COMMERCIAL AND FINANCIAL NEWS

tion of positry there are no signs of weakness. In the grocery market, the most interesting feature just at present is the renewal of the war between the sugar magnates, and yesteriary the local market followes the decline in the East, and prices are a % of a cent lower all around. The wheat markets in the East were still weak yesterday, but the Pacific Coast markets were apparently holding their owns. San Francisco abowing a ing their own, San Francisco abowing a fractional gain and the local market holding steady. There is nothing new in the freight situation, although distant ton-mage is offering more freely.

NEW YORK STOCK MARKET.

Buoyant Tendency in the Industrial

and Specialty Departments. NEW TORK, Nov. 5.—The stock mar-ket showed the effects of some unset-tlement of yesterday's buoyant convic-tion of speculators and the growth of an approhension that the rise in prices at the pace set yesterday might find an early culmination. The more conservative ele, ment made their influence felt from the opening, and at one time during the day brought the advance fairly to a stand-still. Firmness of the undertone of the market at that time was very striking. it was shown quite conservatively that the large holders of stocks were not particularly nervous over seeing the rise in prices checked. Even those who are willing and anxious to sell out on an upward tide showed a determination to hole at any lower level. A very buoyant ten-dency then developed in the industrial and specialty departments of the list. The localized character of this strength, with the absence of any special news to ac-count for it, gave ground for the sup-position that the powerful manipulation was siding it.

The success that was accomplished by the manipulation invited renewed specu-inition in that quarter by outsiders, and at the same time served as a powerful sustaining influence for the rest of the market. Under cover of this support, profit-taking went on on a heavy scale. Except for sudden advance in some of marked. Under cover of this support, profit-taking went on on a heavy scale. Except for sudden advance in some of the best since ISO was a depressing far tor. the recent large shipments from the taking with the destination of the usually active railroad stocks, the released in the day. Pennsylvania was marked but the day. Pennsylvania was marked but at one time to 160, but it held there sally momentarily.

The price remained above last night's for export. Shorts boveted and a recovery Kansas City, Nov. 3.—Cattle—Re-

Business has settled down again since | level, but was unable to get back to the the excitement of election has subsided, and in all lines excellent reports are heard. Well as the stocks of rallroads affiliated with Pennsylvania, which were so constructed than they have been before this month, and there was also a fine trade with the city rethilers. Produce receipts were again liberal, but with the exception of poultry there are no signs of tweakness. In the grocery market, the most liberastine feature that at present which are always favorites with the specialties, which are always favorites with the specialties. which are always favorites with the speculators, rose buoyantly on enormous desi-ings. One or two of them had been below last night's close early in the day, notably

Sugar, which broke 18 at the opening.
The late upward movement carried Sugar, Peoples Gas, Manhattan, Brocklyn Transit, Metropolitan Street Railway, Pacific Mail and American Tobacco from 2% to searly 6 points. Yesterday's enormous buying of Northern Pacific was explained by today's 'declaration' of the extra divi-dend of 1 per cent on the common stack. The omission of this dividend in August, when the regular semi-annual dividend of when the regular semi-annual divident of a per cent was declared, was considered a very ominous sign of the prospect of nurtalled earnings for railroads. Foday's action is accepted as showing restored confidence in the maintenance of earning power of railroads, but it does not save the stock from a charp reaction on reconstitution. profit-taking. The steel stocks were ir-regular, Steel & Wire and Pressed Steel showing reactions, while other members

Foreign Financial News. NEW YORK, Nov. &-The Commercial

Advertiser's London financial cablegram re was a more general business the markets here, including a revival in home rails, which spurted on closing of bear contracts on the news that commer-cial contracts have been made at a re-duction of 6 shiftings.

duction of 6 shillings.

Americans were less excited, but still very active, large lines changing bands on professional dealings. The public and the Continent is still standing aloof, London took profits all day, while New York bought, thus causing a see-sawing market. Money was harder on the withdrawal of £1000.000 war loan installment, and the impending hig payments on exchequer bonds and treasury bills. Silver fell a farthing, which was popularly attributed to Bryan's defeat, but principally owing to the fact that there was little demand in a narrow market. demand in a narrow market.

IRON AND STEEL.

Buyers Have Been Busy Placing Orders Since Last Week. CLEVELAND, O., Nov. 8.—The iron Trade Review this week will say: Buyers of iron and steel have been may placing orders in the past week, and It has made a greater record than either of the two weeks preceding. Chicago leads as a buying point, with 60,000 tons of pig-tron closed, 180,000 tons of rails and 20,000 tons of plates, and every form of finished product sharing in the movement. One firm handling Southern pig-iron has booked 50,000 tone of basic iron in the

From all quarters come reports that buyers have been placing orders in the belief that the simultaneous demand gen-erally expected after November 6 might produce higher prices. The fact is that in some cases where furnace companies have been selling at a loss, plg iron prices advanced 50 cents in the past week, this being true of some Southern Ohio and Alabama trons. On the other hand some of the Chicago business; which includes contracts running into next year, was closed at bottom prices. In the Mahoning and Shenandoah Val-

leys the buying movement has been at-tended by unchanged prices. In general the furnace interests have now taken a firmer stand, though no material advance is looked for in the near future. Following the load of the plate mills, the manufacturers of steel bars have planned a meeting to establish a uniform price. The better feeling in all parts of the market and the advance in steal billets, which manufacturers argue is fully justified by the recent buying move-

ment, are counted on to dispose of most of the remaining opposition to the \$25 price for rails. The Metal Markets. NEW YORK, Nov. 8, There was little or nothing doing on the metal exchange, and the price movements were almost of a nominal order. Cables and news from primary points lacked feature of incen-tive importance. At the close the metal exchange called pig fron werrants quiet at \$9 00@10 00; Lake copper, quiet at \$16 7 617 60; tin, dull and nominal at \$25 00; lead, quiet at \$4 37%, and spelter, quiet at

\$4 10674 15. The brokers' prices for lead was given at \$4.00 and for copper \$18 75/216 \$7%. Bar allver, 63%.

SAN FRANCISCO, Nov. 8 .- Bar silver

LONDON, Nov. 5.-Bar silver, 29 7-16.

New York Cotton. NEW YORK, Nov. 8.—Cotton—The market opened at an advance of \$900 points, and further advanced \$822 points, chiefly on covering, although there was considerably more attention paid to cot-ton by the investment class. The unward movement of prices here was accolerated by better accounts from New England and Southern spinning sections, and also from cotton goods markets. The rally was checked by selling for profits, and moderate short accounts. The general characteristic of the local market, however, was desidedly better. The frost predictions failed to unnerve shorts, while at the some flipe creating many new friends for the market in speculative cir-cles. The close was steady, with the net advance reduced 18821 points.

Coffee and Sugar. NEW YORK, Nov. 8 .- Coffee-Options closed steady, with prices 10 to 15 points net lower; sales, 28,750 bags, including \$7 10077 15; Flebruary, \$7 200 725; May, \$725; June, \$725. Spot-Rio, easy; No. 7 invoice, \$5%c; mild, quiet; Cordova, \$448134c. Sugar-Raw, barely steady; fair refin-

ing, 3%c; centrifugal, 95 test, 4%c; re-OUR BEET SUGAR.

Industry Seems to Be Able to Thrive Without Bonuses.

New York Journal of Commerce A year ago the Sugar Trade Journal estimated that the amount of beet sugar that would be made in the United States in the year 1839-1900 would be 110,000 tons. The two large items in this computation were 45,500 tons from California and 31,-000 tons from Michigan. But California suffered from drought, and the best crop year of the industry in that state. In 1828 there was but one factory: in 1829 there were nine, but the farmers did not know how to rulse beets. Some of them selected sandy foil, the fact being that the best soil is none too good. One farmed the place of the place er's crop was apparently in splendid con-dition; the plants were firstly and the soil was perfectly cultivated, and there was not a weed. But he had not thinned out the plants, and there was not a root that weighed over three-fourths of a pound. The whole field was practically worthless. The result of the losses in California—where the conditions generally are more favorable than elsewhere, but the crop is an uncertain one—and in Michigan cut the beet sugar production of the past year down to 72,944 tons. This is about the same as the production of the two preceding years together, but it is only about 3½ per cent of the consumption in the United States. The domestic came sugar is about 8 per cent of was not a weed. But he had not thinned mestic cane sugar is about 8 per cent of the consumption, but this is a variable percentage. There have been great flucuations in the Louisiana crop. For the coming year the prospects in California and Michigan are excellent and the raising of beets and the erection of factories are spreading elsewhere, and the rapid growth of the business is cer-

A report just issued by the Department of Agriculture shows that there are in the country 30 heet sugar factories, with a daily capacity of 19,100 tons of beets. If they ran an average of 60 days they would work up 1,16,000 tons of beets and THE MODERN APPLIANCE — A positive would work up 1,16,000 tons of beets and THE ATMENT CURES was without marked. a daily capacity of 19,100 tohs of beets. If they ran an average of 60 days they would work up 1,16,000 tons of beets and would produce, at a rough approximation, 114,300 tons of sugar. In Europe the beets cost as much to raise as here, and there are well substantiated statements showing that they cost more. But in Germany neven tons will make a ton of sugar, and safe Deputit Entitling. Sentile. Wash

Chamber of Commerce BOTH TELEPHONES here it is exceptional when less than it

> The profits of raising sugar beets are so much greater than the profits of rais-ing common crops that the wonder is that farmers are not rushing into the business more rapidly. But farmers are conservative and they have little capital, and the agent of the department is probably correct in saying that many formers are afraid to undertake a crop that will cost \$30 an acre. Reports received in this state are generally higher than this, but the culture here is very new; the cost is put below \$30 an acre by most men of experience in best raising. The agent of the department given as very moderate figures a production of 12 tons to the acre-it is often 15 and sometimes more acre—it is often is and sometimes more-than 20—and a price of 24 a ton—jon-erally exceeded—making gross receipts of 343, much more likely to be exceeded than not, and expenses of \$30, in which there is \$2.50 a day for the farmer and his team and \$1.50 a day for his hired labor, leaving a clean net profit of \$15, and probably ware, which is a good deal and probably more, which is a good deal

> over the gross receipts from an acre of wheat or corn. No business needs less artificial fosterting, but if a man can get a bonus of \$6,000 to \$200,000 from a community for establishing a sugar factory in its town he will hardly refuse it. The department's agent says there is no occasion for offering a bonus, and he issues a warning against men who undertake to establish sugar factories, not for the pur-pose of making sugar, but to been a own and sell real estate. The policy of state bountles has had a hard time. In Nebraska and Michigan the claims of the manufacturers are pending in the courts: Legislatures have ceased to appropriate money for bounties. In Illinois the Gov-ernor vetoed a bounty bill. Minnesota passed a bounty law over the Governor's reio. Iowa has exempted sugar factories from taxation for 10 years. Bounty leg-islation has recently been defeated in Wisconsin, Indiana and Pennsylvania. Under various conditions bountles ent a pound are paid in this state. South Dakofa, -Mignesota and Washington.

"Voting" Among School Children. To R. R. Warren, Chairman Board of Education:

Why do you permit little children who have no knowledge of their own to cast a ballot for one of the popular parties for the election of President of the United States? I personally know of two little nieces of mine who thought of becoming popular with their classmates, were la-beled with McKinley badges and in the election at school cast their vote for Me Kinley. We at home never talk politics, and those two little innocent girls, not knowing what they were doing, simply represented a false impression. Now, you and your cohorts are trying to coerce young school children in Repub-lican politics. HENRY GRAY. HENRY GRAY. Portland, Nov. 7.

Decaying vegetation at this season breeds disease. Hood's Sarsaparilla will keep you well.

bie Vitaliser, the prescription of a famous French physician, will quickly cure you of all nervous or diseases of the generalive organs, ruch as Loaz Mannood, Insonania, Pains in the Buck, Seminal Emissions, Nervous Debility, Pimpleo, Undiness to Marry, Enhansting Prains, Variouseele and Ganstipmiton.
