FIRM FOR THE GOLD STANDARD

Strong Democrat Who Is Not Disturbed by Imperialism or the Dread of Militarism.

Sanderson Reed is a Democrat, and when his party is right on great questions he wotes with it. Four years ago he re-pudiated Bryan. This year he had hoped to go back to his old party, and he would have done so had it not gone daft at Kanas City. When the nominations were my e he plainly saw that it was 1986 ever sgain, and announced that he would vote for McKinley. Asked his reasons vosterday for supporting the Bemblian.

osterday for supporting the Republican icket, he said:
"As to the financial question: There cannot be two standards or measures of values, as there cannot be two measures for a bunkel of wheat. The legal tender and the value of things of the country smust be based on one measure. The plan of two standards or measures of value is no more attractive to me than are individuals with two rules of conduct, two standards of right, one to be invoked for their own protection or profit, and another by which they misjudge every one size, one standard by which they are always right and another standand by which every one else is always wrong. I am more positive on this point now than four years ago. "As to trusts: I blink the man who has

brains enough to organize and handle large interests should not be denied the right to was his ability, so long as he does not try to acquire a legal monopoly. lilegal trusts, or monopolies, in the course of time will be limited as far as laws car limit such matters. But they belong to no purty. They are the offspring of no party or parties. Prominent men in both parties are interested in trusts, which are merely corporations with an unusually large capitalization.

As to imperialism: I suffer from an inability to understand what this term implies. Discussions of imperfallem, ar-guments against imperfallem, have no place from which to start; they reach no conclusion. What constitutes the danger to the United States in connection with imperialism I cannot learn. If Mr. Bryan sees this danger, it is surely hard to de-scribe, for it is not stated in his speeches so as to be understood.

"As to foreign entanglements: This country received its independence from foreign entanglements and as soon as it avoids foreign entanglements, through fear or indolence or otherwise, it will lose its independence and become subject to a braver nation. A country may no more avoid foreign entanglements than a man can human entanglements. There is just one influence in international mat-ters, and that is force. One hundred and twenty-five years ago we begged aid of Spain against England, and to some extent got it. At the same time we were also begging aid from Prussia. Three years ago we fought Spain, and when German warships were uncivil in Manile Bay, it was pleasant to know that by ticular time, at any rate. Should we ever have to fight England, it will be the business of our Secretary of State to entangle Russia on our side, and I believe we can do it. I am a believer in a single standard in this matter, also, I have no

standard in this matter, also. I have no ties with any other country—there is just one standard for me in this—and that grandard is the United States.

"As to the judiciary. "The United States Bupreme Court is in my opinion the great-est tribunal on earth. To discuss the evil effects of what I consider an unfounded attack upon it would consume for much time and space. About the worst that time and space. About the worst that can be said of it is that it is human, and not infallible. On this point it is not clear that Mr Bryan can furnish any improvement. Our Federal Courts are improvement. Our receral courts are composed of men appointed as Democrats as well as Republicans. It is not valu-giorious to say that no courts stand higher than the courts of the United Biates the world over. In short, I resent an attack on the courts, and am prepared to support the courts, regardless of party. "As to militarism: It is weary work try-

ing to discover danger to this Republic from our Army. I heartily trust Congress will increase our Army in order that the Philippine Islands may be quickly reduced to order. When that is done there will be opportunity for defining a policy with regard to them."

Agent Barker's Month in the East-View of Politics.

A. G. Barker, general agent of the Chi-

Mrs. Barker and their daughter went East with him, but they remained to visit several weeks with friends in Minnes to 'We found a great deal of hot weather marvelous railroad activity and general prosperity back there," said Mr. Barker to a reporter, "Most of our time was spent in Wiscensin, our old home, but we also visited in Hilnois and Minnesota. There is a great deal of interest in the election. Confidence in the election of McKinley was general, but the very possibility of Bryan has an important effect on business. I saw Senator Spooner a few days ago when he had just returned from West Vincinia. He and I have been in-timate almost from bothood, and d was easer to get his real opinion of the doubtful states. He said he believed West Vir-ginia would be safe, and that New York and Indiana would also go Republican. I also saw William F. Vilas in Madison. and I have no idea he will vote for Bryan. Bob LaFellette is making a magnificent canvass for Governor, and the chairman of the Wisconsin Republican Committee told me he thought the state would give a Republican majority of 12,600 votes. Bryan has absolutely no show there. They've been waking up in railroad-building back there in the past few years. All the big lines are making improve-ments in track and rolling-stock and general facilities for business. I noticed this more particularly on the Madison division of the Northwestern, where I was familiar with conditions for many years. The line is now double-tracked for a stretch of 213 miles toward St. Paul to Elroy Junction, and in all respects is up to or above the standard we used to think only possible on a few rands in the far East. #### LOOK OUT FOR BRYANITE TRICKERY

Democrats, Driven to Desperation, May Be Expected to Do Questionable Work.

George A. Steel, chairman of the Republican State Central Committee, has received the following telegram from Perry S. Heath, secretary of the Republican National Committee:

"Chicago, Oct. 30 .- Evidence is already appearing that the Bryanites have already arranged to circulate from day to day until the election every conceivable report, rumor and statement which may prejudice voters against the Republican candidates. Please immediately notify your county chairmen, and through your state newspapers establish every safeguard by forewarning. In the suit of M. M. Bloch against the City of Portland to recover firemen's claims, Judge Sears yesterday decided that the complaint does not show that there was a proper presentment of the claims to the Board of Fire Commissioners, and therefore that there was no cause of action alleged. The statute provides that such a claim shall be presented to the Secretary of the Fire Com-missioners with the necessary evidence in support of it. The allegation in this case is that the claims were presented to the board and rejected by the presi-dent of the body, and this the Court held was insufficient. Judge Sears decided that when a statute provides that a claim must be presented to a particu-lar officer it must be done that way, and that the authorities so hold. If Mayor or Auditor is mentioned, it will not do to aver that some other official was waited upon. The decision was ren-dered on the demurrer to the third amended complaint, which was sustained. and would be fatal to plaintiff's inter-est if he could not make a further showing. This he will do, however, as his atorneys asked leave to amend and will plead that the claims were in fact pre-mented to the Secretary of the Board of Fire Commissioners. This will make the complaint good, and the matter will then be a question of proof upon the trial of vancement, and all are fairly awamped the case upon its merits.

Collector's Decision Final.

Judge Bellinger perterday rendered a decision in the matter of the habean-cor-pus cases of Lu Ping and Lun Tow. Petiners are Chinese boys 18 and 18 years of age, respectively, who were refused permission to land here by Collector of Customs Patterson. They have certifi-cates of their student character, vised by the American Consul at Canton, which conform to the requirements of the act of Congress in respect to the admission of persons of this class, but were refused admission on the ground that the evidence produced by the boys was insufficient and unsatisfactory to prove their right to land. It was contended that so right to land. It was contended that so far as the fact in these cases was con-cerned there is no question about it; that the statute decides that there is nothing left for decision, but the Collector has de-cided that there is a question for de-cision, and his decision is final. In other words, the law has charged the Collector with the duty of enforcing this statute, and the fact that he disregards it does not invest the course with jurisdiction to not invest the courts with jurisdiction to enforce it.

John Mock Consents That the Boad Go Through His Land Under Cortain Conditions.

It is now considered reasonably certain that the railway spur from the O. R. & N. will be built to St. Johns by next July. He had been censured, he said, for refusing a right-of-way, but remarked that he had been asked to donate right-of-way through his land without any restrictions or advantages, and with conditions that he could not accept, but under the present form it meant business to that section.

The proposition which was acceptable to Mr. Mock was in this form: It is proposed to Mr. Mock that Wolff & Zwicker will expend 130,000 at St. Johns toward the construction of shipyards by July next. This firm secured the first of the year about 39 acres of the Minar

the year about 39 acres of the Minar tract, 10 acres of which is on the Wil-iamette River, for the purpose of estab-lishing a large shipbuilding plant. Mr. Mock wanted something of a definite character, showing that the railway would be built, and that the enterprises that had been talked of would be started before he would tie himself up to any proposi-tion in the form of a right-of-way. He said yesterday that a large shipbuilding plant would help him very much. It would build up that entire section. It would build up that entire section. It would also help others on the peninsula. Under this view, he said he would donate the right-of-way, as he could see a favorable outcome. The proposition was that \$100,000 would be expended by May, but Mr. Mock said he was willing to extend the time till July.

The interest that has been aroused in archaeological studies by the Alpha Archaeological Society at Fairview among the young people of that neighborhood is remarkable. While social in object, it is much more. Papers are read bearing on history and research. At the first meeting in October an exceedingly interesting paper was read on Naming of Mount Hood" by F. Conley, which showed much thought in preparation. At the meeting held Monday evening last W. John read a paper on "The Pacific Northwest Chronology," that was very creditable to the writer. At each of evidence on every hand. To illustrate this point, perhaps statistics obtained in Jefferson County, Wistonsin, will best serve my purpose. This county has a population of about 60,000 people, and there are 40,000 cows kept in the county, yielding an annual revenue from akim-milk, butter and cheese of 32,000,000. Before the advent of dairying there, grain-growing was the principal agricultural industry. Durform the outside many valuable specimens went of dairying there, grain-growing was
the principal agricultural industry. During this period the average crop of wheat
dropped to about eight bushels per acre
and 30 per cent of the farms were mortgaged. Since the introduction of dairying the average yield of wheat has been

The phenomenal growth of the industry in this county is largely due to the personal efforts of ex-Governor Hoard and to the influence of his splendid paper, Hoard's bairyman.

"After investigating the dairying industry here, my convictions are materially later. At present the object is to increase it as much as possible. Meetings are held twice a month. Rev. W. T. Scott. The job of moving the building of the Portland Rowing Club to the new pontoon at the east end of Morrison-street bridge has been accomplished. It was finally landed vesterday on the new float with-out accident. The building will now be fixed up in good condition.

Fred Keenan, the attorney, is still in the Good Samaritan Hospital with serious illness. He has not improved as it was hoped he would a short time since. There are times when there is improvement, but it does not last long. His brother, A. L. Keenan, said yesterday he might have to remain in the hospital till the first of the year. The sick men contracted his filnoss at Nome, but managed to reach home before there was anything serious.

### Reasons Why We Are Successful.

Our Success Can Be Traced to Our System of Employing the Best Talent That Can Be Procured.

The public may not be aware that the best talent in the Dental profession is in the market today. But such is the case. For instance, we have in our employ an operator and also a mechanical man who, so far as we have been able to ascertain, are the best that can be procured anywhere,

What is true of these two is also true of all in our employ. If we found at any time more capable men, we would at once employ them without regard

The public will at once see that our method as described gives better pro fessional services than can be given by an anti-advertising office or the private practitioneer or an anti-advertising dentist, who gives you the services of the one individual dentist, who will remain stationary in his methods. Even though he gives you the best services he is capable of, yet he has not the choice of his proession to select from, as is the case with the New York Dentists.

The above facts contain the secrets of our unparalleled success.

Grand Trunk Sold. PORT HURON, Mich., Oct. 31.—The Chi-cago & Grand Trunk Railroad was saig at noon today under first mortgage fore-closure proceedings, brought by the Mercantile Trust Company, of New York, in accordance with a decree of the United States District Court. General Manager Charles M. Hays and E. W. Meddaugh, of Detroit, representing the stockholders, were the only bidders, the road being sold to them for 15,708,701. Of this amount 15,437,000 represented the mortgages, and

THE DAILES, Or., Oct. II.—The general merchandise store of W. A. Johnston was burgiarized last night, and about 200 worth of knives and revolvers taken. The thieves effected an entrance through a rear window, helped themselves to the goods in the shownesses and exceed the goods in the showcases and escaped unmolested. There is no clew to their iden-tity. This is the fourth burglary of merchandles of this character which has

taken place in The Dalles within a year. Every day increases the popularity and sale of Carter's Little Liver Pills. The reason is that when once used relief is sure to follow. Don't forget this.
