After a short recess for lunch, the conyention met again at 2:39 o'clock. Chairman Smith called for short addresses from delegates. Dr. W. M. "Having in mind many of the honors that I have received from my country-men in times past, I shall, when this day is gone, have no more favorable recollections of any one of them than I shall of this. This is a historic occasion. If the peril of this country is what we think It is; if the question before you and your countrymen is that of the continuance of the Republic, then no greater question has ever been committed to an assembly of men or to the country. We are op-posed to imperialism. We are in favor of a republican form of government. We respect the teachings of our ancestry, the glory of the history they have left to us: and, standing between the past and the future, it is our duty to transmit to posterity the peace of the fathers and the institutions that they founded. That is your mission today as the representatives of 45 states of this Union. It may be a representation without an organized constituency, but it is a representation that speaks for itself and for the people of the country and for the generations that are advancing to take our places, and it is a representation that has a right to speak; a representation that will be heard at Washington today; heard over the world, speaking as we do for the preservation of republican institutions,

light of which, if it simil go out, will never be rekindled on the surface of the

earth. "I charge that the policy upon which this Administration has entered will mean the abandonment of the peace upon which our Government was founded; that the body of Huntington has been taken to it will change the Republic into an Empire. The first of the means before us Friday. Page 3. it will change the Republic into an Em-pire. The first of the means before us for the preservation of the Union, if our allegation is true, is the overthrow of the Administration. I am not disposed to make issues with men, but my former friend and fellow-citizen, Mr. Long, the Secretary of the Navy, has made a re-mark which of itself may not appear very significant, but, nevertheless, I choose to make some comment upon it. Mr. Long says what we call imperialism is only a cry, and that the anti-imperialists are few in number and of no considerable importance. He says their voice is only a cry. That may be true: a census has not been taken; and we don't boast of numbers. But 19 centuries ago a cry was heard in the wilderness of Judea heard by only a few; but now the echoes of his voice are heard the world over. And now we are crying for an open path of justice for all people, repentance, wrong that has been done in the past and reformation in the future.
"We have accomplished something. The anti-imperialist leagues have made the

ism known and spoken in every palace, every log cabin and every prairie camp on this continent."

Governor Boutwell then turned the attention of his audience to the condition of affairs in China, declaring his belief that it is the intention of the powers to partition China. He added: "If we had treated China in the month
