poultry market shows more signs of a siderably higher as a result of the day's elemning up than have been apparent for a long time, but the prices received yesterday were not very large, fancy stock alone seiling well. Eggs are very firm, and while the greater part of the sales of Oregon were made at 25 cents yesterday, a few daniers were making an effort opposition appeared to be withdrawn, to force prices up to 27% cents. Eastern are still so plentiful that prices are barely steady at 20 and 22% cents, and wherever possible an effort is made to substitute the Eastern stock for the Oregon eggs. Hay and oats are firmer, receipts being light. Barley is steady for feed. There was but little change in the wheat sliva-tion. The Bast reports a lack of specula-tion, said the foreign markets do not show any signs of strength. In the local mar-hel, matters are about as near a stand-still as they often get in October, which is generally regarded as being near the height of the season. Shipments continue large, three vessels completing their ourgoes yesterday, with all of the rest of the vessels in the harbor working as rapidly as possible, and wheat enough on spot to road them all, and another fleet fully as large. Prices are nominally unchanged at 53 cents for Walla Walla, and 56 centsfor bluestem. Freights are inactive, with no new transactions reported. The steam-er Slam, reported yesterday as taken for San Francisco loading, is reported to have secured 45 shillings, which is lower than the last charter reported previous to her

NEW YORK STOCK MARKET.

Pregular but Active Day's Tending, With Slight Gains Made. NEW YORK, Oct. 18.-There was a very abtive market for all classes of stocks today, in which the bull element early secured the upper hand, and maintained it with growing success throughout the day. The rise in prices was so considerable as to invite free profit-taking during the closing hour of the market. But now and then stocks were picked out for an edvance with such good effect on the general list that it was able to absorb very large amount of the offerings be-

The weather was not very favorable for siderable extent and carrying a few business yesterday, and there was a stocks, including some of the leading in-smaller local trade than usual for Friday. dustrials, below last night. The market Produce receipts were light, and prices was thus made irregular and very active were well maintained in most cases. The but the average level of prices was conwas thus made irregular and very active,

when the course of prices turned clearly in favor of the buils, and some of the interests which were large sellers yes-terday turned to the buying side. A fact which could not escape notice was that yesterday's rumors of further plans of amaigamation of the Vanderbilt proper ties was heard nothing of today, and the concerted advance in the group came to concerted advance in the group came to an end. It was notable, also, that yes-terday's upward rush in the steel stocks was desisted from today, and several of the group ended with net losses, the im-portant exceptions being the American Hoop stocks, the Colorado Fuel stocks and National Tube. Sugar and Peoples Gas were : Tected by realizing. This turn-ing from one point in the market to another is a characteristic of professional operation and manipulative processes which clearly played a large part in today's market, but it was equally clear that the professional manipulation for the rise had large success in attracting out-

side buying.
Special points of strength were Atchison
preferred and the Grangers and Southwesterns, Northern Pacific, Southern Pacific and Manhatian, with the other local traction stocks following in sympathy. The news of the day had little to do with the advance. Preliminary estimates of the week's cash changes of the banks, were decidedly confused. The direct shipments by express to the interior, and the operatrensury indicates a loss in cash of \$00,-000. This takes no account of the gold which has arrived from Europe this week which has arrived from Europe and which is too late to figure prominently in tomogrow's statement. This would throw the effect of the gold imports over into next week's statement. The activity in the stock markets seems to indicate an expansion of loans. But loans on the stock exchange have come largely from the trust companies, which drew their bank accounts to secure their funds. There is thus a possibility of shrinkage in the deposits and consequently in re-serve requirements, which will be to the

advantage of the surplus.

The bond market was considerably more active today and there were some large gains. Total sales par value, \$2,725,000. United States new 4s advanced 14 per cent on the last call.

MORROW'S BIG CROPS.

All Warehouses Overcrowded With Wheat and Wool.

ports, 48,099 bushels; spot, steady; No. 2 red, 79% f. o. b.; 77% elevator. Options, very slow, but firm; steadled on bad news C. A. Rhea, banker and stockman of Heppner, is in the city arranging to place his son Curtis in business college. Mr. Rhen is one of the early ploneers off what is now Morrow County, having vance. March closed 82%c; May, 82%c; Ocgone from Lane County up there in 1865, and settled on the banks of a tributary of Willow Creek which now bears his name. He started in to run cattle on the at that time open to anybody with en-terprise enough to use it, and for years his cattle and horses could lose themhis cattle and horses could selves in the rich meadows or grassy uplands, for miles and miles. After a sheep were introduced and Mr. Rhea was quick to discover that the woolly animals would crowd the cattle and horses out in time, so he bought-a-band

He sold out 10,000 head of sheep last Spring which comprised all he had, and took a brief rest from the sheep business, but this Fall he bought 4500 lambs, again, and proposes to Winter them on his extensive range near the mouth of Willow Creek where he controls several townships of pasture lands. By purchasing the ranches along the living stream for several miles, he was enabled to obfor several miles, he was enabled to obtain control of the sandy uplands in the north end of Morrow County, where the snow fall is never deep, and where long periods of feeding are not necessary. He will keep these sheep until after shearing in the Spring of 1961, and figures on a net profit of \$1 a head on the venture— unless Bryan is elected—when he doesn't

know that he will make anything.
"Heppner warehouses are full of unsold wool," Mr. Rhea said, "and no price can be obtained for it because buyers are afraid there might possibly be a change of Administration and so the wool would of Administration and so the wool would not then be worth what they paid for it. There are fully 1,500,000 pounds on hand, and this much capital being tied up, causes a little stringency among the sheepmen of Morrow County."

He thinks there are more sheep in his portion of Bastern Oregon than ever in spite of the country being settled up by farmers, as the increase last Spring was very large, and there have been no purchasers by outside buyers this Fall. Grass, however, is abundant, and hay stacks are numerous, so there is little or no danger of loss during the sproaching

Winter. Morrow County has also become 'a great wheat producer. he said, and at lone, one of the principal stations on the Willow Creek branch, the warehouses are filled chock-a-block with grain, and piles of sacks as far as from the Perkins to The Oregonian building line the track without any covering on them whatever. The full wheat bags are laid down on boards and the piles are as high as they can be made conveniently from the wagons, and as there are no fears of heavy rainfall at this time of the year,

the sacks are left uncovered.

Considerable wheat is being disposed of by Morrow County farmers though the price is only 41 cents a bushel. Even at this low figure, Mr. Rhea thinks there 500 yards of any stream or spring, shall is a margin for the producer, as farming is not so expensive on Eastern Oregon prairies as in the heavier soils of the

Mileh Cows Are Scarce.

"I never before saw such a demand for milch cows as exists at the present time." remarked W. H. Sayaga, the well-known

dairyman.
"Coming 2-year-old cows that a year ago could be had at from \$15 to \$18 per head, now bring \$35, and are not, to be had readily at that figure. The development of the dairy industry in the Willamette Valley has very materially enhanced the real value of milch cows to the farmer, who does not feel disposed to sell his er, who does not feel disposed to sell his herd at any figure. The demand comes principally from points outside the state. Washington stockmen being especially de-sirous of increasing their herds by the addition of Oregon cattle. Purchasers -do not insist upon registered cattle, but accept first-class stock."

Commenting upon the dairy industry, Mr. Savage continued as follows: "That the dairy industry may prove successful it is equally essential for the farmer to be educated up to a proper and

systematic feeding of his stock as well as the raising of a standard grade of stock. fore any effect began to be produced and the large receipts caused further de-Prices ran off somewhat in the final dealings, reducing extreme gains to a con-slumped to 74%@74%c. Here the market KANSAS CITY, Oct. 19.—Cattle—Re-ford to feed cattle on \$15-a-ton bran and

sell butter fat for 1714 cents per pound. Such management would result most dis-astrously to the dairy business." Mr. Savage went to Corvallis yesterday orning in search of Jersey cattle to said

LORD DURHAM'S ATTACK.

to his fine herd of thoroughbreds, which

It Has Brought on an International Turf Storm.

NEW YORK, Oct. 19.-A dispatch to he Journal and Advertiser, from London, says: Lord Durham's ugly attack on American jockeys and on sportsmen from over the sea, unsupported by any proof, has brought on an international turf storm. The Daily Telegraph wisely declares that it can only be presumed that Lord Durham stoke as he was addressing the Jockey Club stewards, of which he is one,

with a knowledge of much that has gone on which has not yet met the public eye, but which must be known to the powers that be. in the five months that he has been on

"American lookeys are in bad favor with the Jockey Club, but had they hurt the sport in England, would the Prince of Wales just have engaged an American j.ckey to ride his horses?

"American Boys ride to win. They have broken up 'be English jockey ring, about which there was such a cry a while ago. American jockeys are responsible for an

honesty of the English racecourses that was never before known." Lord William Beresford is preparing a rebuke to Lord Durham, and will engage for next season Wishard, Mr. Drake's trhiner, to succeed Huggins, his present American trainer, who wants to make a visit home, and will also engage the Reff

boys for next season.

The Earl of bonedale has cabled to the Journal and Advertiser from Penriih, Wales, respecting Lord Durham's much-discussed speech at the Jockey Chib meeting relative to American Jockeys in

England. He says:
"I regret that I can, with a most un biased and independent feeling, inderse all that Lord Durham said. I have thought and said openly for some time that I considered the turf in England in a worse state at the present time than it has ever been in my recollection. I do not imagine for a moment Lord Durham meant by 'American jockeys and their following' that that following was necessarily America. There also have been more dents than I ever remember, and tribute this to the presence of American

DAILY CITY STATISTICS.

That was about 25 years ago, and he has made money out of his flocks ever since, except during what are known as "Cleveland times," when wool wont down and wethers went begging for buyers. Mr. Rhea has previously voted the Democratic ticket, but the disaster of 1883 caused him to change his mind and in 1896 he voted for McKinley. He is not a full-fledged Republican yet, however, and said yeaterday at the Perkins that, he did not propose to vote at all this time. He can't go Bryan because he doesn't want free silver, and "I can't vote for McKinley because he lets Hasina, run him." Thus, unless he changes his mind, Mr. Rhea will stay at home on the 6th of November, and let his neighbors fight it out. Real Estate Transfers. 123
