**All Headings and Ruchings**  
White, black or dainty colors, for neckwear or waist trimmings, regularly 20c to 50c, to close at ..... **10c yd**

### TO DRIVE JACKRABBITS

**BIG ROUND-UP TO BE HELD ON BIALOCK ISLAND.**

**Valuable Land Needed for Fruit and Hay Will Be Rid of the Long-Eared Pests.**

A big jackrabbit drive on the California plan is projected for March 5 on Bialock Island, in the Columbia River. This island is about opposite Coyote Station, on the O. R. & N., and excursionists are expected from as far as Portland for the occasion.

Bialock Island is six miles long by three miles wide, and is covered with large sagebrush, under which hundreds of jackrabbits hide. The Bialock Company, which owns the island, is placing it under cultivation rapidly, but the pesky rabbits are too numerous for comfort, and so the company has decided to give the public of Oregon and Washington a big day's sport, and at the same time exterminate the rabbits.

The methods will be the same as in the big drives of the San Joaquin Valley, but as the Columbia River flows on each side of the island, the attacking forces need not describe such a wide detour as on the open plain. The crowd on foot, without guns or firearms of any sort, will muster at the end of the island and proceed toward the other, in an easterly direction, to shoot the fox-like mammals on the sight. These armed men will not leave the water's edge, as they will carry the only firearms in the outfit.

A ferry-boat plies regularly from the bank of the river, opposite Coyote Station, to the island, and will meet all four trains which pass there that day. The drive will begin in the morning and probably last all day, the company providing sandwiches and coffee for the party who are expected to become pretty hungry while engaged in the sport.

A rabbit drive is a novel event in Oregon, though in the wide, fertile valleys of California they have been in vogue for a score of years, and several thousand rabbits are killed and piled up in the corrals into which doomed bunnies are remorselessly driven. The sagebrush lands of Eastern Oregon are alive with the jacks, but as yet are not well settled enough to make a rabbit drive a necessity. The Bialock Company, however, had a preliminary drive on the Oregon side of the Columbia some three weeks ago, and the number of jacks that fell before the clubs of the assembled neighbors was fully 1900.

This drive will be in a mile square of territory, where there are 15 square miles on the island, which is thickly infested with both jacks and cottontails. The latter, however, are likely to hunt their burrows on being driven, and no great number of these will be expected in the general catch. The Bialock Company is reclaiming the island for the purpose of raising fruit and alfalfa. Pumps, run by the current of the mighty river, will set in position for irrigating, and some 50 men are now employed in digging canals and setting out fruit trees. The soil is the richest in the known world, being of alluvial deposit, and only needs water to make it tropical in productivity. The plan is to put 1000 acres to alfalfa and 200 to orchard. The company calculates to raise 1500 tons of alfalfa annually, and this can be sold at \$4 per ton in the stack, while a market for fruit is constantly increasing in the mining regions of Eastern Oregon, Washington, Idaho and Montana. So the object of ridding the island of its jackrabbits can be seen at a glance. A big time is expected, and provision will be made for several hundred excursionists.

**PERSONAL MENTION.**  
John P. Vollmer, of Lewiston, is in the city.

**NEW YORK, Feb. 7.**—Northwestern people registered at New York hotels today as follows:  
From Portland—W. B. Ayer, at the Alhambra; Louis Dammasch and wife, at the Union Square; J. Heller and wife, at the St. Denis.

From Spokane—R. K. Sweeney, at the Gilroy.  
From Seattle—E. C. Millon, C. H. Hogue, P. Moran at the Imperial.

**TEMPLE BETH ISRAEL.**  
Sermon for This Evening—Movement for Zionist Society.

Dr. Stephen I. Wise will preach this evening at the Temple Beth-Israel, on "Heroes Unchosen and Unrecognized." The service will begin at 8 o'clock. Strangers are invited to be present.

A meeting will be held in the vestry of the temple Monday evening, February 11, of those interested in formation of a Zionist Society. Dr. Solis Cohen has consented to give an address. All those in sympathy with the movement, Jews or Christians, are invited.

**CENTRALIA Residence Burned.**  
CENTRALIA, Wash., Feb. 7.—The residence of Mrs. Desdemona Pellet, valued at \$800, was totally destroyed by fire at 2 o'clock this afternoon. The building was insured for \$300. Most of the household effects were saved.

Artistic Picture Framing at Popular Prices. Eyes Tested Free of Charge by Competent Optician. Watches Cleaned and Repaired.

The perfection of lattice ribbon corset. There are many advantages in this new corset.

**New Colored Dress Goods VALENTINES**  
**New Fancy Silks** **New Embroidery**  
**New Lace Curtains** **New Fancy Hosiery**

### COST OF HEATING HOUSES

**SEMI-SCIENTIFIC STATEMENT ON THE SUBJECT.**  
About Two Tons of Coal a Month for a Modern 7-Room Dwelling in Portland Winters.

A well-known citizen, who lives in a large modern house, was complaining to a friend of the expense and inefficiency of present methods of heating, as compared with those in vogue "down East," when he was a boy; which methods consisted of a fireplace in the sitting-room and a big cooking stove in the kitchen by means of which every one used to keep warm and correspondingly happy. His friend, who is of a mathematical turn of mind, and who graduated "down East" by the aid of the heat from a fireplace and a kitchen stove, reminded him that he had forgotten the icy blasts that used to sweep into the sitting-room from the hall whenever the door was opened, and how his very toes used to turn blue with the cold on going to bed in the cheerless bedroom, and how it felt to crawl out of bed in the morning with hoar-frost on the windows and ice frozen in the water pitcher. Several other such pleasant memories of bygone days were recalled. He then went on to say that ten plumbers and better water supply, and in every way were more healthful and cheerful places of abode than they ever were before, and then he proceeded to give him some bottom facts relating to heat, fuel, and the cost of fuel, and suggested that those who have heating systems in their houses out it out and paste in their hands to refer when the coal and water bills begin to come in on the first of the month.

"Where there is no loss of heat from a room, there would be no necessity for the using of fuel to warm or heat, but heat, as we know it, is lost in many ways. There were there no loss of heat by any source, our houses would retain the temperature generated by July weather, and in that case, instead of using coal and water, we would be purchasing ice all winter to keep us cool enough. We find however, by bitter experience that we do buy fuel to keep warm, as well as water, for the reason, therefore, must conclude that our houses do lose heat.

"There are three principal sources of loss of heat calculated by heating engineers, as follows: First, heat is lost by outer wall exposure, and by hygienically necessary changes of air per hour whereby warm air is taken from the room and its place is taken by cold air, which maintains a temperature of comfort, but the outer air at an uncomfortable temperature, we must provide enough artificial heat to compensate for the losses above enumerated, as follows: For each square foot of glass surface we must provide 40 units per hour of heat (or the amount of heat needed to raise one pound of water 40 degrees Fahrenheit) to maintain a temperature of 70 degrees Fahrenheit in a room reasonably well built, with out-of-doors temperature at 30 degrees; for each square foot of outer wall surface 20 heat units, and for each cubic foot of air 40 heat units. Now suppose, for example, we have a room 15x15x10 feet high, with two windows 16 feet each, and two walls exposed to outer air. We would require for the maintenance of an indoor temperature of 70 degrees, with outer air at 30 degrees, and no wind: For loss of heat by glass exposure, 42 feet, 1680 heat units; for loss of heat by wall exposure, 2000 heat units; for cubic contents, 2500 cubic feet, or two changes per hour, 4500 heat units; for heat units, or a total per hour, for the room described, of 9180 heat units. Now, assuming we have about seven rooms such as are described, it takes but slight skill in mathematics to demonstrate that we need per hour 57,560 heat units. Allowing that coal is the fuel used in the generating of the artificial heat, the United States Government tests show that the maximum amount of heat obtainable from the best bituminous coals sold in the market is about 9000 heat units, and from the poorest about 5000, or an average of 7000. Dividing the total, 57,560 heat units, required per hour, by 7000, we find that about eight pounds of coal is required per hour, were it possible to burn the coal as to have absolutely no waste. Any large users of fuel of any description will tell you that if you can get 70 per cent of its calorific or heat value from fuel, you are far exceeding their obtained results with the best fuel-saving devices known, but if we are optimistic enough to take it to the extreme, we will find that the fuel required for our seven-room house, for 15 hours, is 156 pounds per day. Of course our winter weather is not always at 30 degrees, and perhaps we do not keep our house at 70 degrees, but at 70 degrees for 15 hours daily, in which case our fuel consumption will be proportionately less; but whether wood or coal be used, it will refer to the facts that it is about the same, and if the people who think they should burn no more fuel in the warming of their newly-erected palatial mansions of 15 or 16 rooms, about half of which consists of outer wall and glass surface, than they used to burn to heat the kitchen, dining-room and sitting-room with the range and a fireplace as an auxiliary, will refer to the facts they will find that under ideal conditions of building and heating it requires 6000 pounds of coal per month to heat a house

### NEWS OF THE COURTS.

**Decisions of Judge Sears—Dog Slay-er Acquitted.**  
Judge Sears yesterday rendered a number of decisions.  
In the case of Mattie A. North vs. Moses A. Billings, as president of the Union Savings and Loan Association, the demurrer to the mandamus suit was overruled. This action was brought to force the corporation to allow her attorney to examine the books of the company. Judge Sears stated that it was the universal rule that a stockholder or an authorized representative had a right to examine the books of a corporation.  
In the case of H. Wempe vs. J. W. Wright, judgment was rendered for the plaintiff in the amount of \$48. This was an action to recover money for tents which the defendant says he never received.  
In the case of McCormick vs. City and Suburban Railway Company, a motion to strike out certain parts of the complaint was denied.

**Acquitted of Dog Killing.**  
William Crowston, charged with having maliciously killed a dog belonging to J. C. Deaver, was acquitted yesterday afternoon in a jury trial in Judge Sears' department of the Circuit Court. The dog was a Scotch collie, and was owned by the owner was said to be a fine dog. By the defense, conducted by R. C. Wright, it was contended that it was simply a low-bred mongrel cur. Crowston admitted that he killed the dog, but asserted that he did it because the animal had been worrying his sheep. On these points Deputy District Attorney Manning introduced testimony tending to show that the dog, worrying the sheep, was another of low breed, differing in description from the Scotch collie in the case. The jury rendered a verdict of not guilty after being out an hour.

**Decisions Today.**  
The decision in the divorce case of Charles H. Thompson vs. Erminie Thompson will be announced by Judge Clements tomorrow afternoon. He will also announce decisions in the following cases:  
Drake C. O'Reilly vs. Columbia Southern Railway Company et al, on motions to stay proceedings.  
W. H. Sherrill et al vs. R. L. Durham et al, demurrer to complaint.  
The J. McCracken Company vs. City of Portland et al, motion to strike out parts of answer.

**Assault and Battery Cases.**  
On an appeal from the Municipal Court, testimony was heard in the Criminal Court yesterday afternoon in the charge of assault and battery against Mrs. Gertrude Plummer. In the Municipal Court the latter was fined \$30 for the alleged assault on Mrs. W. Henderson.

**Court Notes.**  
The case of the Luce Hog Company vs. Meeker, in the United States District Court, was argued and submitted yesterday.  
The will of Willena Morrison Hurgren, who was supposed to have died intestate, was filed for probate yesterday. Her cousin, Flora C. M. Shindler, of Oakland, Cal., is named as the legatee.  
Sidney H. Cawston and Ernest Cawston, mechanics, filed a petition in bankruptcy yesterday in the United States Court, with exhibits showing their liabilities to be \$24,633.83 and assets \$13,166.61.

**Milton Smith**, as executor of the estate of Ella M. Smith, filed his semiannual account yesterday, showing receipts of \$1868.87, and a balance of \$121.09. Of this he petitioned for an order to pay \$1200 to the Portland Library Association, the residuary legatee, which was issued by Judge Calkins.

### JUNE CLASS ENTERTAINED

**High School Graduates Guests at Reception in Armory.**  
The February class of the Portland High School were tendered a reception and ball by the June class at the Armory last night. The affair was a brilliant success in every way, and reflects great credit upon the committee of the June class. The hall was beautifully decorated with flags, bunting and evergreen. Everett's orchestra occupying a raised platform at the east end. The floor was in excellent condition and all things conspired to make the affair a signal success.

The first part of the evening was taken up with a short programme. After an opening overture, the address of welcome was delivered by Wade Bailey, the president of the June class. The response was given by E. Johnson, president of the outgoing class, who thanked the entertainers for their good wishes and their

hospitality. Madame d'Albert gave a vocal solo, "Judith," in excellent style, and Miss Grace Holmes a humorous reading. The hit of the evening was made by Miss Klippel, a charming and talented Southern girl, who appeared for the first time in Portland. She sang "A May Morning," by Denza, and in response to a hearty encore, "Beniamere's Stream," by Gotten. Miss Klippel made a mezzo-soprano voice of rare beauty. At the conclusion of the programme dancing was begun and kept up till a late hour. Tonight the February class will be entertained by the Alumni Association of the High School. The patronesses of last night's affair were:  
Miss Christina MacConnell, Miss Emma Goddard, Miss Anna Friedlich, Miss Caroline Barnes, Miss Gertrude James, Miss Laura H. Northup, Miss Ruth E. Rounds, Miss Leona L. Larrabee, Miss May Thompson, Miss Mary E. Hart, Miss Mary Bertha Moore, Mrs. N. Munde.

**A MERITED HONOR.**  
**Commendation of Bill for Statistate in Colonel Baker's Memory.**  
ARLINGTON, Or., Feb. 6.—(To the Editor.)—The bill introduced by Representative McCracken, of Multnomah County, providing for a statuette in commemoration of Colonel E. D. Baker, the gifted Senator from Oregon, who fell at Ball's Bluff, is a meritorious measure, and we trust, will receive favorable consideration at the hands of the members of the Legislature. Colonel Baker was a man of National reputation, who, during the brief time subsequent to his election as Senator, and prior to his death, represented Oregon with great credit and ability. He was one of the main supporters of Lincoln's Administration, and his eloquent, manly voice was heard everywhere in defense of the Union.  
His reply to Breckenridge, in the Sen-

ate, at the special session of Congress, is, within itself, enough to cause his memory to be fondly cherished for all time by the supporters of the Union. We have already too long deferred this slight tribute to his worth as a soldier, gifted orator, brilliant Senator, and above all his sterling worth as a man. It is unbecoming the great State of Oregon that the grave of its lamented and illustrious Senator should longer remain unmarked. While we cannot benefit the dead, yet the passage of the bill would remove the stain of ingratitude from the state, and would be an object lesson to our youth, impressing upon their mind that self-sacrificing devotion to one's country is entitled to and receives consideration.  
R. A. D. GUMBLEY.

**Caddis (in stage whizzer to Hille, who is rightfully nervous—Don't you get nervous, sir! It's all right. I've told every one of 'em you can't play—Punch.**

# Meier & Frank Co.

The new laces are ready, including magnificent designs in all-overs, cloth of gold, new Batistes, new Arabians, embroidered chiffons, etc., etc.  
606th Friday Surprise Sale today. Big values in Comfortables, \$1.49 each. (3d floor).
