s naturally considerable buying by the al retailers, who were stocking up in scipation of the Saturday trade. Fruit scipts were not very heavy, but there was more than enough apples and pears to supply the demand, and prices are very weak. Another carload of Idaho melons were received, but they are not moving very briskly. The egg market braced up again yesterday, under light receipts, and a kind of hoarding of stocks for next week, and sales of best candled stock were made at 19 cents per dozen. Butter continues unchanged, with some symptoms of weakness apparent occa-There were soft spots in the Eastern wheat market yesterday, but in the European markets there was not much change, and while local buyers were less enger for the cereal than they were a few days ago, they were still willing to quote 56 cents and better for Waita Walla, while Valley was nominally 57 and 58 cents, and bluestem about 59 and 50 cents for best stock.

NEW YORK STOCK MARKET. No Animation Except in Sugar and

People's Gas. NEW TORK, Aug. 31.—Except for some rather active selling of Sugar and People's Gas, there was not a particle of animation in today's stock market. The sympathetic effect of the weakness of these two specialties wiped out the slight opening gains in some of the in-ternational railroad stocks. Again at the close, there was sufficient demand from the short interest which was averse to leaving contracts uncovered over the three days' holiday to stiffen the prices of some of the railroads, but the general tone was easy owing to a late drive against People's Gas. Among those to show notable firmness were Southern Pa-cific. New York Central and Baltimore & Ohio. The weakness of People's Gas gave a striking illustration of the lack of con-sistency in the minds of professional oper-The other day this stock advanced on the report that a newly-organized company in Chicago was in control of interests friendly to People's Gas. The professional intelligence by today had ar-rived at the conclusion that the formation

The last day of the month was devoid of this friendly company must be the of features of special interest in the local signal for war upon the Ogden Gas Company the rival of the People's. The stock was naturally considerable buying by the

expense of \$\% in its price.

The movement in Sugar was about equally independent of the news of the day, and was apparently due to realising on the advance in the refined product which was made yesterday. The part taken by the professional element was based on a scrutiny of the source of the orders in the stock, and when the traders thought they could trace selling orders to inside sources they trailed on and sold. Tobacco and Brooklyn Transit were weak during the morning, but partly recovered later in the day. Chicago Terminal, pre-ferred, lost 24; Union Bag, preferred. 1%; and National Steel, preferred, 14. Money market conditions, consisting of an easing of the London discount rate, and the promise of a strong bank state-

ment, were ignored. The bond market was barren of incl dent. Total sales, par value, \$635,000. United States old 4s declined 1/2 in the bid price.

Speculation has maintained its indif-

ferent tone in Wall Street this week. About mid-week there was a stiffening of the market, and an appearance of awakened interest, but it proved to be due to nothing more than a recovering in demand from the shorts. The determined abstinence of capital from taking any part in stock operations causes some gloomy forebodings among the profes-sional traders that the public interest in listed securities has become perma-nently impaired. There is no doubt that the whole issues of new capital last year, and the methods employed to push up prices of some of the new industrials to enable promoters to realize handsomely, and the subsequent collapse of those stocks, made a costly experience for a large speculative contingent and im-paired the confidence of the general public in the values of securities. However, it is obviously only a question of time when the increment of capital which has been large in the prosperous period of

the last few years must seek a fixture in high-class securities. Owing to the present disparity of money rates here and abroad and the continuing foreign demand for our merchandise products, there is an obstacle to the settlement of the international trade balance in gold. In fact the tendency is to still further extend the foreign credits, by export of gold as a purchased commodity to cover the reserve requirements of the great foreign banks. As foreigners' needs for our products continue greater than ours for theirs, and our production of gold makes us at the same time the available source of supply for the metal, there is felt the pressure of special in-ducement to American creditors to refrain from calling home their foreign balances

It is considered inevitable that China nust place a large loan to meet demands for war indemnity, and American capital is expected to absorb a portion of such loan. The homeward course from Europe of several men influential in past stock market movements, aroused hopes among professional operators that the market could throw off its lethargy, but it was

not realized. The bond market has been practically The bond market has been practically paralyzed, with the exception of occasional demand for individual bonds. United States refunding 2s, when issued, and old 4s declined 14 in the bid price. The new 4s advanced 14 per cent.

Chicago Grain and Produce.

CHICAGO, Aug. 31.-Wheat was quiet throughout the day. Liverpool was easy and Argentine shipments 894,000 bushels, compared with about 1,000,000 the previous week. This condition of affairs, combined with somewhat better harvesting weather In the Spring-wheat territory, coaxed traders to the selling side. September opened at 74\%27\%c and sold off to 74\%c. At this point St. Louis claimed some export sales, and this, together with a mod-erate amount sold here, was of sufficient promise to influence a fair amount of buying, under which September rallied to 74%c. As these sales were not, so fat as the trade knew, followed by others, sup-port of the bulge melted away; long stuff in moderate quantities came out, and the market sagged, September drop-

Sentiment in corn was rather bearish all day, and prices easier. Cables were lower, the weather favorable, and a bumper crop predicted for lowa. Septem-ber closed &6 under yesterday, at 35%. Liquidation of September for deferred futures in oats was general. September closed Kaike down, at 214c.
Provisions were moderately active and

firm, on a good cash business, and the expectation of a bullish stock statement tomorrow. The best demand was for lard and ribs, and these held strong, but pork eased off after the bulge: September pork closed 5c under yesterday; lard 5@7½c higher, and ribs unchanged
