# COMMERCIAL AND FINANCIAL NEWS

Heavy receipts of Oregon penches was the feature of bindiness on Front street yesterday. The Early Crawfords from Southern Oregon are coming in quite freely, and most of the desires are of the opinion that this will be the best week for putting them up, as the price is about as low as it will be this season. Some very fine stock sold yesterday at 50 cents per bux, and nothing was sold above 60 cents. The cop is not large, but as they are coming in a bunch, the price is lower than it otherwise would be. Aside from produce lines, thre was not much activity in the market yesterday. Easy are lewer and butter is firm. Poultry is in only moderate demand, but it is too carly in the week to fully determine the course of pricess.

### NEW YORK STOCK MARKET. Extreme Heat Causes the General List to Be Neglected.

NEW YORK. Aug T.—The recent disposition to esteam from operating in stories and to swall a clearer development of the prospect was reinforced today by the extreme heat, which reached a level industing prestration on the floor of the exchange. With the exception of occasional execution of orders in a few stories where special courses were at work, the stocks where special causes were at work, the ligt was atmost wholly neglected. During the early part of the day some considerable de-clines were established, but when the room clines were established, but when the room-traders came to close up their contracts, the losses were in large part wiped out. The most conspicuous individual movement was in Thited States Rubber, which jumped 3% from the early low point, not long before the close. Punishment was visited as a result upon the short interest which rushed to cover, making some show of animation in stocks. Northern Pacific's large increase in carnings for the fourth week in July brought realizing, and the grangers were heavy on the Weather Jureag's weekly crop report, showing need of

Bureau's seemly crop report, showing need of rain in the corn belt. The steel stocks sugged on the further reduction in the price of iron surrains. Some of the re-sently mactice stocks wed wide declines, including Chloago Great stern, Lake Eric & Western, Jowa Central the local traction stocks. Some of the ty calling was based on the beginning of sultry solling was based on the beginning of the good export movement. Engagements amounted to only about \$2,500,000, whereas the estimates preserting pointed to \$4,000,000 and upward. Reports from London seve-tent the Bank of England was now giving spe-cial facilities to struct gold from New York. Character B is not probable that gold would

lays goes out at today's figure for sterling. The rate for demand sterling fell back a fraction as a result of sales of bills against of the opinion that this will be ske for patting shern up, as the price low as it will be this season. Some ock sold preservary at 50 cents per thing was sold above 60 cents. The

by the British exchequer of \$6,000,000 of the \$10,000,000 issued for the United States would therefore Insure American bidders about 50 per cent of their grylications. Future payments are required on August 15 of 20 per cent; on September 14 of 25 per cent; on October 15 of 25 per cent, and on November 15 of 25 per cent, and on November 15 of 25 per cent, and on November 15 of 25 per cent, the bond being issued at 98. This would make it feasible to distribute the remittances over a considerable ported, but there is also a provision that the installments may be paid in full ps or after August 15, under a discount at the rate of 3 per cent. No information can be obtained as to how remittances will be made, and this confuses the estimates as to the future effect on the money market.

Gold continues to accumulate in Now York on payments by the Subtreasury to the banks of frafts on account of gold deposited at Pacific points. The banks have gained from the Subtreasury since Friday \$1,082,000 on this account. The money market is therefore little affected by the gold exports.

Bonds were dull and irregular. Total sales, par value, \$625,000. United States is declined in the bild price.

In his decision panies from discontinuing the rending of grain questations to occupialmants. In his decision Judge Henry held that "the quotations of the Chicago Board of Trade are impressed with a public interest," and that telegraph com-panies handling such quotations must deliver them to commission companies that desire them, whether they be sent by parties operating leased lines or be contained in private

telegrams.

Judge Henry held that, being of a public nature, these quotations could not be converted to private use to the exclusion of the public; they had become interwoven in the grain and stock trade of the entire Western and Northwestern portions of the United States, and that the knowledge of them had become so essential to dealers in arricultural products that, deprived of them, thousands of dealers would be compelled to go out of business. The result would be, the court held, the conversation of the Chicago Board of Trade into version of the Chicago Board of Trade into

GOLD GOING OUT.

One Firm Will Ship Two and a Half Millions Today.

the most gigantic monopoly in the world,

NEW YORK, Aug. T.—Baring, Magoun & Co. today increased their gold engagements for shipment by temorrow's steamer to \$2,500,000. The gold will go in the form of bars, in anticipation of war-loan remittances. Besides the gold engaged for shipment tomorrow. Heldesbach, lokelhelmer & Co. have made provisional arrangements for \$1,000,000 for shipment to London on Thursday, and Ladenburg, Thaiman & Co. may also send \$600,000.

Foreign Financial News. NEW YORK, Aug. 7.-The Commercial Ad-New York, Aug. 1-120 commercial Ac-vertiser's London financial cablegram says: The markets here were quiet and irregular today, investment securities being strong on the recumrable success of the exchequer bond profer of \$10.000.000. The list was opened this mercing, and immediately thereafter closed.

Chicago Grain and Produce.

Chicago Grain and Produce.

CHICAGO, Aug. 7.—At the opening in wheat and for a few minutes after exceedingly lively business was done, compared with the aimest utter stagnation of recent sessions. Early quotations from Liverpool furnished a big surprise to local traders, showing an advance in that market of the stagnation and the stagnation of the stag fering with harvesting operations. Opening quotations in September ranged from about %

fering with harvesting operations. Opening quotations in September ranged from about 'ye to a full cent over yesterday's closing priors, the range being from 70% to 170%. But there theadvance stopped, and it took but a few minutes of the heavy realizing which started at once, to force prices back quite materially. Offerings for some time were heavy, long wheat coming out in large quantities, principally from local holders, though houses with foreign connections were also prominent in the selling.

There were apparently plenty of buying orders on the market at 750 and under, and the market was not often allowed to go below that figure up to the noon hour, the lowest point touched up to that time being 75%. After soon the market, which had gradually become extremely dull, became heavy also. The crowd was evidently long, and the market declined to 75% c, mostly from its own weight. Shortly before the close liberal expert sales gave a better tone to the market, Scotember advancing to 75% obl., where it closed. Corn was dull for the most part, but firm at all times. September closed \$\frac{1}{2}\text{c} \text{c} \text{c} \text{c} \text{c} \text{c} \text{d} \text{c} \text{l} \text{fighter}, at \$214\text{d} \text{c} \text{l} \text{c} \text{l} \text{c} \text{l} \text{c} \text{l} \text{l

Boston Wool Market.

Boston Wool Market.

Boston, Aug. 7.—The wool trade here is quiet, although the demand continues slowly but steadily to improve. As reports from mill centere indicate that stocks of wool getting lower, there is a disposition among manufacturers to enter the market. Prices are practically unchanged. Territory wools, scoured bayls—Montana and Wyoming fine, demand fair, 176118c; scoured, 50c; staple, 529 53c; No. 2 medium, 10620c; scoured, 46647c; Utah, fine medium and dise, 18917c; scoured, 50c; No. 2 medium, 18920c; Utah fine medium 50e; No. 2 medium, 18@20c; Utah fine medium 50e; No. 2 medium, 18920c; Ulah fine medium and fine, 16017c. Oregon wools—Eastern, choice greasy, 16017c; averag; 18913c; seouted fine medium and fine, 18950c; Valley, No. 1, 29622c, No. 2, 21922c. California wools—Northern Spring, choice, 18910c; average, 16017c; seoured, 50952c; middle countles, spring, 14916c; scoured, 45647c; retailsen, free, 12513c; southern defective Spring, 11912c; free northern, Fall, 14915c.

Coffee and Sugar.

NEW YORK, Aug. 7.—Coffee options closed firm at net unchanged prices to 5 points advance. Sales, 37,000 bags, including August, \$7.70; September, \$7.70; November, \$7.80; December, \$7.90@7.95. Sugar-Raw, steady; fair refining, 4%c; centrifugal, 96 test, 4 13-16c; refined, stendy

The Metal Markets.

London and a shade steadler here for spot but weak on futures. Spot the closed at \$302 32 25. Spelter ruled a shade easier at \$4 17140 4 2214. Lead was dull and unchanged at \$4 25, and copper also ruled dull at \$18 50. The brokers' price for lead was \$4, and for copper \$16 50. Bar silver, 61160.

SAN FRANCISCO, Aug. 7.—Bar silver, 614c. LONDON, Aug. 7.—Bar silver, 2814d.

THEY FOUND A LOST CITY. New Mexico Yielded Treasure to Ex-

plorers for Evanston University. Chicago Tribune. Important discoveries, from which the Northwestern University, at Evanston, Ill., will benefit, have been made by a party of scientists which reached Santa Fe recontly.

Fe recently.

A building of 1200 to 1500 wooms, only one of which was excavated, was found in Pajarsto canyon. The structure is 55x 450 feet, and constructed entirely of carefully dressed stone. It is situated between

Bland and Espanola, and is only one of a large number of similar ruins. The structure was two or three stories high originally, but now only walls six to 10 feet high remain standing. The upper story evidently was open to the sky, and upon this the dwellers of the building

ple. An old furnace or smelter was found, near which was an old iron bar deep y incrusted with rust; also pieces of rich copper ore, as well as gold ornaments and pieces of pottery of great beauty and brilliancy of colors were in the room. They were heavy, fully one-quarter of an inch thick, and decorated inside and out with unique designs showing some degree of uniformity. One of the designs repre-sented the picture of three frame buildings, with a smokestack and smoke curling out of it. Each communal building had a different set of designs for their pottery. Some woven cloth was found. It was woven in spirals almost like a huse

spider's web.

Around the fireplace in the room which was excavated stood a dozen large pots, each with buffalo bones in them, showing that the inhabitants abandoned the room while preparing a meal. Near some of the smelter siag was found scorched corn, together with the bones of birds and other together with the bones of birds and other er animals. Several basicets in the room were more beautiful than those woven by the Navajos of today, but they crumbled to dust when touched. Iron knives, stone battle axes, polished stone reflectors, awis, several musical instruments including fifes, were in evidence and well pre-served. Many human bones were found in the regulation burial mounds. The scientists who made the discoveries

are: Dr. George I. Cole and Fay C. Cole, of Los Angeles, Cal.; Professor R. W. Buller of Greeley, Col., and the Rev. G. S. Madden, of Bland. They announce that the relics found will be sent to the North-

western University.
There are hundreds of similar rulns in the 25 miles from Bland to E panels. showing that in the district at one time lived more people than are in New Mex-ico today. The region has not yet been touched by scientists and explorers.

England Is Impressed. . Pearson's Magazine. A few figures showing the immensity

of the wheat crop in the United States and the cost of producing it may be of interest. The harvesting machines made interest. The harvesting machines made and sold in one year would form a solid procession from Chicago to New York City, or would almost construct a fence around England and Scotland. The twine used in tring the bundles would reach around the earth 500 times, and the freight cars necessary to haul it would make a train 10 miles long. The saving by the use of machinery in each year on American farms would more than pay the national debt of Great Britain.
