the ensuing school year was made yesterday. The list shows that few new teachers were added and that few old teachers were dropped. Most of the changes made were in the promotion of old teachers to higher positions, and in transferring teachers from the school to swetter. In the Higher School tions, and in transferring teachers from one school to another. In the High School the names of two new teachers appear: Arthur Breece, formerly professor in the Portland University, and Miss Laura Northup, a graduate of Wellesley College, and the daughter of Judge H. H. Northup. The other new teachers are: Atkinson School, Agnes Plummer; Couch School, Eva H. Cole; Fernwood, Madge O'Conner; Fulton, Nellie Dunne; Midway, Lillie Mock. Edgar A. Milner, a former High School teacher, was given the principalship of the Woodlawn School. Following is the list of teachers elected:

wing is the list of teachers elected List of Teachers, 1900-1901. City Superintendent-Frank Rigier. Special teachers—Anna B. Knox, draw-ng; Myrtle Moffett, drawing; Blanche Sorenson, music; Robert Krohn, physi-

DOUBTERS Can Be Changed by Knowledge.

If there is any doubt about making brain power by the use of certain food, the doubter should make the following

Helen Frances Huntington, of Gaines ville, Ga., says: "Just a word of comme dation concerning Grape-Nuts which I have found to be the most wholesome, nourishing and appetising food that has ever come to my knowledge.
"I am not a dyspeptic, but being constantly engaged in severe brain work, I found that I did not thrive on ordinary

diet: even a moderate dinner dulled my brain so as to be practically incapable of critical work. I tried meat-juice, pep-tonoids, the two-meal system of light breakfast and no suppor which brought on nervous depletion and sleeplessness, so I resorted to one and another of the various health-foods which all seemed dike tasteless and valueless as a brain food, until quite by chance, I had a dish of Grape-Nuts food served as dessert. iked it so well that I began to use I daily, for supper four teaspoonfuls in a saucer of hot milk, eaten before it

lissolves to mushiness. "This point should be remembered, as, after a certain time, evaporation seems to affect the sweet, nutty flavor of the food as in the case of certain fine-fla

vored fruits.
"The result in my case was simply as-tonishing. I had no desire whatever for sweet pastries, meats, or in fact any-thing else; and my brain was as clear and active at night as on awaking from

a long, refreshing sleep. a long, respensing sleep.

"The peculiar advantage about Grape.

Nuts food is that it supplies the nutritive qualities of a varied diet without the bad results of heavy eating. I cheerfully recommend its use to all brain workers, if not as an exclusive diet, certainly for the last meal of the day. I always take it with me when traveling, which saves a deal of annoyance and discomfort."

While Professor Munyon's Improved Homeopathic Remedies are based upon the best principles of the Homeopat tool, yet he is not the advocate in its entirety of any one school. He accepts that which is absolutely curative in all schools; he rejects that which is worthschools; he rejects that the physician should less in any. The modern physician should not be educated one-sided. Best equippe he should know by training, test and ac-tual practice the value and merits of the leading systems of medicines. He should utilise the most efficacious to be found in all. That is the foundation of the

If you have Rheumatism try Munyon's Rheu-matism Cure; if you have a Cold try his Cold Cure; if you have Dryspegals try his Dryspegal Cure; if you have any Ridney trouble try his Kidney Cure. Munyon has a specific remedy for most every disease; mostly 25 cts. at any drug store. Munyon's Inhaler cures Catarrh, Grippa, Bronchitis, etc. Price (with all medicines complete), \$1.00. compaces, 31.00.

If you think you need medical advice write
to Prof. Munyon, 1505 Arch street. Philadel-phia, Pa., and his skilled specialists upon all
diseases will advise you promptly by mail.
