Royal Italian Marine Band.

Says the Philadelphia Press: "After closing a nine weeks' engagement at At-lantic City, the Royal Marine Band, of

Italy, made its first appearance at Willow Grove Park, Philadelphia, on Saturday,

July 25, in the presence of the greatest crowd gathered in that beautiful resort this season. The name that had preceded the band from Atlantic City had excited

public curiosity to the highest pitch, and

it may be said that every expectation was more than fully realized, for the Royal Marine Band, before it had finished

its first programme, had made the repu-tation of being the greatest musical or-ganization of the kind ever heard in

CASE OF SMALLPOX.-Dr. Zan, City Physician, opened the posthouse yesterday to admit a case of smallpox. Jesse Martin, who has been working in the Southern Pacific freight sheds, was found in the secondary stage of the disease, at his lodgings near the corner of Second and Madison streets. He had been under reatment by a physician for several days but the real cause of his illness was not suspected until everyone about the prem-likes had been more or less exposed. Dr. Zan at once took steps to fumigate and quarantine the building and vaccinate the invasies, while the men most exposed and quarantine the building and vaccinate the inmates, while the men most exposed to danger in the Southern Pacific sheds were also vaccinated. Martin arrived in Portland two weeks ago from the Big Bend country in Central Washington, and does not know where he contracted the complaint. He had a partner, also named Martin, but this man has since disappeared from the city. The exposed premises will be carefully watched, and new cases, if any occur, will be quarantined in cases, if any occur, will be quarantined in their incipiency. The pesthouse had been closed for over a week, and this is the

METHODIST PREACHERS' MEETING.-The Methodist Episcopal preachers of the city and vicinity met yesterday at 10:30 A. M. at the Y. M. C. A rooms, the Rev. W. T. Kerr in the chair and the Rev. H. B. Elworthy, the secretary, presiding over the records. The devotions were led by the Rev. A. L. Hawiey. The Rev. G. S. Raeder. Raeder was introduced to the meeting. The Rev. S. E. Messinger made an address on "Our Weak Churches-Their Fudress on "Our Weak Churches-Their Fu-ture." The speaker said strong men should be sent to the weak churches, but the strong man is inclined to say, "let the other man go," if there be no prospect of a comfortable support. Bishops, distin-guished men and presiding elders should rather favor the weak churches than the strong ones in their victorius. strong ones in their visitations. People living near the weak churches should be encouraged to attend and be members of them rather than to go down town to churches aiready strong. In the discussion that followed the thought was advanced that down town churches would expire if they did not have a constituency in all parts of the city.

This is a very convenient place for shooting, as there is cheap and quick transportation and the company runs a trailer about the time shooting is over bring home bunters-men, dogs, guns and game. Saturday evening the trailer was well loaded. On Sauvie's Island at organ's a flock of seven swan, the first of the season, put in an appearance, and three of them were killed. The young ones were very plump and weighed 18 pounds each. A number of geese were also shot and specimens of many vari-eties of ducks, but no canvasbacks. Quite a string of canvasbacks was received yes-

been granted H. Pease, of this city, for a very ingenious and useful invention, which is intended to be attached to any kind of a lead pencil. It is the evolution of the pencil attachment holding a rub-ber graser, and is a combination pencil wharpener pencil expect the graser of sharpener, pencil eraser, ink eraser, en-velope opener, and a guard for the pro-tection of the pencil point, all in one, and occupying but little more space than the ordinary lead pencil. A small and inge-miously formed steel blade, finely tempered, and with three cutting surfaces, forms a really serviceable pencil sharpener, an envelope opener that really opens envelopes, and an ink eraser which is as efficient as any made. Mr. Pease calls his invention "The Little Wonder," and the name is a very fitting one. Although a patent has been granted him, he is still contemplating improvements on his invention, which for such a small article is a model of ingenuity.

INTO TROUBLE OVER NUPTIAL GREET-ING.—A traveler writing to The Oregonian from "On the train, out of Chicago, October 25," sends the following: "One week ago today two sober married men with families in Pennsylvania were passing through your city north via the Northern Pacific Railroad. At the station we had our trunks checked to Chicago. There was a bridal couple took our train. A number of friends came as far as the depot with the usual rice, old shoes, etc. Not being satisfied with the rice, they attached the shoes to the baggage. Now. I am trying to explain to my wife what I was doing with ladles' shoes attached to my trunk. I tell her to keep them to spank the baby with."

THE CANNOT BE TRANSPORTED.—The low stage of water on Lewis River has interfered with the transportation of railroad ties, a wast number of which are shipped from the mills near La Center, and these mills are now fairly surrounded by piles of ties. Ham, Nickum & Co., who have been transporting ties from Lewis River to this city by taking advantage of a sudden rise in the river, succeeded in getting several barge loads out, but they are still lying at the O. R. & N. Co.'s incline, there being such a demand for cars for carrying wheat that none can be spared to load the ties. The river fell as suddenly as it rose, and no more barges of ties can be brought out till it rises

Scauck Fon Higher Wages.—Matters at the city garbage crematory have been running smoothly for a long time, but now there is trouble shead. The foreman and the night man, who have been re-ceiving \$50 each per month, have struck for an increase of wages. The foreman wants \$20 per month and the night man Fig. It is now up to the Board of Public Works to say whether the increase shall be allowed or not, and they will have to take quick settion, as the question is to be decided by November 1, when it is demanded that the new schedule go into effect. Notwithstanding the attenuous effect. Notwithstanding the strenuous opposition of the then Mayor Pennoyer to the style of crematory adopted, it has so far as known proved a success in every respect, and not a single case of asphyxiation has been caused by it, and since it was regularly in operation there have been no complaints about foul odors proceeding from it. This strike among the employes recalls the circumstances con-nected with the purchase of the crematory site and how Mayor Pennoyer saved the city \$500 by refusing to authorize the pay-ment of the bill, unless it was reduced from \$5000 to \$7500, and the reduction was made. FINE SAMPLES OF WOOL.—Two cards of specimens of wools have just been added to the permanent exhibit of the Chamber of Commerce, having been presented by of Commerce, having been presented by R. Scott, of Milwaukle. There are samples of combing wool 18 inches long from Cotswold sheep; some very fine samples from Cotswold and Dorset lambs, and a sample of remarkably fine fiber from cross between Dorest and Merino. Co onel Dosch says these samples are better than anything he has had before. They are just what he wanted and he is very proud of them, about as proud as Mr. Scott is. He says it is a good thing to have the Food Commissioner and other officials in the same room with him. A day or two ago some people from Clack-amas County called on him to inquire if he knew of any one who would put up a creamery in their neighborhood if they would furnish him with the product of 300 rows, He did not know of any such person but turned the visitors over to Food Commissioner Balley, who soon found him the man they wanted.

FOR THE PUBLIC LIBRARY.-Mrs. Orvilla Pratt, superintendent of the free library who is full of enthusiasm for the work, will make a canvass of the city among those who are holding salaried positions, in the hope that each one of these is sufficiently interested in the library to give a small sum—anything from a dollar up—which will be enough to buy one book. In this way the 2000 volumes already in the library should be greatly in-creased. The books will be opened to the public for circulation in a very short time now, as the work of cataloguing is almost finished. And it is expected that this will greatly stimulate public interest in the good movement of giving free knowledge to the masses. Let everyone who is earning a salary contribute enough money to buy one book, in return for the hospitality of the reading-room and the free use of the 2000 well-selected

MANUFACTURERS' ASSOCIATION: - The Manufacturers' Association will hold its annual meeting tonight at 8 o'clock in Allsky's Hall, corner Third and Morrison streets. Reports of the officers will be received for the year just closing and eight directors will be chosen to succeed the retiring directors whose terms of office expire. After the regular business meeting a smoker has been arranged, re-freshments will be served and the members given an opportunity to become better acquainted and exchange views and ideas as to the best method of increasing the sale of goods made at home. All refreshments and cigars used in the smoker will be "made in Oregon," so the members will be practicing what they advocate. A general good time is anticipated and the members and invited guests

are expected to be out in full force ROCK FOR BARNES' ROAD .- Bids for supplying crushed rock for the repair of the Barnes road from the City Park to Mount Calvary cametery, were opened by the Board of County Commissioners yesterday. The bid of James Frainey, \$1 15 per yard, being the lowest, the contract was awarded to him. The work of repairing the road will be commenced at once, as it is in very bad condition.

President of Our Sister Republic Secures a Fine Plano.

The choice by President Diaz, of a Kimball plane is the latest acquisition to the long list of honors to the big Chi-cago concern. The Chief Executive of the Mexican Republic ordered his plane through Otto & Arzoz, the Mexico City dealers and Kimball representatives. President Diaz has expressed his delight with the instrument, and his wife, who is an expert planiste, adds her approval to that of her distinguished husband. With a Kimball in the White House, at Washington, and a Kimball in the Presidential palace of the sister republic, the possibilities of conquest are narrowed to an invasion of the throne rooms of effete monarchies. And that, too, has begun.—New York Musical Courier.
