Bluestem is easy at 58c. Freights are inactive, with no disposition as yet on the part of owners to make concessions. The rates now demanded are so close to the point where shipments may be started for Liverpool by rail to Atlantic ports that there will be some hesi-tation on the part of exporters about taking up tonnage until they are forced to have it. More ships are offering, but not at lower rates. There is nothing doing in stops, but a few sales of wool are reported. NEW YORK STOCK MARKET.

Professional Support Was Withdrawn and Prices Suffered.

NEW YORK, Oct. 2.-The professional movement to advance prices, which was the conspicuous feature of yesterday's stock market, was not in evidence today. The promoters of the movement desisted from buying stocks on a large scale, during the latter part of the day they refrained altogether from supporting the market. There was no formidable seliing pressure at any time during the day, and the decline at the last was on very slight dealings, but the market proved so soft that at the close a number of prominent stocks showed net losses of from 1 to 1%, with the tone decidedly heavy. Union Pacific Itself, which was me center in yesterday's movement for the advance, is a point lower on the day much lessened volume of dealings. The stock nevertheless retained a prominent place in the dealings. The extreme dul ness of the whole market at the decline seems to favor the bull party, so that their change of policy was the more dif-ficult of explanation. The factors upon

Possibly the unfavorable aspect of the significance. The only incident of the day which resembled aggressive action by the bulls was the marking up of railroads controlled by the Vanderbilts or affiliated interests, but without any dis cernible influence on the general list. The rate for call money was held at yester-day's high rate. The equanimity of the foreign money market in the face of the threatening approach of exchange to the gold import point finds no adequate explanation, but fereign bankers adhere to the view that gold will not come in spite of today's further decline in discounts.
