#### Transport Garonne Ordered to San Francisco

#### AT REQUEST OF MACARTHUR

Senator Simon's Protest of No Avail With War Department Officials-Volunteers Will Come North by Rail.

WASHINGTON, March 6.- The transport Garonne, which is soon to sail from Ma-nila with the Thirty-fifth Infantry, will not discharge at Portland, as had been arranged. The department has, in com-pliance with the cabled request of General MacArthur, directed that the Garonne sail for San Francisco and there dis-charge the regiment,

Upon learning this Senator Simon to day entered a vigorous protest, but with-out avail. The department officials said they very much disliked to break their promise, but that General MacArthur had stated that sending the ship to Portland would greatly hinder the prompt discharge of the volunteer regiments and cause a great deal of confusion. In fact, he de-manded that all transports be sent diprect to San Francisco. By way of a com-promise, and in part to pacify the Ore-gon and Portland people, the depart-ment promised Senator Simon that the Thirty-fifth Infantry shall be sent by rail from San Francisco to Portland for muster out at Vancouver Barracks, This action is taken to mean that the few companies of the Thirty-ninth and Portyfifth Regiments will be mustered out at San Francisco, although mustered in at

Testimonial to Captain Kilgore. ASTORIA, Or., March 6.—The Oregon bar pilots unanimously adopted the fol-

lowing resolution last night:
"Hearing that our friend, Captain Kilgore, of the revenue cutter Commodore Perry, is likely to be transferred to an-other station, we, the Oregon bar pilots, wish to give this testimonial to show the high esteem we have for his character and appreciation for the efforts he and his officers have always shown for the benefits of navigation and the welfare of mariners, since he has been in the reve nue service. He will carry with him our warmest wishes for his welfare wherever

Whaler Salls for the Arctic.

SAN FRANCISCO, March 6.-The Belvi-dere, the first of the whaling fleet to get away, has sailed for the Arctic via Hono lulu. The Alexander, Karluke, Jeanette Grampus, Baelena, William Bayless and Fearless will leave for the north next week. Several of the Pacific Steam Whaling Company's fleet winter at Herschel Island, and the yessels now going north will take them an abundance of fresh sup-

#### An Honest Pilot.

VICTORIA, B. C., March 6.-News was brought by the Empress that before leaving Shanghal, the captain of the ship Incheape Rock who committed suicide be-fore reaching Portland, gave a Chinese pilot \$130 to be sent to his wife. The pilot was captured by pirates and held four months before he escaped and turned up at the office of the agents of the Inchcape Rock with the money.

#### Apropos of a Recent Event.

PORTLAND, March 6 .- (To the Editor.) The wallings over Governor Geer's veto recalles the story of a certain lot of rust-lers who organized for business with a large number of private partners. The members of this new firm being anxious for spolls, were on hand one day at a great fair and feast given by the people of the state for the benefit of the co monwealth. On the table among other nice things was a set of large solid silver spoons. The feast on this occasion was in charge of a sober farmer, who had been selected for the place. Now, this farmer, for some reason, eyed sharply the members of this new firm, a number of whom were present, and, seeing one of their managers slip into his pocket on of these silver spoons, the farmer took up another one of these same spoons, and, rapping the table with it, said: "Ladies and gentlemen, it becomes my duty to show you a little trick," slipping the spoon he held into his own sleeve with angular contortions, himself being rather awk-ward and lank. "Now," continued he, "you will find the spoon, not in my sleeve. but down there in Charley's coat pocket." The crowd, anxious to see the end of the drama, gathered round, the spoon was course,

COMING HERE dragged from its hiding, and all the members of the new firm declared the lank farmer to be a bold, bad man.

the State of Oregon has provided means for a donation by the state and the City of Portland; and

"Whereas, The State of Oregon has by concurrent resolution of the Legislature requested the Pacific Northwest States to with the State of Oregon in holding said fair and in making said exhibition; now, therefore, be it "Resolved, That the House of Repre

sentatives and the Senate concurring, the Governor of the State of Idaho be and is hereby authorized to appoint a board consisting of three members to represent the of Idaho in all matters in cont tion with the celebration, in the preparation and presenting of said exhibit, and to report to the next Legislature the recendations as to what financial assistance the State of Idaho shall appropri-ate towards having a creditable exhibit by

the State of Idaho at said fair; and "Whereas, It is believed that the holding of said fair and exhibition will be of Pacific Northwest, and to the general the increase of commerce between the Northwestern States of the Union and the

Oriental countries; therefore be it further the State of Oregon join with the Legislature of the State of Oregon in me-morializing Congress to make a liberal appropriation for a United States exhibit at said fair, and pass such necessary legis-lation and extend such necessary invitations as will secure exhibits from the

Oriental countries at said foir; and be it further "Resolved, That we request our Sena-tors and member of Congress to urge such appropriations and such legislation

by Congress as will carry into effect the spirit and intent of this resolution."

to the County Clerk.

### BILLS REPORTED.

List of Those Presented to the House.

BOISE, Idaho, March 6-The joint revenue committee presented a number of important bilis yesterday, as follows: No. 199-Providing for the revenues of the state for the ensuing two years. No. 191-Providing for the return, after election, of all stubs, registry books, etc.,

No. 192-Requiring a certificate of the Assessor to the platting of all transfers of title to real property before the instru-ment may be recorded.

No. 193-Providing for payment of pre-miums on surety bonds by school dis-tricts, except in cities and independent chool districts, when the county pays. No. 194 Compelling County Auditors

and Commissioners to make annual state-ments of the financial condition of coun-No. 195-Giving County Commissioners

power to levy a special \$4 per capita road tax, to be paid in cash, whenever deemed песевалу. No. 196-Providing for a uniform poll

tax of \$3 per annum on all male citizens between the ages of 21 and 50 years. No. 197-Allowing the appointment by the State Auditor of an assistant, to be known as the "Auditor's financial clerk," at a salary of \$1200 per annum. The bill provides that the Auditor and Clerk shall prepare a harmonious system for keeping the books of the different counties, and the financial clerk shall go to each county and give instructions as to how these books shall be kept.

### Other Bills.

Other bills presented were: No. 198, by judiciary committee-Prohibiting damming of streams such as may

cause flooding of property.

No. 199, by Judiciary Committeethorizing the Commissioners to fix the oundary lines of Latah and Kootena Countles.

No. 206, by appropriations committee— Appropriating \$24,502.91 for payment of deficiencies incurred during 1899 and 1900 and 1897 and 1898. No. 201, by appropriations committee Fixing an ad valorem tax of \$345,000, to be paid by the countles of the state in pro-

portion to their assessed valuation.

The bills by the r evenue committee were all advanced to engrossment under suspension, and will be put on third reading tomorrow. They will undoubtedly pass, as shown by the action of the House in putting them ahead of all others on the calendar. The same course was desired by the committee on appropriations with their bills, but this was not allowed, and the bills took the regular

said exhibition, and the Legislature of compelled to pay for grazing our sheep sould have wiped our great inquision of existence in the West. It is true that of existence in the West. It is true that we are assured of a protection of wool for the next four years and it is well that it is so, for wool is selling E per man who owns a sheep in the Northwest should belong to our association, for "in union there is strength."

In the great Northwest today we have nearly one-half of all the sheep in the limited States, and our flocks are increasingly one-half of all the sheep in the limited States, and our flocks are increasing the limited States. on the public domain in those days, it would have wiped our great industry out

It is history that in those states where the sheepmen have been compelled to lease and fence their lands when hard times come to the sheep industry there is a stampede out of the business. Take Texas for an example: In 1852 that state had 4,000,000 sheep, but with free wool, a leasing and fencing proposition, in four years the State of Texas lost nearly 2,000,-000 sheep and the industry received a blow from which it will never recover.

on the public domain; his home is wher-Government of the United States and to ever he pitches his tent or wherever the increase of commerce between the night may overtake him. There is no one now to say, "I have a better right to this range than you, and you are a trespasser." Their rights are equal, be they great or small, and the law proevery man in his right. This line of policy has been followed by our Government ever since its beginning, giving to every citizen who cared to take advantage of it an equal right on the public domain. Any radical change, like the leasing of the public lands, would, in my judgment, bring ruln and disaster.

Exclusion From Ranges.

The exclusion of sheep from the forest reserves of the West is an injustice to our industry, and should be fought by the combined efforts of all the woolgrowers of the country. We are not oprealize the importance of protecting our forests; but we do know by practical experience that the grazing of sheep in the forests of the West does not in-jure the young growth of timber, but, on the other hand, has a tendency to prothis young growth from the sweeping forests fires that would be sure to occur if the vegetation is allowed to accumulate upon the ground instead of being used for a beneficial purpose by the grazing of livestock on these reservations. To this end we should invite a full investigation, but we should demand that the investigation be made by fair-minded men-men who are not prejudiced against our industry, but who only seek to get the facts of the true conditions as they exist, and upon a fair and partial investigation we are ready to rest our case.

Inspection of Sheep.

A question that should receive the consideration of this convention is the in-spection of sheep by the general Government, for it is of vital importance to our industry that this disease known as scab may be stamped out. Scab in sheep can traced back to the earliest writings. It is history that in those countries where the general government has taken hold of the matter success has crowned the effort, and in England, France and Germany it is practically stamped out. In the great sheep pastures of Australia, with its 140,000,000 sheep, there is not a case of scab to be found. This convention should place itself on record on this most important question and ask that the laws be so changed that the general Govnt can take hold of this matter and eradicate the scab from our country. The Question of Wool.

It is my judgment that the woolgrowers of the country need not give themselves any uneasiness about the reduction of the tariff on wool for the next four years, notwithstanding S. N. D. North, secretary of the National Association of Manufacturers, has made an attack on the Dingley bill, and is asking for a reduction in the tariff on third-class wools. However, Mr. North's claims should not be allowed to go unanswered, or else they will again build up an opposition against our industry that in time might be the means of a reduction from the present duty on wool, and this, as we all know

from past experience, would bring ruin and disaster to our business. Low Prices of Wool.

The question is often asked, "What is the matter with the wool market in this country today?" and, "Why has wool declined in the last year?" There are two reasons: The first is the great decline of wool in the foreign markest of the world. We can be thankful that we are not to compete directly with the low

and we have one of the causes for the falling off in the sales of wool for 1900. I am glad to be able to report that the Pacific Northwest has doubled its mem-

compete with those foreign markets to. United States, and our flocks are increasing, the average price of our wool would ing at a more rapid rate than in any be less than 4½ cents per pound. in these states of the Pacific Slope are almost identical, and we should make this the strongest woolgrowers' associa tion in the Union.

This great industry in the West shows a valuation of fully \$100,000,000, but possibly the magnitude of this great industry can be better understood when I say if our sheep were placed in single file they would make a complete circuit of the earth, and if they were started traveling at the rate of five miles per day it would take them 14 years to pass a given point traveling constantly every day years; or if they were loaded in doubledecked sheep cars they would make a solid train that would reach from the mouth of the Columbia River to the great

Union Stockyards in Chicago, The great question that confronts our industry today demands that we should have a thorough organization or else we can prepare ourselves to take the worst, for individual efforts count for nothing against the mighty organization of manu-Any industry with the magfacturers. nitude of the sheep business of the West should have an organization that we may all be proud of and one that is thoroughly equipped to fight our battles and protect our interests.

CONTAGION AND INFECTION. La Grippe Is Infectious, but Not Con-

tagious. Contagious diseases are communicated from one person to another; infectious diseases are conveyed through the air. Smallpox is a contagious disease; la crippe is infectious. When an epidemic of the grip is prevailing, it is in the air

we breathe and no one is safe. The only safeguard is to keep the sys-tem in the highest possible condition of health, and on the first appearance of a tic like Stuart's Catarrh Tablets freely, a tablet taken every hour or two for a couple of days will be sufficient to break

up the attack. La grippe attacks the weakest part of the system; it may be the lungs, heart, iver, stomach or kidneys, but wherever it finally locates it almost invariably starts with cold in the head and throat, or in other words, the disease at the beginning is acute catarrh.

This is the reason Stuart's Catarrh Tablets have been so successful in breaking up attacks of the grip. The antiseptic properties of the remedy destroy the germs before the whole system is thoroughly infected.

Dr. Anniston says: "Stuart's Catarrh Tablets being free from cocoaine and harmful drugs, should be freely used at this time of year on the first appear ance of grip symptoms.

"They check the excessive catarrhal se-cretions, stop the fever and prevent pneu-

"They are composed of antiseptics, and may be used by little children as freely as by adults, and with great benefit." Dr. Lewiston says: "My usual prescrip-tion for the grip is Stuart's Catarrh Tab-lets, which can be found at all drug stores. Keep to the house for a day or two and use the tablets freely, and I have never heard any complaint of failure to cure."
