Friends Fear Majority Public Land

Committees Are Against It. WASHINGTON, Dec. 8-It now devel-ops that one of the important reasons why the friends of irrigation legislation are endeavoring to accure recognition through the river and harbor committee is because it is feared that a majority of the public lands committee of the House are opposed to adopting any system of construcing irrigation reservely the general Government, and will report favorably any bill for that pur-

At the last session, it will be remembered, an attempt was made to get such a bill reported to the House, but when it was referred to the General Land Office was referred to the General Land Office for recommendation, an adverse report was made, and the bill did not get out of committee. This year new schemes for the construction of reservoirs by the general Government have been advanced, and renewed efforts are bring made to secure favorable action, both in the public lands and river and harbor committee of the House. In all probability, the House public lands committee will not report any bill of this character, and if Chairman Burton, of the fivers and harbors committee, has his way, his committee will also take adverse action on such propositions.

Those members of the public lands committee who are interested in irrigation are preparing to make a fight for their schemes at an early day, and it is very probable that much of the time of the committee for enversi weeks will be largely taken up in the discussion of the various propositions. While Chairman Lacor has not committed himself on this proposition as yet, it is inferred from his general remarks that he, like Mr. Burton, is not a believer in the Government con-struction of irrigation reservoirs and can-als. Such opposition, headed by the chairmen, is almost certain to prove
