

PLEA OF THE DEFENSE IN THE BOSSCHIETER CASE.

PRISONERS ON THE STAND

Alleged Assaultants of the Mill Girl Tell a Plausible Story—Evidence is All in, and Case May Go to the Jury Today.

FATHERSON, N. J., Jan. 16.—Interested crowds today filled the room in front of the court and terminer is sitting for the trial of three of the alleged murderers of Jennie Bosschietter, the mill girl. The state having rested its case last night, the day's proceedings began with the presentation by counsel of the case for the defense. Of the three men accused, Death showed most the effects of the strain through which they are passing, and dejection and extreme nervousness were depicted in his countenance and movements. McAllister, on the other hand, was comparatively self-possessed, but Campbell was evidently troubled and anxious.

When Judge Dixon opened court, counsel for the accused asked that Schulthorp the backdriver, be recalled, as he might be confronted with the record of his conviction of a crime of which he had previously been found guilty. Judge Dixon denied the request, on the ground that the point sought to be made against Schulthorp was immaterial.

Michael Dunn then delivered his address, opening the case for the defense. Counsel promised to prove that the death of Jennie Bosschietter was not caused in the commission of a criminal assault, and also that the charge of willful murder could not stand against the defendants.

Dunn proceeded with narrative of the events preceding the death of Miss Bosschietter, the purpose of it being to show that the meeting of the four men—McAllister, Campbell, Death and Kerr—was not prearranged, and that the girl made the first advances that opened the way for the meeting at Saal's saloon.

In the saloon, according to counsel, the girl drank champagne, and when she awoke she found herself in the arms of the men. She became frightened and fled, and when she was taken to the back of the saloon, she was assaulted by the men. She was taken to the back of the saloon, and when she awoke she found herself in the arms of the men.

Professor R. C. Vandenberg, a chemist, told how by mixing whiskey, champagne, and champagne obtained at Saal's saloon with embalming fluid, he had produced a crystalline reaction. In reply to questions, he said: "It cannot be told with accuracy by the finding of 10 grains of chloral in the stomach how much had been taken to produce that effect."

RIOT IN A KENTUCKY TOWN.

Explosion and Promiscuous Shooting Cost Several Lives.

CORBIN, Ky., Jan. 15.—A riot is in progress here tonight as a result of the shooting of James Shotwell, a well known local citizen, by a mob of men who were gathered in the streets. Shotwell was killed or injured. Shotwell is in a precarious condition, and is not expected to recover.

HILL FIGHTS THE CANADIAN

Gets Crow's Nest Coal, and Will Push New Railroad.

ST. PAUL, Minn., Jan. 16.—Today J. J. Hill came into possession of one-third of the capital stock of the Crow's Nest, British Columbia, coal mines, amounting to \$2,500,000. He also entered into an agreement with other railroad companies to build a line to the mines.

Trouble From High Water.

All Southern Pacific trains arrived and departed from Portland yesterday over the West Side tracks. Four blocked trains got in the night before, and yesterday morning when the outgoing San Francisco express got far as the car shops it was turned back because of the water which covered the track on the Clackamas bottom, just north of Oregon City. Four years ago the track there was raised some six feet, but the water yesterday rose a full foot over the track, and was so muddy that no reliable examination of the bed could be made, and it was deemed unsafe to trust trains upon it.

Collision on the O. R. & N.

A light engine going eastward collided with a double-headed freight train near Mosier at midnight Tuesday night. The head end of the freight train was badly damaged, the others only slightly. The engine was slightly bruised, but was able to handle their machines. The track was obstructed until 5 o'clock yesterday morning. Responsibility for the accident lies between the night operator at Hood River and the engineer of the light locomotive, the engineer declaring that the operator at Hood River was at the station, and the operator saying it was displaced.

DEWEET CROSSED THE YAAL

RUMOR THAT HE HAS JOINED THE TRANSVAAL COMMANDOS.

British Fear, However, That the Story is Intended to Cover an Attempt to Break Southward.

LONDON, Jan. 17.—The important report received from Johannesburg that General Dewet has crossed the Yaal and joined forces with the Transvaal commandos, if true, probably means the concentration of 7000 Boers with several guns for another big attack. There are rumors current in Cape Town that several Boer leaders are urging an attack upon the province. It has been long understood that General Dewet has been anxious to join the invaders in Cape Colony, and this may be spread to cover an attempt to break southward.

As an outcome of the fact that the Boers in several instances have been proclaimed as government troops, the British government has been obliged to issue orders for the wearing of khaki, and notifying all persons who wear this costume, which is likely to be mistaken for the British uniform, that they will render themselves liable to arrest on imprisonment.

The War Office issued no fresh news yesterday. The response to the government's call for volunteers is said to be very brisk, in both London and in the Transvaal. Several thousand men have joined the city guard in Cape Town, and 2000 others have volunteered in the suburbs. The Boer army has been mounted on Table Mountain. A small Boer commando entered Sutherland, cut the telegraph wires, looted the stores, and then proceeded northward.

According to the Cape Town correspondent of the Daily Mail, the Boers occupied Aberdeen, 15 miles south of Graaf Reinet, Tuesday. A unique feature of Kitchener's fighting schools is his force of 2000 mounted men, who are expert riders and leading sharpshooters. This is likely to renew the cold agitation.

Kruger is Undecided.

LONDON, Jan. 16.—Kruger is undecided whether to visit America. He will do so if assured that President McKinley will receive him officially as President of the Transvaal. The friends of the Transvaal are anxious to see him in his present state of health, to undertake any arduous and fruitless journey in cold weather. John B. Millholland, representing a group of American Boers, visited Mr. Kruger, fortnight ago, and with W. T. Stead, invited him to visit America. Afterward, while Mr. Kruger wrote saying his health forbade him to do so, he has since recovered, and has declared he is willing to make the trip if he could be satisfied that his visit might help the Boers. He tells his friends he has since received, and has declared he is willing to make the trip if he could be satisfied that his visit might help the Boers.

LANDSLIDE OBJECTS.

If He Has His Way, the Canal Treaty Will Not Be Accepted.

LONDON, Jan. 16.—The canal matters were brought forcibly before the public today by means of an editorial in the Daily Telegraph, and a long dispatch from the American correspondent of the London Times. Each takes the opposite views. The Associated Press is officially informed that neither can be taken to represent the government's views, for the excellent reason that these views are held by the British attitude. The conferences so far held between United States Ambassador Choate and the Secretary of State for Foreign Affairs have been held in the latter, and were for the purpose of enlightening Lord Lansdowne on various technicalities, so as to enable him to explain them to the Cabinet meeting Friday.

A DASH TO THE POLE.

Plans of Captain Bernier, of Quebec, Canada.

LONDON, Jan. 16.—Captain J. Eliaz Bernier, of Quebec, who has volunteered to make a dash to the North Pole by a new route, and by aid of inventions of his own for ice traveling, has practically completed his arrangements in England, and is ready to start in a few days to submit his ideas to Sir Wilfrid Laurier.

Watching for an Embesaler.

LONDON, Jan. 16.—The alleged forger for whose extradition the United States authorities are despatching the steamer Herta, alias Emden, of New York City, is supposed to be on board the steamer Corinthian, which left Halifax Sunday, January 7, for Queenstown and Liverpool. The chances of those cities are watching for him.

Dimensions of the Shamrock.

BOZTON, Jan. 16.—According to the Herald, which claims to have reliable information, Sir Thomas Lipton's challenger will have a draft of 19 feet 8 inches; beam, 25 feet 6 inches, and her length over all will be 126 feet. The total weight is to be 2000 tons. Designer

GROWERS OF LIVESTOCK

SECOND DAY OF THE SALT LAKE CONVENTION.

Anti-Shoddy Resolution Adopted—Addresses and Papers—Discussion of Oleo Question.

REPLY TO MR. TONGUE.

Oregonian Correspondent on Siuslaw Discussion. WASHINGTON, Jan. 12.—It is with some reluctance that The Oregonian correspondent is forced to reopen the Siuslaw discussion, and to make a statement in reply to the Oregonian of December 21 contained a letter written by Hon. Thomas H. Tongue to an Oregon friend, in which he makes the following assertion: "The Oregonian correspondent, in some way, has been going outside of his ordinary business and sending messages that he ought not to have sent. I note an Oregonian containing a statement that the Siuslaw improvement had been 'turned down,' etc."

As a matter of fact, Mr. Tongue himself said to the Oregonian correspondent about two weeks before the river and harbor bill was reported to the committee had "knocked out the Siuslaw appropriation, but he hoped it would be restored in the Senate." As it is the aim of the correspondent to keep the people of the state advised of the progress made in Oregon matters, it was his "plain duty" to convey this bit of information to his constituents, so that they would be "outside of his ordinary business" in so doing. In fact, there was nothing else to do. It was not gratifying to him personally to know that Siuslaw was being "knocked out" of the bill. It was a bit of news of interest in Oregon, and as such it should have been and was sent there.

Furthermore, there has been some little complaint from Mr. Tongue in person because this fact was printed. But if that item had not appeared in The Oregonian, and the many protests been subsequently sent to the committee, the Siuslaw appropriation would in all probability have contained little or no provision for the Siuslaw when it emerged from the committee. The committee is not advertising against Siuslaw. And yet that fact does not seem to be appreciated.

It is, perhaps, natural that the people of Lane and Douglas Counties living along the river, and who are interested in the large appropriation for their river, but to an unprejudiced outsider, who looks merely upon the merits of the case, there is no reason why the general Government should appropriate for appropriations for improving the stream. As a matter of fact, the entrance to the river is at present a very dangerous locality, and the navigation is very difficult. To overcome this shoaling, a large dam or barrier would be required. The extension of the present jetty for a considerable distance, at an estimated additional cost of \$1,000,000, would be a very expensive proposition, but their recommendation is not of the strongest. In fact, it is the cheapest and most practical recommendation that they themselves believe the final cost of the improvement is very apt to exceed the figure now set down.

It is stated that with an appropriation of \$1,000,000, in addition to the available balance of \$2,483,483, they can extend the jetty for 500 feet; that with an appropriation of \$1,000,000, in addition to the available balance of \$2,483,483, they can extend the jetty for 500 feet; that with an appropriation of \$1,000,000, in addition to the available balance of \$2,483,483, they can extend the jetty for 500 feet.

As a matter of fact, the river and harbor committee is very much disposed to disapprove of the appropriations for the Siuslaw, and believe it to be a project unworthy of improvement by the general government. It is not an original project, but a project that has been tried before, and found to be a failure. It is not an original project, but a project that has been tried before, and found to be a failure.

It is not necessary to draw comparisons between the Siuslaw and any of the Columbia River improvements, for every one will recognize the comparative importance of the two streams. There was no comparison between the Siuslaw and any of the Columbia River improvements, for every one will recognize the comparative importance of the two streams.

Perhaps, in further consideration of this general question, it might not be "over-represented" to call attention to the following table, which in itself is an interesting study: Memorandum of recommendations of the Chief of Engineers for river and harbor improvements in Oregon, for the fiscal year ending June 30, 1901, as compared with the amounts appropriated for the same harbor bill by the House committee.

Table with 2 columns: Project Name and Amount. Includes items like Month of Columbia, Upper Columbia, Snake, etc.

Storm-Tossed Ships Reach Port. SAN FRANCISCO, Jan. 16.—The three-masted schooner Joseph Russ, bound from Salina Cruz for Port Townsend, has put in here in distress. The vessel was caught in the southeast storm of the early part of the month, and, being in ballast, had an exceedingly rough time of it. Nearly all her sails were carried away.

Wreck on the West Coast. VICTORIA, B. C., Jan. 15.—The steamer Queen City, which arrived at midnight from the west coast of Vancouver Island, reports that three ships' boats have been found smashed on the coast, together with the name board of a vessel with the letters "Rel-ner" showing also considerable lumber. The weather has been very rough off the coast.

CONSUMPTION PREVENTED, NOT CURED

THE GREATEST BENEFITATION OF SCIENCE CHECKS-DISEASE BEFORE IT REACHES THE LUNGS.

Doctor Copeland Again Urges the Truth of His Theory, the Only Sound Theory in Lung Disease, the Theory Proved a Thousand Times, and Again a Thousand in His Practice, That the Only Proper Course, the Only Rational Course, the Only Scientific Course in the Treatment of Consumption is to Cure the Catarrhal Stages.

So much interest has been aroused by the series of articles by Doctor Copeland on the relation of catarrh to consumption that he has, in the following talk, explained what his experience has taught him in all the years of his practice concerning catarrh and consumption. Doctor Copeland says: "The great trouble that I find is to explain to the people so they will understand the importance of taking care of their breathing apparatus, which is undoubtedly the most important part of the body. While man may live quite a time without food and without water, he dies in a very few minutes when robbed of his air."

"It is like this: Youth can resist much; good constitutions can resist much, but in the latter end of man's existence his fires burn lower, his youth is gone, his vitality is gradually sapped, and disease is allowed to extend into his vital parts. "As I have said before, catarrh in the form of catarrhal consumption is not the only form of consumption, but the history of nearly every case of consumption is the history of catarrh that has extended from the nose to the throat, from the throat to the bronchial tubes, and thence to the lungs. Those people even after they have developed consumption and finding that they will take cold easily and have exaggerated catarrhal symptoms, often try to persuade themselves that they are only suffering from catarrh, and that their lungs are not affected."

"NO IMMUNITY FOR THE OLD." "I need to be thought that only young people and people of middle age developed consumption, but it has been living at a distance from the city, if you cannot come to the office, write for Home Treatment Symptom Blank and book, and be cured at home."

"GREAT RISK TAKEN." "I would like to appeal directly to every thinking person in the world with a positive fact, namely, that each one I address I want to consider that he is running a gauntlet that is an extremely risky one when he allows himself to remain uncured from any form of bronchial or catarrhal lung disease, for no matter who you may be, you stand one chance out of seven of dying of consumption. In other words, every seventh person in the United States gets consumption and dies from it. A great many more people than one out of seven get catarrh that starts out of seven dies from it."

"HOME TREATMENT." "No one deprived of the benefits of the Copeland Treatment because of living at a distance from the city, if you cannot come to the office, write for Home Treatment Symptom Blank and book, and be cured at home."

"CONSULTATION FREE." "DR. COPELAND'S BOOK FREE TO ALL." "The Copeland Medical Institute THE DEKUN, THIRD AND WASHINGTON W. H. COPELAND, M. D. J. H. MONTGOMERY, M. D. OFFICE HOURS—From 9 A. M. to 12 M.; from 1 to 5 P. M. EVENINGS—Tuesdays and Fridays. SUNDAY—From 10 A. M. to 12 M."

"DANGER FROM CATARRH." "There are some persons, and indeed a number of them, who have an immunity from consumption, but it will be found on close investigation that such persons do not contract colds easily and do not develop catarrh of the consumption. Every person who has catarrh is carrying around with him a disease that is liable at any time to allow the development of consumption. "In some persons the strength and vitality of youth allows them to prevent the advancement of catarrh into the lungs, and while they may be annoyed by some of the symptoms of catarrh in the early part of their life, they suffer no serious constitutional disease as the result of it. But even such persons, when they grow old, find they are beginning to

"TWENTY YEARS OF SUCCESS." "In the treatment of chronic diseases, such as liver, kidney and stomach disorders, constipation, rheumatism, dropsical swellings, Bright's disease, etc. KIDNEY AND URINARY COMPLAINTS, painful, difficult, too frequent, milky or bloody urine, urinary discharges, speedily cured. DISEASES OF THE RECTUM Such as piles, stricture, hemorrhoids, mucous and bloody discharges, cured without the knife, pain or confinement. DISEASES OF MEN Blood poison, gleet, stricture, unnatural losses, impotency, thoroughly cured. No failures. Cure guaranteed. YOUNG MEN troubled with night emissions, dreams, exhausted frames, bestiality, aversion to society, which deprive you of your manhood, DRUGS, MIDDLE-AGED MEN who from excess and strains have lost their MANLY POWER. BLOOD AND SKIN DISEASES, Syphilis, Gonorrhoea, painful, bloody urine, Gleet, Stricture, enlarged prostate, Sexual Debility, Varicocele, Hemorrhoids, Kidney and Urinary troubles, cured WITHOUT DRUGS, PAIN AND CONFINEMENT. Dr. Walker's methods are regular and scientific. He uses no patent nostrums or ready-made preparations, but cures the disease in its early stages. He sends sent Free to all men who describe their troubles. PATIENTS cured at home. Terms reasonable. All letters answered in confidence. Consultation free and satisfactory. Call on or address plain envelope. Doctor Walker, 122 First St., Corner Alder, Portland, Or."
