There was a much better feeling in the Eastern wheat market yesterday, and Liverpool cables were higher. In the local market there is considerable wheat changing hands, but the most of it moves at extreme figures. Walla Walla is quoted at 56 to 56% cents, and some sales were made yesterday at 57 cents. In the interior, these prices have been exceeded. Valley is nominally 58 and 59 cents, with a very limited amount changing hands. The barley market is apparently easier, without very much demand for either feed or brewing. Oats are also coming to a standstill, under more liberal offerings and an easier demand. Among the produce markets yesterday there were but few changes of importance. A carload of Merced sweet potatoes arrived, and, as the market was already well supplied, prices are quiet. Store butter is very firm, and eggs are steady. Peaches are less plentiful, and prices may show some improvement before the end of the week Poultry is very dull, and the large stocks not moving very freely.

NEW YORK STOCK EXCHANGE. Public Still Befuses to Show Much

Interest in Speculation. NEW YORK, Sept. IL-There was a arger attendance of the members of the Stock Exchange at the opening of the Board this morning than for several months past. This was due partly to the returning tide from Summer vacations, but there seemed to be an expectation tions, but there seemed to be an expec-tation among brokers and operators which was not realized, that a renewal of interest in securities was about to be shown. London bought on a moder-ate scale here, that market being en-couraged by continued ease of money, and this helped the recovery from the opening decline here. The enthusiasm of the professional traders was short-lived, however. They created a slight flurry in the coalers, marking up New flurry in the coalers, marking up New Jersey Central 24 and Reading first

preferred a point on the prevalent be-lief that a way would be found to ad-just the differences of the miners and coal operators. There was some short covering in Sugar, People's Gas and Brooklyn Tran-sit, these three stocks maintaining their conspicuous position in the trading. The better comprehension of the extent of the Texas disaster and St. Paul's decreased earnings proved depressing fac-

to 2 per cent attracted attention to the possibilities of a money squeeze during the Autumn. The rate fell back to 1½ per cent when the banks came into the Stock Exchange with the unplaced balances late in the day. The prevalent case of money is evidently due to the exceedingly scanty demand and any active speculation will probably make rapid inroads upon the resources of the banks.

The bond market was quiet and fea tureless. Total sales, par value, \$940,-600. United States old is advanced \(\) and the \(\)s, registered, \(\), and do coupon \(\) per cent in the bid price.

Foreign Financial News. NEW YORK, Sept. 11.—The Commer-cial Advertiser's London financial cable-

gram says: The tone in the markets here today was bright and business was brisker than it has been, the new activity, however, being mainly confined to the mining demand. Dealers think that the gen-eral situation is much clearer, and they expect the public to come into the market very soon. Americans opened above parity and closed at the best, stimulated by New York support. Comparatively little interest was shown in the results ifttle interest was shown in the results of the Maine election, the success of McKinley being now looked upon as a foregone conclusion, Copper shares were very strong, Tintos touching 59% on Parvery strong 50% on Parvery stron stationary.

NEW YORK, Sept, II.—There was a marked change in the order of things on the New York cotton exchange today. Hops—587c per pound for 1899 crop, 11@14c while early operations and fluctuations partook greatly of yesterday's sensational developments, there was a quick return

to normal conditions in nearly all re-spects. The pronounced strength of this market last night gave European bears another fright, which resulted in a sky-rocket rise of 12@19 points in Liverpool soon after the opening. New York shorts also made a wild drive for safer ground on the opening here, but before their demands could be appeased prices climbed

9 to 15 points.

in Liverpool, as well as here. The claim was also made that the damage to cotton in Galveston had been exaggerated.

Chicago Grain and Produce. CHICAGO, Sept. 11 .- The fore part of the session in wheat was rather quiet, but activity developed later because of export buying. October opened 1674c higher, at 7446744c, thus beginning an advance which lasted nearly to the end. The firmness at the start was due to termines at Itaniana. firmness at Liverpool, to small North-west receipts and to bad weather in the Northwest. The export demand caused shorts to cover rather freely, and under this pressure October advanced steadily to 172. There was profit taking at the top, but the close was strong. October 14 @14c improved, at 7546754c. Corn was firm, but dull. Country of-

ferings were light, and the wheat strength was also a help. There was a good shipping business done. October closed %c higher, at 2063%c.
Oats were fairly active and firm. October closed 46%c higher, at 22c.
Provisions were rather irregular. The market advanced moderately early, but eased off later. The cash demand apparently showed no weakening, and shorts covered the fore part of the session. Later packers sold, and a reaction took place. October pork closed a shade lower, and lard and ribs each 214c higher.

GOOD SECTION OF OREGON.

Much Rich Land in Sprague Valley -Cheap Irrigation.

BLY, Or, Sept. 9 .- Bly is all life and business at present, from the fact that the having season is drawing to a close, and everybody has plenty of money. The town is situated in one of the richest valleys in Klamath County, near the headwaters of the Sprague River. The place was named by the Indians. When first established and before it was given any title, in speaking of the place "far up the river," they called it Bly, which signifies "up" in their language. The white people took up the term, a post-office was established, and the name permanently established.

The Sprague River Valley is about 50 miles long and six miles wide, and every inch of it abounds in rich, fertile soil. A considerable portion is already inclosed. Irrigation ditches are being dug, and the section will be populated and cultivated in a very short time. The entire valley

ount of the best lands in the valley, there are thousands of acres lying idle, and once the reservation is thrown open for settlement by the whites, there will be a great rush, and this will be

S. B. Barker, a prominent merchant and stock dealer, of Condon, was in Arlington Wednesday, on his way to Portland to take in the Carnival. His wife accompanies him. Mr. Barker has 150. 000 pounds of wool on storage, and don't expect to sell till after McKinley is elected, when, he thinks, he will not have to hunt for buyers, and expects a few cents per pound more than he could sell for now. Mr. Barker farms quite extensively, but cuts most of his grain for

J Triggs, Nome of the section will be populated and cultivated in a very short time. The entire valley can be watered, as the river is a good-sized stream at all times, and has a sufficient fall to make irrigation both easy and cheap. Two ditches are just being completed, one 12 miles long and the ing completed, one 12 miles long and the other 15 miles long. Both channels are eight feet wide and two feet deep.

About 10,000 tons of hay are put up annually at present, but in a short time, with abundant moisture, this amount will be increased many times. Little grain is as yet raised, but the crop is receiving more attention each season.

Bly is a stage division between Lakeview and Klamath Falls, being 50 miles from the former and 55 miles from the latter place. It possesses a hotel, a general store, blacksmith shop, postoffice and confectionery store, a saloon and allvery stable.

Horses, cattle and mules of the best grade are raised in the valley. The greater portion of the valley is given to the Klamath Indian reservation, but apparently it is none the worse for this. The Indians have good homes, large, rich meadows; raise good stock, and are mostly educated, and are honest and prosperous. While they occupy a large amount of the best lands in the valley, there are been should be populated and cultivated in a valley in the population of the best lands in the valley, there are being time to the water with the population of the best lands in the valley, there are being time to the proper should be proved as with a population of the best lands in the valley.
