OUTLINE OF WORK

Plans of Washington Deleegates in Congress.

SENATOR TURNER ON SUBJECT

Appropriations for Public Buildings at Seattle, Tacoma and Spokane, Mint at Tucoma and Ship Canal to Be Urged.

WASHINGTON, Dec. 4.-If the Wash ington State delegation accomplishes all of the important business that now confronts it during the three short months of the present session, it will have but little time to waste. Senator Turner, re-

viewing the proposed legislation for which he and his colleagues will strive, said: "We hope and expect to secure appro-priations sufficient to warrant the con-struction of public buildings at each of our three leading cities Scattle, Tacome and Spokane. At present Washington is without a public building of any sort, and even with these three buildings would not be as well provided for as its population be as wait provided for as its population commerce and conditions merit. There is already available a small appropria-tion for the Seattle public building, but this has been found altogether inade-quate, and an attempt will be made this Winter to have a total appropriation of \$750,000 made for Scattle. This amount will insure a building which will meet all present demands of the Courthouse, Custom-House and Postoffice, and will another the courthouse and postoffice. swer for many years to come, and at the same time will insure a building that will be a credit to the city and the state. "Tacoma is now worse off in this way than any of the other cities of conse-

quence, and, in addition to attempting to get an appropriation of \$750,000 for a pub-lic building to be located there, I shall endeavor to secure favorable action on my bill to establish a mint at that city. bill for Spokane calls for \$450,000 which will erect a structure large enough to fulfill all requirements. The short session is generally the time when public building bills go through, and if we do not succeed in passing all these bills I am quite confident we will at least get the full allowance for Scattle.

In the last session, our over-zealous friends, in their haste to secure a mint at Tacoma, retarded, rather than assisted in securing favorable consideration for that bill, and drew forth from the Secretary of the Treasury a letter, in which he opposed the project. Conditions have changed since this proposition was first made, and I shall call upon the Secre-tary, lay the case before him in its true light, and endeavor to secure his indorse-ment. I have interviewed the Director of th Mint and other officials, and have been red by all that a mint at Tacoma would in no way antagonize the existing assay office at Seattle. I, of course, do not wish to build up an enterprise in one city which will work to the detriment of the other, but I am firmly convinced that the mint and assay office at different cities will not conflict in any way. We want but \$300,000 for this mint, a sum both modest and entirely within reason. I shall impress upon Secretary Gage the fact that the Canddian Government is to es-tablish a mint at either Vancouver or Victoria, intended largely to coin the gold brought down from Alaska and the Klon-dike, and unless we have a mint at Ta-coma, American gold to the extent of from \$25,000.000 to 200.000,000 a year with find its way to the Canadian mint. This is a new question which has just arisen, and should be a forcible argument in faver of the Tacoma bill. "As new questions have arisen in cor

tion with the Tucoma Mint, so have w questions arisen in connection with Lake Washington Canal, for which we already have something like \$350,000 now unexpended. Actual work on this project has long been delayed, but is at last under way, and I shall endeaver to secure an additional \$50,000 for the coming year, and a like amount for each succeeding year until the project is com-pleted. When this scheme was originated some years ago, it was generally believed that it was created merely in the interest Sound, the upbuilding of its naval sta-tion, and the promise of a greatly in-creased trade in the future demands just L. D. Walker, one of the owners of the ed trade in the future demands just a fresh water harbor as will be afforded by this project, and renders its completion most essential. I need not expatiate on the advantages of a fresh water harbor at or near commercial cities such as we have built up on Puget Sound. When this waterway is completed and ships from Scuttle and Tacoma can reach Lake Washington, both our Navy and our merchanimen will be benefited, and there will be a corresponding help to our struggling naval station across the

'I have heard nothing of a proposition to move the naval station and drydock from its present site at Bremerton to a ention near Seattle or Tacoma, and doubt if any such scheme will ever be seriously pressed. At the same time, the station is in great need of government assistance, and I shall try to secure an ppropriation of at least \$1,000,000 for the and navy-yard, for installing much ed machinery and other equipments

There are a number of projects aferly recognized in this regard. from the Lake Washington Canal, which have mentioned, the delegation will en-leavor to secure adequate appropriations improving the harbors at Tacoma and berett, and for Gray's Harbor as well, There is more or less dredging necessary at Tacoma, in the harbor proper, and I at Tacoma, in the harbor proper, and I think all the funds necessary can be pro-Then throughout the state there are a number of small streams which have been improved in the past, but which are in need of further dredging or snagging. These also will be taken care of in the general river and harbor bill."

BAKER CITY WILL ASSIST

PLEDGES ATO IN SECURING EXHIBIT OF OREGON MINERALS.

Work Is Being Furthered Under Direction of the State-Pyramid of Ore Will Be One of Features.

BAKER CITY, Dec. 4.-A meeting of the Baker City Chamber of Commerce was called lat evening by President Geiser to hear the outline of plans for gathering a mineral exhibit from Eastern oregon for the Buffaio Pan-American Exposition. Mrs. Edythe Toxier Weatherred
asked that the meeting be called that she
might explain her mission as a member
of the state commission. She has been
visiting all the towns between Portland
and Baker City, and also took in Huntington. Much enthusiagn is reported in ngton. Much enthusiasm is reported in the different sections

Mrs. Weatherred did not ask that the Chamber of Commerce assume the task of gathering the ores. For one individual, or even committee, to undertake that, in-volves work of considerable magnitude. The Eastern Oregon gold region covers much ground, and it would be difficult for the Baker City Chamber of Commerce for the Haker City Chamber of Commerce to gather eres from all the different districts. It was considered advisable that the work be carried on by representatives of all the districts. To accomplish, this it will be necessary for one person to visit every part of the mining region and make arrangements for sending the spelcmens in. Mrs. Weatherred will do much of this work in person and if also speicmens in. Mrs. Weatherred will do much of this work in person, and if sue is unable to cover the field, will have arrangements made for some other person to see such miners as she will miss. It is understood that expenses for collecting the ores will be defrayed from the appropriation made by the style for the arrangement of Oregon's exhibit. All the operators will willingly contribute such specimens as are desired if some one will call for them. The cost of boxing and specimens as are desired if some one will call for them. The cost of boxing and shipping them, and what may be neces-sary to defray the expenses of such per-son as passes from one district to an-other, visiting the miners, is all the out-lay that will be required. At the meeting held last evening a res-olution indbrsing the work of Mrs. Weatherred was authorized. Secretary Miller will draft it immediately and af-

Miller will draft it immediately and, after receiving his signature and that of President Geiser, the indorsement will be generally circulated. Members present at the meeting indicated which properties, they felt able to collect ores from. Mrs. Weatherred stated that a large exhibit was intended. One of the features will be a pyramid of ore, arranged in an artistic manner, and displaying to best advantage the values contained. She is very determined that Eastern Oregon shall be spiendidly represented, and it is believed that the mineowners are equally enthusiants.

BRICK WORTH \$9000.

Portion of Monthly Clean-Up at the North Pole Mine.

BAKER CITY, Dec. 4.—Emil Melser, nanager of the North Pole mine, arrived here yesterday with a \$5000 brick, which represents a portion of the monthly yield of that property. Mines in this region do not make public the value of bullion turned out each month. Large "pigs" of gold are brought in and deposited for ship-ment, but the curious public is denied the privilege of knowing how much wealth Eastern Oregon mines turn out. An effort has been made to have a table published each week showing the total returns from the different mines of the region, but up to date mineowners have not agreed upon any system by which this could be done without prying too much into what is regarded as private affairs. public-spirited men appreciate that old figures of the region's output would ro effect with capital than any

The ore milled yielded \$12 60 a ton, which a good showing when it is taken into onsideration that development has barely ommenced. The owners of the property are very well satisfied, and no abatement whatever will be made in penetrating to the level where a sufficient quantity of water may be had for the operation of the mill. Sufficient depth of water has not yet been reached, and operation of the 10-stamp mill is more a test than in-auguration of the regular run. As the ore requires much water in milling, no effort will be made to handle it in any the bust quantities until the shaft reaches water. That depth will soon be had if the level in adjacent properties be taken as a cri-

Company Is Taking on New Life.

BAKER CITY, Or., Dec. 4.—Company A. First Separate Battalion, located here, held an election last night for First Lieutenant. Corporal James Wright was chosen, there being two other candidates in the field. Corporal Wright is a well-known member of the company, and his selection is regarded as an excellent one. Major Meade, commanding the battalion, had been appointed inspector of elections, but being unable to attend, delegated the power to Captain Carlyle.

Company A is taking on new life, Winter is a rather bad period for drilling, as the hall is not large, but the officers and members are endeavoring to make the best of conditions. Baker City's rapid growth has given a population of sufficient size to maintain a flourishing company. An effort has been made by Cap-Company Is Taking on New Life.

Sleep seems to be in many cases a mat. ter of habit, just as eating and drinking are habits. The Arab whose desert life leads to absteminousness, declines the offer of a draught of water, saying: "No thank you, I drank yesterday." He drinks only when thirsty, and, like his own cam-eis, he can go long and far without

water.

It's much the same with sleep. When Gabert and Huc, the French missionaries, were exploring Tartary they engaged in the translation of the Scriptures, working

> To Incordorate Clackamas Station. OREGON CITY, Dec. 4.-The citizens of Clackamas Station held a meeting last night to consider plans of incorp-ing the town. John Zeek presided, a committee of five, consisting of John Robinson, Sol Iniel, Otto Gengelbach, Freeman Yourans and Martin Hornber-ger, were appointed to determine and report on the boundaries of the proposed municipal incorporation. A meeting will be held Monday night to hear the mittee's report, and to determine mittee's report, and to determine on a plan of city government. It is intended that the boundaries shall include the two powder magazines located near the Sta-tion, although the principal object of the incorporation is to secure authority to put a check on hoodlumism and to deal more effectively with the tramp problem. Tramps at certain periods of the year congregate in and around Clackamas Station to such an extent that they are a menace and a nulsance.
