ONE HUNTER'S BAD EXPERIENCE.-The life of a duck-hunter is not always alto-gather a happy one. A large number were out for ducks Sanday, and while some made very fair bags, the greater num-ber had poor sport. The best shooting was done over on the Columbia bottoms. On Sauvie's Island, there was snow, and 10 Inches feil there Sunday night. Snow on the gwound makes it rather cool for one to be comfortable sitting out in a bilind. One sportsman who has a large preserve rented and a man employed to look after his shooting and feed the ducks had a rather unpleasant experience Sun-day. He had directed his keeper to build a new blind on a lake where he had not been shooting. As it is desirable to have decoys out by daylight, in order to get the early shooting, he and the keeper started two hours before daylight for the new blind, loaded with 18 live decays and 200 cartridges. They tramped through the darkness for three miles without finding the new blind and then the keeper said was lost. Then Captain Riley took the lead, and waded a slough up to his armplts, which took the keeper up to his neck, and finally found the new blind, and by this time he was se mad that he con-cluded not to shoot. He also found that the keeper had let some one shoot over his preserve in the middle of the week, the keeper had let some shoot over mer and Past Preceptor David N. Moses-his preserve in the middle of the week, and this did not add to his happiness. He ranged. Refreshments will be served and came home without any ducks, and not pleased, either.

Pleased With Reduction—Large num-vited to be present.

bers of people are calling at the water works office to pay their water rates, and many of them take occasion to express their satisfaction with the reduction of 25 cents on their bill. One woman said 25 So cents on their bill. One woman said Is ing a fare game, on the oath of Charles cents is not much, but in the course of a payear it will buy a pair of shees, and another said the reduction enabled her to authoritie for a magazine she had long list, was bound over to answer before the wanted, and so on. Very many speak of the reduction and express their satisfac-tion. The reduction is about the most far-reaching that could have been made, as it not only applies to houses, but to stores, factories and every place where there are sanitary appliances. The reduc-tion of 15 cents amounts to \$25,000, almost 19 per cent of the income from the sale of water. Water rates here appear high to residents of some Eastern cities, but com-naired with the rates charged here before pared with the rates charged here before e city bought the water works, they e very low. In most Eastern cities ere is either a direct tax on property to help support the water works, or s frontage tax on all property on streets where there are water mains. Portland has no tax of any kind for the benefit of the water works, and the cost of operamaintenance and interest on bonds are all paid from the water rates, and any surplus, instead of going into a sink-ing fund, is used on extension of mains and other betterments.

SWITCHMAN CRUSHED TO DEATH.—That he had given the signal which started the cars and led to the accident causing his death, formed part of the evidence in the case of Lloyd B. Egbert, heard at the Inquest before the Coroner yesterday. It was shown that Egbert, who was employed as a switchman by the Northern Pacific Terminal Company, was crushed to death as he stood upright between two vestibuled cars he was coupling, last Sunday, in the Terminal yards. Egbert was 30 years old, and came to Portland last July. Witness testified that the cars work. automatically, and that Egbert stepped between the cars to loosen a part of the coupling known as a "knuckle," but that he did not step saide at the proper time. for some unknown reason, and that he was crushed when the two vestibules crashed together. Egbert had raised his arms as a signal to the engineer, that the way was clear. He was known as a careful railroad man and experienced switch-man. He left a widow and one son, and his body will be taken to his former home, at Hammond, Wis., for burial.

Churchill is well known in Portland, having been on many of the visiting teams, and local bowlers are glad that the honor of heiding the world's record, made under such square conditions, has gone to him. The former record of N was made by A. E. Rossiter, on the Oregon Road Club alleys. The other new record was made by Mr. Huggins, of Seattle for the score of 23 in a four-game tourna-ment. He made this record while bowling against Tacoma, January 3, making 51, 52, 55, 71, as scores for the four games. The former record of 233 was also held by

VOTERS TO SHOW PREFERENCE

Senator F. P. Mays Will Introduce beater, of London, England, a noted theo-sophical lecturer, will speak tonight and tomorrow evening, in middle hall, Alisky building, corner Morrison and Third streets, at 7.45 P. M. His subject this an Act Which, If Passed, Will Show Legislature the Choice of Oregon Electors.

State Senator F. P. Mays will intro duce a bill at the coming session of the Legislature to provide for the election of United States Senators by direct vote of the people, so far as the same may be done without conflict with the Consti-tution of the United States. The Consti-tution of the United States, Revised Statutes, provides for the election of United States Senator by the Legislatures of the different states of the Union, Mr. Mays in his bill provides that the names of candidates for United States Sensator shall be printed on the official ballot, and voted for at each general election, and the result is to be submitted to the Legislature The presumption is that the Legislature will bow to the voice of the people and elect the candidate who shall have received the highest number of shall have received the highest number of votes, but this may not be done, because the Legislature is by the law of the United States vested with full power in the matter, and the members of that body can elect any one Senator whom they please, irrespective of the wishes of the voters of the state as expressed by their ballot, although it is not to be supposed that such a course would be pursued. The act is drawn to fit the primary law, now in force, and so as not to conflict with liam Ayres were each bound over in the Municipal Police Court, yesterday, for the grand jury, to answer a charge of playgrand jury a charge of robbing the Owl in force, and so as not to conflict with any primary law which may hereafter be passed. The bill is as follows:

A bill for an act to instruct the Senators and Representatives of the Legislative Assembly of the State of Oregon as to the election of Engineers, left inst evening for Seattle, where he will go on board the Government tender Columbine, and proceed to a point in the Straits of Fuca: about 10 miles cast of Neah Bay, to survey a site for a lighthouse, which it is proposed to

Senator Mays, in speaking of his bill,

Senator Mays, in speaking of his bill, said: "I have covered the subject as far as possible, and if any one has a better bill to substitute, I will willingly withdraw mine in its favor.

"This measure will inform the Legislature, unequivocally, whom the people of Gregon prefer for Senator. I would like to be able to compel the Legislature, by means of the measure, to vote for the person the people prefer, but this cannot be done, as it would conflict with the Federal law. The nearest approach that to fever heat. Not since the days of the late Jack Dempsey have two such elever, hard-hitting men been matched in Port-land. It is difficult to find any two men willing to agree as to the probable win-ner in the coming event, and both men have houts of friends. Tracey's recent performances in this city have added to have hosts of friends. Tracey's recent performances in this city have added to his hitherto excellent reputation, and he is undoubtedly capable of putting up a winning light with almost any man of his weight in the United States. He is a splendid judge of distance, and one of the hest ring generals that has ever the hest ring generals that has ever the distinctly in the matter. Of the matter of the constituents there are constituents there. the best ring generals that has ever donned the mitts. He never overlooks an will be no difficulty in the matter. Of course, it is impossible to say to a Legis-lature: 'You must do this or that,' and Of enal? opening or an opportunity to worry an the Legislature, even after knowing the preference of the people, can turn down the hoped-for aspirant and elect someone else. But this bill is as far as you can go, afraid to mix up, as he is a hard hitter with lots of vitality. He has been winning all of his fights lately, and feels confident of the result next Friday night. Both men are hard as nalls, and no severe training will be indulged in for the next feed days. Just shough exercise will and conform to the law.

While crudities arising from the fact that many of the cast spoke for the first time in public on the stage gave rise to some levity at More Room Is the Cry and We're on the stage gave rise to some levity at times when gravity was due from the audience, this was not the fault of the play, and Mr. Rogoway may feel assured that he has the groundwork of a drama of considerable merit. It should, however, be intrusted to a man familiar with the stage and with the art of making plays for the finishing touches that it needs. Going to Have It.

A force of carpenters and finishers will take possession of Eilers Plano House warercoms today, and by tomorrow night we will have a gallery in the rear part of our warerooms that will enable us to dis-play nearly two carloads more of fine instruments than has been beretofore pos-

sible. But remember, even while the carpenters are puttering away here, this sacrifice sale will be kept going. Only four instruments were sold yesterday, but this was on account of bad weather—and who would blame any one for not coming to see these phenomenal bargains, on such a day, even though here are bargains worth The principal hotels are thronged with guests these days, although travel is supposed to be lightest at this time of year. The approaching session of the Legislature has an influence on the hotel business, as both members and lobbylsis are beginning to reach Portland from interior points, the former to confer with each other in approaching questions, and the latter to buttonhole for favors. Squads of business-looking men are seen conferring in various nuarters, and the casual ob-

coming hundreds of miles to get.

We ought to sell more than a dozen instruments each day during this sale, and if you are contemplating the purchase of a fine plane or an organ, and will come a fine plane or an organ, and will come here prepared to make a first payment business-looking men are seen conferring in various quarters, and the casual observer can very quickly see that there is a "hen on." After hext Monday this connubiating will have been transferred to the dome-crowned halls of Salem.
