WINTER IN NORTH CHINA-

le Change in the Military Situation.

IEN TSIN, China, Dec. 1.—The mil-y situation bere has shown practically change since early Autumn, There has a slight reduction of the various es at times, but the garrisons have on whole practically been maintained at number heretofore stated in the Asso-ed Press dispatches. the Russian contingent has been slight-

he Russian contingent has been slight-increased over the strength at first de-mined. This is understood to have n done at the suggestion of General avitch himself, who is said to have resented to St. Petersburg that two stitional infantry regiments be added, use have now arrived here. In addi-i, there are three squadrons of Cos-ks and a light battery. With the de-ture of the Fifteenth United States In-try last week, the American contigent ry last week, the American contigent Fien Tsin now consists only of two panies of the Ninth Infantry under mand of Major Foote. The British Germon forces predominate. The ish have sent back to India and down long Kong a large number of coolies have suffered much from the cold health of the troops is, on the whole, i, though the Germans have had quiterge percentage of sick from fever and

senteric complaint.
avigation up the river has practically
sed. Ice formed nightly and the last
t of junks sent up have taken from
ht to ten days to reach Tung Chow.
ster supplies for all the forces are
tty well in, however, and with the
ning of the ralivoad to Pekin, which is
exted within two or three weeks, the test difficulty which the allies have

of will be removed.

The removed of consideration of the relification of the relificat has been a disposition to lay the ie for the delay in putting the road ugh to Pekin on the Russians and a time to time the matter has come to front in a way to cause apprehensions erious friction. It was recently stated an agreement had been reached to the road over to the Germans, but has failed to materialize and it is eratood that the Russians declined uifill the agreement. They are phy-interest on the lease to the Chinese British owners and thus removing the test legal question involved. ports from the country along the ad Canai and toward Pao Ting Fu in-

e that there is still some restlessness to towns and villages. There have several scares of massing forces in direction, but no reliable news can stained tending to indicate danger. e Germans have installed a field tel-ph line to Pao Ting Fu, and detach-te are constantly on the road escort-supplies to the garrison there. Occaalong the route, but the country is along the route, but the country is arently quiet in that direction.

Bishop Ninde Dead.

TROIT, Mich., Jan. 3.—Bishop W. X. ic, of the Methodist Episcopal Church, ind dead in bed at his home here . He was 88 years old. It is thought ause of death was heart trouble. He nded a funeral yesterday and caught old. He had been a bishop of the modist Episcopal Church since 1894. was at one time a missionary in In-He leaves a widow, three sons and

daughter, sterday the presiding elders of Michheld a conference and decided to sell episcopal residence here, now occu-by Bishop Ninde's family, because churches of Michigan outside of Deand other cities failed to contribute

W YORK, Jan 3.—Mrs. Mary Devine, 60, was burned to death and Mrs. ale Arnickle, aged 27, was driven from while III, and three other persons injured at a fire which destroyed a of three-story frame tenement houses ashwick street, Jersey City, early to-The damage by fire was \$80,000, par-covered by insurance. Mrs. Arwas in the hands of a doctor when flames reached the house. She was ome of her mother, where she gave to a child. Twenty-eight families driven from bed into the bitter cold

Struck a Defective Rail. NNEAPOLIS, Minn., Jan. 2.—The ago Great Western passenger train Chicago Grent Western passenger train from Chicago, due here at 8:25 A. M., was wrecked near Sargeant, Minn., today. Two engines were pulling eight cars 35 miles an hour and the second engine struck a defective rail and was overturned, with the baggage car. The latter was burned. The seven coaches left the track but were not overturned. Baggageman Green, Conductor Néaley and Buffet Car Porter Hudson were seriously bruised.

WORLD'S STOCK OF MONEY

UNITED STATES LEADS NATIONS IN SUPPLY OF GOLD.

Heaviest Gold Per Capita, However, Is in Australasia—Stocks of Silver and Uncovered Paper.

WASHINGTON, Dec. 28—(Special to the New York Journal of Commerce).—One of the meet interesting tabulations which has been presented for several years by the Director of the Mint. is that showing the total amount of money in use in various countries, and the ratio of this total stock to population. The figures to be presented this year by Mint Director Roberts will derive more than ordinary interest from the exhibit they will afford of the increase in teent years in the gold money of the world. The large productions of the mines in Australia, South Africa and the Klondike regions have not by any means all been converted into money, but the monetary supply of several countries has received important additions as the natural result of the increase in the stock of the yellow metal. The United States now stand at the head of all nations in their stock of gold money. This would remain the fact, even if a considerable allowance were made for the errors which are sometimes attributed to the Treasury estimates. The estimated stock of gold in the United States at the beginning of the present year was \$1,200,.

20,000. The figures for France were Sila, 500,000. The following table will indicate the progress in the monetary supply of seven if a considerable allowance were made for the errors which are sometimes attributed to the Treasury estimates. The estimated at the head of all nations in their stock of gold money. This would remain the fact, even if a considerable allowance were made for the errors which are sometimes were sila, 500,000. The figures for France were Sila, 500,000. The figures for France were Sila, 500,000. The following table will indicate the progress in the monetary supply of seven if a considerable allowance were sila, 500,000. The following table will indicate the progress in the monetary supply of seven if a considerable allowance were sila, 500,000. The follow

Century:

Gold. Silver.

1872 ... \$1,200,300,000 \$1,057,885,000 \$1,857,885,000 \$1,855 ... \$4,901,900,000 \$2,851,100,600 \$2,558,000,000 \$2,858 The amount of uncovered paper is reached by deducting from the total

period of 27 years. It is probable that the estimates for 1873 are somewhat defective, but there is little doubt that the gold money of the world has been multiplied by at least three within a generation. by at least three within a generation. The fact that the paper has not increased is due to the large increase in metallic reserves which have offset increased issues of bank notes in France, Germany and many other countries. The following table exhibits the figures which Director Roberts will present to Congress regarding the monetary stock of leading countries:

DENVER, Jan. 3.—At a mass meeting held tonight the coal miners at Erie decided to strike, in sympathy with those

or because they had not been given the share of the President's confidence to which they felt themselves entitled, was a little less pronounced than the flerce hatred of the Altgelds, Tillmans, Joneses

TELEGRAPHERS' GRIEVANCES

reached by deducting from the total amount of paper in circulation the coin reserves which are held against it in banks and national treasuries. Perhaps the most remarkable feature of this exhibit is the increase in the total quantity of the tools of exchange within the past quarter of a century. The amount which sufficed, or was made to suffice, in 1873 was about \$4.500,000,000. The amount in actual use at the beginning of the present year had risen to \$11.500,000,000. This shows an increase in the monetary supply of the leading countries of the world of more than 140 per cent within the brief period of 27 years. It is probable that the wages. It was stated semi-officially today that the company took a firm stand from the start, and at the final conference held yesterday refused to grant the demands of the telegraphers. It is said that chair-men of various committees between St. Paul and the Coast will be advised to do no more talking, but to act. This is un-derstood to mean that the telegraphers will shortly send an ultimatum to the

This completely the lightly out at Louisville, LaFayette, Canfield and Superior. equipment, is perhaps the estimated stock of money per capita. In this respect the United States is not abreast of some of the countries where methods of credit are less fully developed or where gold or sliver are the principal items of production. Among advanced civilized countries with a high range of currency per capita is France, whose equipment of \$37.03 is nearly 40 per cent in excess of the American sumply of \$23.1. The South American sumply of \$23.1. The South American nearly 40 per cent in excess of the American supply of \$28 21. The South American states also show a heavy equipment of uncovered paper, with little metallic money to support it. Among the gold-producing countries showing remarkable records are South Africa, with a per capita circulation of \$27 80, of which \$25 58 is in gold, and Australia, with a per capita circulation of \$25 80, of which \$25 58 is in gold. The following table exhibits the

cannot accede the increased wages demanded. The output of the mines has heretofore barely kept pace with the de-mand, and an immediate and serious fuel famine is the outlook for that district. This city does not depend upon the northern fields for supply, but will feel the shortage to some extent.

reading matter than any other magazine of its shape, and is profusely illustrated.

10 CENTS A COPY. SLOO A YEAR.

For sale by all newsdealers, who will also take your subscription, including The Ledger Monthly Calendar for 1901-FREE!

The Ledger Monthly Calendar for 1901 is so charming in human interest and fascinating in decorative quality that it makes a delightful adornment for the drawing-room or the boudoir. It contains three panels lithographed in 12 colors, after original oil paintings by such eminent artists as J. G. Brown and Carle Blenner, and a study from life by Tonnesen Sistera This calendar would sell readily for \bar{n} tents, in the stores, but it is not for sale and is given to Ledger Monthly yearly subscribers only.

ANOTHER BOOZ HEARING

CONGRESSIONAL COMMITTEE ABOUT TO INVESTIGATE.

It Will Also Take Up the Case of ex-Cadet Breth-Brooke Board's Testimony to He Used.

PHILADELPHIA, Jan. 2.—The Congressional investigating committee recently appointed for the purpose of inquiring into the case of Oscar I. Booz, the ex-West Point cadet whose relatives believe came to his death as a result of hasting at the military academy two years. hazing at the military academy two years ago, assembled in this city tonight. The committee, which consists of Charles Dick, Ohio, chairman; E. H. Driggs, New Dick, Ohio, chairman; E. H. Driggs, New York; Irving P. Wanger, Pennsylvania; Walter I. Smith, Iowa, and Bertram L. Clayton, New York, held an executive session, at which the preliminary ar-rangements for the taking of testimony were adopted. The committee will leave here at 8:20 A. M. tomorrow, for Bristol, Pa., the home of the Boos family, and will immediately begin the taking of teswill immediately begin the taking of tes-limony. After hearing the Brisiol wit-nesses the committee will return to this city to hear Philadelphia physicians who are connected with the case, after which the investigators will sit at West Point. Night sessions will probably be held in order to expedite the inquiry. A copy of

the testimony taken by the military board of inquiry has been sent to the Congres-sional committee for reference. It is announced that the case of ex-Cadet Breth will be taken up, and telegrams have been sent to the young man's father and the family physician at Altoona, summoning them to prepare their testimony. Messages were also sent to a young man named Burnham, who, while a cadet at West Point, lived in the same tent with Boog, Burnham resides at Richmond, Ky.

THE PRECIOUS METALS. Preliminary Estimate of the Director of the Mint.

WASHINGTON, Jan. 2.—George E. Roberts, the director of the mint today made public his preliminary estimate of the production of gold and silver in the United States during the calendar year 1996. The aggregate of gold is given as 3,877,213 fine ounces, valued at \$79,322,281, and of silver, 50 610,543 fine ounces, which, at the approximate average price of 61 cents for the year, makes the value \$35,-

During the calendar year 1899 the gold production was \$71,063,400, and the sliver

production 54,764,500 fine ounces. The Nome gold and sliver production for 1900 is given as \$5,100,000, and that of the Klondike, which includes both the American and Canadian fields, \$12,287,566. The product of the Canadian mines is not included in the figures given, but as the gold and silver comes to the American

mints, the value is given separately.

The following is the production by states and territories in gold value and in silver fine ounces: Gold. Silver.

MONEY OF THE WORLD.

Increased Over One Hundred Per Cent in Less Than a Generation. WASHINGTON, Jan. 2.—An increase of more than 100 per cent in the money of the world in less than a generation will be an exhibit of the annual report of the Director of the Mint. Nearly the whole of this increase is in metallic money, and much the larger portion is in gold. The total stock reported in 1873 was about \$4. 600,600,000, of which more than half was in paper money not fully covered by metallic reserves. The situation at the beginning of 1900 showed a total monetary stock of about \$11.600.000,000, of which only a little more than one-fourth was in uncovered paper money. Director Roberts finds that while the money supply of the world has increased about \$7,000,000,000, the increase in gold money since 1873 is about \$3,600,000 ... 000; in silver about \$2,750,000,000, and in un-covered paper money only about \$650,000,-000. A large proportion of the increase in gold has taken place within the short space of seven years, while the quantity of silver money, which was at its maximum of about \$4,250,000,000 at the beginning of 1896, has since been somewhat reduced by the sale of silver by Germany and its re-tirement in other countries. The condi-tions of 1893 showed a total monetary supply of about \$10,000,000,000, which has since been increased by about \$1,100,0 0,100. About \$340,000,000 of this increase has been in gold

Opposed to Submarine Boats.

NEW YORK, Jan. 3.—A special to the Horald from Washington says:

Submarine boats for the Navy will not be authorized by Congress during the present resiston if the views of the majority of the Naval Board of Construction are observed. The board has considered a letter from Representative Foss, chairman of the House committee, regarding the bill pending authorizing the construction of 20 additional submarine boats. By a vote of four to one the decision was against the new vessels until their value. against the new vessels until their value first lessons in reading. Several is demonstrated. Naval Constructor older women were born in slavery.

Woodward, representing Rear Admiral Hichborn, Chief Constructor, was the dis-scuting member. In making this decision the majority took into consideration the reports of Admiral Dewey, Rear-Admiral Farquhar, Commander N. E. Mason and others commenting favorably upon the performance.

Montann's Metal Output.

HELENA. Mont., Jan. 3.—Eugene B. Braden, who was succeeded as assayer in charge of the United States Assay Office at Helena January 1 by B. H. Tatem, today announced his estimate of the metal output of Montana for 1990. He estimates an increase of \$256,753 in the metal output of Montana over the production of 1899. Although there was an estimated increase of 16,000,000 pounds in the copper production, the price of copper was less than during the preceding year. Mr. Braden's estimate follows:

\$41,246,350 21,507,500 4,500,000 500,410 Total\$68,728,169

BUSY ENGLISHMEN'S BOOKS.

The Current Literary Tastes of Severn, British Celebrities,

London Express. Busy men seem to find time to read, and in terms of the annual Academy plebiscite of the bees of the pulpit, literature, and the press, it would appear that some read exactly the sort of books one would expect them to read.

pect them to read.

Others disappoint expectations, while a
few send characteristic replies to the
question as to the two books which they
have read with the most interest and pleasure during the past year.
For example, Mr. Pinere agrees with
his fellow-dramatist, Mr. Henry Arthur
Jones, that "Huxley's Life and Letters"

is the one book of the year which play-wrights should read, while the former shows a feminine weakness for "Emmia Marshall," and the latter sighs over "An Englishwoman's Love Letters." After all, a little romance, a woman's story, and a dash of love letter is good and nourishing mental food for a drama-

Mr. Stephen Gwynn is evidently a be liver in the old and the new. He is of opinion that "Lord Jim" alone "out-Herods Herod." and he couples the pair

like ill-matched dogs straining at the chain.
Dr. Parker puts "Robert Grange" before
"The Master Christian," which enables
him to deliver a little homily—throw a little sunlight on the order in which they should be consumed, a little "orange" being taken before the stronger food o

The Christian." Str P. H. Jeune likes solld reading after the filpperies of the divorce court and the pumies of probate; hence he plumped for "Cromwell" and "Huxley's Life," white Mr. Frederic Harrison is characteristically dogmatic in his description of "Richard Yea-and-Nay" as the only first-

class book of the year, railway guides, of course, excepted.
On the whole, the list recalls the great
German musician who bored his friend,
the great painter with pictures of "Another Dutch Vintmilt" and of the great painter who insisted upon playing to the great musician pieces composed in his hours of idleness as a slave of the brush

and stick. Cedarcroft Sold to Strangers.

Chicago Chronicis.

A few days ago Cedarcroft, the beautiful home built by Bayard Taylor, egain went under the hammer. Every detail of the house was suggested by the posttraveler, the fruit trees on the grounds and the shrubbery were planted with his own hands and the large estate was the own hands and the large estate was the expression of Bayard Taylor's ideal of

expression of Enyard taylors dear of free-hearted hospitality.

The place when he bought it was what is now called an abandoned farm. Situated just across from the home of his childhood, and near the home of his ancestors for many generations, the entire locality was dear to him from early ascestors for many generations, the entire locality was dear to him from early associations, and doubtless the thought of home was doubly dear because of his constant travels. He conceived the idea of making the luxurfously tangled spot which Nature had overrun in wild profusion obedient to his own conception of beauty. Perhaps the creation of that lovely parklike estate, which Goethe describes with so much felicity in the "Eleotive Affinities," inspired the plan, or it may be that Walter Scott's haronial mansion and rich acres suggested the thought which eventually became a passion. Like sion and rich acres suggested the thought which eventually became a passion. Like Abbotsford, Cedarcroft eventually became an expensive luxury, and cost its builder many an anxious night and many a year of toilsome effort.

of tollsome effort.
In L'Evol to his "Home Pastorale"
Bayard Taylor said:

Now, if the tree planted for mine must shadow another's-If the uncounted tender memories sown with the seasons. Filling the webs of ivy, the grove, the terrace of roses

Now must be lost till haply the hearts of others renew them— Yet we have had and enjoyed, we have and their joy is forever.

A short time after the poet's death Cedarcroft was sold for \$15,000. The sale a week ago brought \$0375—a small sum for a poet's dream.

Mark Sullivan, writing to a New York paper of the various changes that have taken place in regard to the estate, says: "The people of Kennett take little interest

Thirteen colored women, whose agea-range from M to 75, are attending night school in Jersey City, and taking their
