German Ship Professor Koch Chartered-Important Ruling Regarding Shipmasters-Cannery Fleet to Load on Clumbia.

The Government has just opened bids for the construction of a small tug to be used by the United States Engineers' Department at San Francisco, and, as usual, where an equal show is given them, Portland bidders are the lowest. Mr. Joseph Supple, the East Side boat-builder, sucseeded in getting in a bid over \$1900 undo the next lowest man on the list. The bids which have been forwarded to Washington for approval were as follows:

Ington for approval were as follows:

Joseph Supple, Portland ... \$18,850
Fulton Iron Works, San Francisco ... 19,973
H. P. Christle, San Francisco ... 20,000
William Deacon, San Francisco ... 20,445
John B. Hardy, Tacoma ... 21,500
Sanders, Ward & Co., Tacoma ... 21,570
United Engine Works, San Francisco 21,200
Seattle Bridge Co., Seattle ... 28,200

It will be several days yet before the award will be made, and by the terms of the contract, four months will be given for the completion of the work.

Mr. Supple has had 25 years' experience in shipbuilding, and his work in this line gives perfect satisfaction. He has only eceptly completed the Sue Elmore, a temper comewhat larger than the one for which he has just made a bid, and she is said to be the best sea-boat that ever ran on the Tillamook route. As no fault has ever been found with his work, bid is the lowest, he will undoubtedly secure the contract. San Francisco is quite a prominent shipbuilding port, but Fortland builders have sent a great many craft down to the Bay City in past years, and will undoubtedly continue to do so. Timber, iron and fuel is as plentiful, or more plentiful, here than it s in California, and Oregon mechanics nd builders are as skillful as any in the

Big Schooner Launched at Marshfield, and Others to Follow.

MARSHFIELD, Or., Feb. 16 .- The fourmasted schooner James Sennett was launched today from the ways of the Marchfield shipyard. Her dimensions are as follows: Length of keel, 180 feet; beam, 40 feet; depth of hold, 15 feet 4 inches. Her gross tonnage is 746, net 682, and she is intended to carry nearly 1,000.-000 feet of lumber. The vessel was built by E. Heukendorff, master builder, for C. A. Hooper & Co., of San Francisco, and her keel was laid September 1, 1900. The citizens of Marshfield raised a purse of \$800 for the purpose of putting a roof over the shipyard, since the completion of which work on the vessel has been prose-cuted without regard to the weather. In her construction about 50 men were em ployed at wages ranging from \$2 to \$4 per lay, and the monthly payroll was about \$6000, besides the expenditures for tim-

A auplicate of the vessel just launched will be built at once in the Marshfield yard. The keel has been ordered, and work will be commenced Monday morning by Mr. Heukendorff, preparing the vard for her reception. As soon as she is in frame, the keel of a steam schooner will also be laid. The work will hereafter be prosecuted by an incorporated com-pany, of which C. A. Hooper & Co., of San Francisco; C. H. Merchant, a Marshfield capitalist, and E. Heukendorff will be the stockholders. Articles of incorporation will be filed immediately in Cali-fornia. It is proposed to push the business of building vessels at this point, which is excellently situated for the work having an unlimited supply of the finest of ship timber. The first keel, that of the schooner Ivanhoe, was laid in the Marshfield yard in 1868, and many vessels were constructed here in the next 30 years; but since 1880 the industry has languished, until the recent revival in ship ping business gave it a new impetus. The ospects are now good for a long period of activity.

PROFESSOR KOCH CHARTERED. German Ship Remained on Free List But Forty-eight Hours.

With 3,500,000 bushels of wheat on spot there is not much necessity for a ship remaining idie in this port, and the Professor Koch was on the disengaged list only 48 hours after her arrival. She was chartered yesterday at a rate which was withhold from the curious public, but which is said to be about 4is 3d. At this rate her owners will not lose more than \$1000 to \$1500 through the vessel's failure to arrive on time. The Brunshau-sen, which also lost her charter through making such a long trip, is still disen-gaged. The arrival of two big ships Sunday helped the exporters out somewhat. and as two more are reported outside, the Brunshausen will not receive a fancy figure until ships become much scarcer than they are at the present time

Slugging Match Between Spike Sullivan and Tom Kearns.

LOUISVILLE, Ky., Feb. 18.-Spike Sullivan of New York, was tonight given the decision over Tom Kearns, of Brooklyn, on points, after 20 rounds of rough fighting before the Southern Athletic Club. The men weighed in at 123 pounds, For the first six rounds neither forced matters. Then, for four rounds, Kearns took the aggressive and appeared to be punishing Sullivan with kidney blows and jabs over the wind. There was little behind the blows, however. At the end of the 11th round Sullivan landed on Kearns at will, punishing him severely over the heart and in the face. Twice Sullivan fell, and both times Referce Hurst cautioned Kearns against what looked like fouls Kearns striking Sullivan when he was on his knee. In the 17th round Kearns was all but out. From the 13th round the result was never in doubt, Sullivan's generalship and science far surpassing that of Kearns. From beginning to end the fight was of the rough-andtumble order, and the referce was continnously cautioning them against the tac tics used time and again, each man claiming a foul, but ope of the fighters was as bad as the other in this respect.

STRENGTH TESTS.

the following result. He says: "In 1897 I became officially

Record for Using Different Foods. J. Henry Myers, of Otsego, Mich., s traveling representative of a certain med-ical missionary association, made some strength tests with different foods, with

with an institution manufacturing a large line of health foods. 'My desire was to add strength. I was in good health, and faithfully lived, almost entirely, for nearly two years, on their foods, and believed in them thoroughly. In January, 1898, my strength test showed 5700 pounds, in January, 1899, by the same machine, my strength test was only 4560 pounds, a heavy falling off, notwithstanding I had not been sick, but had faithfully and religiously used the foods I so fully believed in and had been hired to lecture for and advocate. "For a month after that test, I was un certain what to do. I felt weak, and what I wanted was strength; so in Feb-

ruary of the coar I quit all other health foods and began using Grape-Nuts alone. My weight now has increased from 130 My weight how has increased from 169 pounds; my strength has increased from 4690 pounds to 1846 and I am now 1699 pounds stronger, by actual test, than the average man. My eyesight is clearer, my mind more active and stronger, and I can endure more labor, physical and mental, then ever before.
"I do not know any person interested in the Postum Cereal Company, Limited and this letter is not written with any motive, except to bring honest facts to the attention of persons desiring to live well and live rationally, I have the charts filled out by the physicians at the institution making the health foods that failed in my case, and these facts cannot be disputed by any one. I will make oath that they are absolutely correct."

There are never any external signs of Cancer until the blood is polluted and the system thoroughly con-

taminated by this deadly virulent poison. Then a sore or ulcer appears on some part of the body; it may be small and harmless looking at first, but as the cancerous cells form and are deposited the blood near the sore, it increases in size and severity, with sharp shooting pains. No matter how often the sore is removed by the surgeon's knife or flesh destroying plasters, another comes and is worse. The real disease is in the blood, and the treatment must begin there. poisoned blood must be invigorated and purified, and when this is done cancerous cells can no longer form and the sore will heal naturally and permanently

Mrs. Sarah M. Keesling at Windsor Ave. Bristol Mrs. Sarah M. Keesling, out Windson Ave. Brissol, Tenn., writes: "I am at years old, and for three years had suffered with a severe form of Cancer on my jaw, which the doctors and was incurable, and that I could not live more than six months. I accepted their statement as true, and had given up all hope of ever being well again, when my druggist, knowing of mycondition, recommended S. S. After taking a few bottles the sore began to heal, to the surprise of the physicians, and in a short time made a complete cure. I have gained in flesh, my appetite is splendid, sleep is refreshing—in fact, am enjoying perfect health."
