## COMMERCIAL AND FINANCIAL NEWS

Another carload of benanas came in from the East, and there was quite a heavy the East, and there was quite a nearly shipment of peaches from Southern Ore-gen. A few sales of heps were reported pression began to be made in the railroad at prices ranging from 13 to 14%c. The list. Selling for Loudon account was an additional factor toward depression. even Eastern eggs are moving quite free-ly at 224c. A carload of Southern Oregon watermelons came to hand and met with ions, but there was on the market. Sugar was resting easy after its violent of the day previous, and no further reductions are intimated at present. The wheat market was dulf and lifeless. There was nothing doing in either wheat or ships. In the European market there was a little more show of strength, but not enough to affect matters locally.

According to Beerbohm's, the world's production of wheat in 1900 will only be 200,100,000 guarters, of 490 pounds each. Last year the product was 231,500,000 quarters, and in 1898, a year of large crops, the yield was \$57,460,000 quarters. The stationary character of the wheat crop is shown by the following statement of this year's yield in the principal countries,

The buils then turned their atten-tion to other quarters of the market, bidding up prices actively wherever any signs of strength showed, in order to support the market and help in the realizing. They found the best field for these opera-tions in the steel and iron group. Various factors combined to give strength to these stocks. The final settlement of the tin plate wage scale was a stimulat-ing influence not only in those stocks, but throughout the group. Sugar and People's Gas were very feverish all day, as a consequence of the cut in refined sugars and the legal stops taken in the gas war in Chlcago. NEW YORK, Oct. 4 -- According to the Iron Age, in its weekly review of the iron and steel trades attuation, a tendency toward weakness has developed in the pig-iron markets, due primarily to the fact that the lowering in freight rates from Southern furnaces has made competition keener from that source. petition keener from that source. This applies not only to foundry irons but also indicating that the smaller sum represent to basic trons, moderate quantities of which have been sold. In the Witchen to basic irons, moderate quantities of which have been sold. In the Pittsburg

rail mills, will soon act as leaders in placing orders for rails, many of the smaller roads considering it safe to follow when they take the initiative.

In the West there does not seem to have been any buying movement as yet. Since it is there that the extension of system is going on we must want for indications from there before the situation can be judged. Our Chicago correspon-dent telegraphs that thus far sales of standard sections aggregate 20,000 tons, which is not large. An interesting item is that Chicago has made a sale of 2200 tons of 26-pound rails to Italy.

Keen Competition Greates a Tendency to Weakness.

Tendency to Weakness. if It had remained locked up at the prea-

ent time. The fact that the new bonds were attractive chiefly to the National banks by reason of the special privileges connected with circulation has been apparent for some time. There has been a constant tendency of the bank bonds to keep within which have been sold. In the Fittsburg district, bessemer pig has sold down to \$12.26, and it is stated that \$15 might be entertained for large lots. In ratisburg there have also been sales of low phosphorous pig to the extent of from \$000 to 10,000 tous.

On general conditions the Iron Age says:
The export trade in pfg iron is light, buyers and sellers being far apart. Only small lots are being placed. A very satisfactory flow of work is coming to the American Bridge Company, which has taken about 40.0 tons of bridge material for the Norfolk & Western Railroad, and 10.000 tons for the Union Pacific Company. 16,000 tons for the Union Pacific Company. Among the orders taken is a lot of 550 tons for a bridge at Manifa, and a round lot of material for carsheds this year at Hayana.

In the steel-rail trade the situation is please as yet. Some of the this year at Havana.

In the steel-rail trade the situation is not quite clear as yet. Some of the anthracite coal roads and some stray New England and Southern lines have ordered facials, in view of the benefits attaching rails, two Eastern mills taking in the agreement of the process.
