### COMMERCIAL AND FINANCIAL NEWS

sufficiently Springlike to admit of consid- let for the surplus, son of the year, there is a weakening in dairy products, and eggs are down almost dozen. Live turkeys are mostly in poor to the lowest figure reached last season, There has also been a pronounced weakness in onlone and potatoes during the keys sold yesterday at 1461432c, and poor due to forcing the price up too high on are steady at quotations. short notice, thereby curtailing the demand and bringing out large offerings. Potatoes are weak under heavy receipts. Wheat, after a protracted spell of duilness, yesterday showed signs of returning life, and the prices improved in nearly all markets. The wool situation remains unchanged, holders refusing to do business at prices now obtainable. Some business is reported in new-crop hop contracting, but an easier feeling in the Eastern markets has had the effect of checking this business, growers declining to accept rates offered and dealers not inclined to advance the figures. Veat weaker and pork is holding very steady. Poultry is firm and chickens are selling up around the best prices of the season. A decline of 20c on sugar was the most Hay-Timothy, \$13,5012 50; clover, \$760 50; interesting feature in the grocery market during the week.

WHEAT-Seven ships, carrying over 800. 000 bushels of wheat, have finished loading this month, and there are 10 more in the river, all of them under charter to load wheat. Ordinarily this would indicate a free movement of wheat, but unfortunately all of the business is on old account, the cargoes having been bought and sold long ago. There is very little wheat coming out at present prices, and what little there is commands more than export values for milling purposes. Quotations are nominal at 56c for Walla Walla and 5%c for bluestem, but from %c to le more is paid for choice stock for miliing. Freights are easier, but are being hammered down with difficulty, and every owner who is dissatisfied with the offers made for wheat loading eeems to have no difficulty in securing lumber charters at full rates. Statements of the amount of wheat on hand in the interior and at tide water on March 1 confirm previous estimates of about 26,000,000 bushels for the crop of 1900 in Oregon, Washington and Idaho. These figures are making it somewhat difficult for certain authorities to dispose of several million bushels which they accumulated "when the frost was on the pumpkin and the fodder in the shock." One of these authorities, with a shocking display of grammatical construction, discredits the crop figures presented by The Oregonian, and "sees no reason" why he should reduce his figures to the limits warranted by the facts in the case. There is no reason why those figures should be changed. the farmer's "combination clock," when the hands stood at 6 and 4, and the bell struck 8, he knew it was 20 minutes past 9. So with this expert's figures. When they were placed at 41,000,000 bushels, the trade understands the crop to be about \$5,000,000 to \$5,000,000 bushels. This, of course leaves a surplus of 5,000,000 to 6,000,000 bushels to get out of the way before another crop comes around. Some the chickens are the most of it with-out distonding their craws. This year the people will strong proper will strong the proper will be strong the proper will strong the proper will be st people will sit up nights and eat some of it, and what is left will be blown away as chaff by a liberal supply of wind that is always on tap. Enough wheat remains on hand to fill all tonnage engagements, and still leave a carry-over of fair proand still leave a carry-over of fair pro-portions, but the foreign shipowners, who hold up freights on the statement that the three states produced 41,000,000 bushels of wheat last year, will in time discover that they have made a serious mistake,

are of very moderate proportions, and prices are firming up again. Best white are in demand at 44c, and gray and mixed at 426743c per bushel. Barley, which is tak. ing the place of oats to a certain extent manding \$16.50 per ton. Brewing is in nuts, 15c; hickory nuts, 7c; chestnuts, 15c; poor demand, and is not commanding any differential over feed at the present time (14c; almonds, 15@174c per pound. differential over feed at the present time,

WOOL AND MOHAIR-The outlook for mehair is anything but bright, and from present appearances the 1901 clip will sell at much lower prices than were realized last year. In wool conditions remain practically unchanged in the local market, and but little of the big carry-over stock will be moved until the new clip and new season prices are available. The East is not showing much activity, but there seems to be more of a belief that the bottom has been reached. The New York Journal of Commerce, under date of March 5, has the following:

The market for wool is somewhat easier, and yet quotations cannot be said to be any lower. Reports of sales at redu prices are current, but it is believed that wherever these are made there is some special reason for it. There have been sales during the week which have been rendered necessary by a desire for ready money. These forced or distress sales, however, should not be taken as a criterion of current conditions. Buyers have been educated to believe that each week a lower level of prices would be estab-lished, and this week lower offers were made than it was possible to obtain last week, but where the wool was absolutely needed it is probable that the prices paid to those current for the

last two weeks. There is one factor, however, which leads dealers to believe that the bottom has been touched, or that there will be little downward movement from now on. This is that outsiders—those who are not the state of the members of the trade are beginning to take an active interest in the market. When the wood market begins to be regarded as a good field for speculators, it must be because wools are as cheap as conditions will warrant, and that there as conditions the likelihood of radical reduction.

Then, again, a good deal of wool that has been sold during the last two or three weeks has been by dealers who are be-coming convinced that the raw material

is good property. BUTTER-The market is holding fairly steady, in spite of the presence of considerable California stock, which is selling at much lower prices than can be secured for Oregon creamery. The latter is in demand at 23% 625c per pound, with dairy seiling around 1714/200c, more of it going at the former than at the higher figure. Store butter is weak on account of a plentiful supply, and only moderate demand, the California article taking the place of the Oregon product to

a certain extent. EGGS. There is a little more firmness in the egg market, and yesterday but few were offering at less than 12c, Monday and Tuesday some round lots were sold as low as lighte, but a brisk demand from the north put up the price a fraction, and it will probably hang steady around that figure for a few days. Recelpts are heavy, and the San Francisco

The weather for the past week has been | market is unusually low, with no outerable plowing and other work on the POULTRY-Chickens of good size and farm, and this has checked trading at in good condition are selling at the best

NEW YORK STOCK MARKET. Dealings Covered a Wide Range of Securities.

NEW YORK, March 13,-The dealings in today's stock market covered an extraordinary range of securities. Quotations were made for some stocks which interior merchants. As usual at this sea. Springs are also in good demand, and have lain dormant for many days, and a number of usually very quiet stocks were made active. Stocks of some small railroads, which are usually obscure by rea-son of the small amount of their capital stock, were made comparatively conspic uous in today's market. Operations were constantly shifting from one stock to another, or from one group to another, no one stock maintaining its prominence during the whole day. It was a noticeable fact also that many of the stand-ard stocks which are usually looked to for the bulk of the trading were compar-atively quiescent, and moved very narrowly. Some of this class were moved late in the day, apparently through manipulation, as though the professional operators were prompted to correct the appearance of singularity in the market, ine to the special character of the trad-

Nevertheless, the day's operations made quite an important aggregate, and the general appearance of the market, not-withstanding its peculiar features and the difficulty of analyzing it, was one of activity and strength. There was a tendency to yield the highest prices, as interest was shifted to new points. Extensive realizing was going on in the general list under cover of the strength in spots, and in the last hour an active selling movement to take profits caused a general reaction, reaching a point or more in some of the active stocks. The closing itself was rather easy and much below the best, all around

Among the day's special movements, the Southwestern stocks were prominent, led by St. Louis Southwestern, the com mon rising 4 and the preferred 4%. The Lake Eric & Western stocks were very strong, the common rising 4% and the preferred 4. It is believed that the m ment indicates new conditions for that system. Buffalo, Rochester & Pittsburg preferred, and Burlington, Cedar Rapids & Northern rose 4 points each. The expreas stocks were strong, American Express rising 4, Wells-Fargo 2% and United States 3, with a reaction of 14.

The smelting stocks were weak throughout, the common failing 3% and the preferred 14. Many of these movements were without any explanation, and others were based on vague rumors for which no official sanction could be had. The movement in the Southwestern group was the most consistent of the day, and was based on the evidence of substantial prosperity among the railroads in that region, and the general belief that plans for extensive consolidation are working

The money market continued unruffied in spite of the absorption by the Subtreasury thus far this week of \$2,157,-000, and the knowledge that \$20,000.000 must be provided for the disbursement of the Standard Oil dividend on Friday. Business in railroad bonds continued large, and many substantial advances were scored. Total sales, \$7,380,000. United | The leading futures ranged as follows;

cash, 964c. Barley—No sales. Corn—Large yellow, \$1 124@1 15.

Chicago Grain and Produce. CHICAGO, March 13.-The provisions narket assumed the leadership of the markets at the start, displaying marked activity at the tap of the gong. By its bulge today May pork shows a rise of \$1.50 since 10 days ago. The opening ad-vance was based on light hog receipts and higher prices in the market at the yards. A heavy general demand existed throughout the day. Straggling shorts who had hoped against hope for a reac-tion covered at a loss, with the result that, the market having made its advance during the forenoon, held at its best during the remainder of the session. The market was at times extremely neryous under a scarcity of offerings, and such sales as were made came from profit-taking longs. Hog receipts have been on a diminishing scale for 10 days, and prices at the yards are above the parity of the manufactured product, making it more profitable to buy in the pit for future delivery than to buy and kill and pack the hogs. May pork opened at \$14.871/6/15 621/2, and advanced to \$15.521/2, closing at that figure, 621/2 over yester-

day. May lard closed 124c up and ribs Wheat was dull but firm. May opened %c higher to unchanged, at 754675c. Un-der the influence of firm late cables, mederate receipts unsettled weather, heavy clearances and in sympathy with the provisions strength, an advance to 75%c followed. The demand was mosty local, and not large, but offerings were carce. For half an hour the market remained at a standatili on this advance, there not being a single quotation. The close was firm, May 160%c up at 7540

Corn was quiet but firm under the influence of unfavorable weather and in sympathy with the provisions strength. May closed \( \)c higher at 41\( \) in 1\( \)c. Oats were dull but firm in sympathy with corn. May closed %c higher at 25@

sequent slight advance on firmer English cables, heavy seaboard clearances, strength of corn and provisions, and light speculative offerings, with a fair demand from shorts; closed strong, 160% net higher. March closed 79%c; May, 79148 79%c, closed 79%c; July closed 79%c. Hops-Quiet.

Chicago Grain Gossip.

F. G. Logan, Chicago, wires as follows to R. W. McKinnon & Co.: "The market has averaged stronger partly on account of a gradual improve-ment in conditions, and also buying back of wheat that was sold by local parties. No cash business has been worked here so far as we have been able to learn, but private cables report a better tone to market abroad. The market here is in the nature of 'a tempest in a teapot, business being almost entirely local. Pribusiness being almost entirely local. Pri-mary receipts, 597,000 bushels, against 701,000 busnels last year. Shipments, 260,-000 bushels, against 172,000 last year. Total clearances wheat and flour, 733,000 bushels. Clearances keep up phenomenally, considering the apparent lack of de-mand that has been in evidence for the past few weeks. Northwestern receipts, 227 cars, against 652 last year.

Boston Wool Market. BOSTON, March 13.-The American Wool and Cotton Reporter will say tomorrow:

There is a stendier tone to the wool market and on the whole a more careful feeling is apparent than has been manifested for some time. A large volume of business has been transacted and it has been without making any further con-cessions in prices. The pressure to sell wool is decidedly less marked than it was, and some holders have refused to let wools go on a difference of only one-half cent between their views and those of the intending buyers. Reports from manufac-turers as to the business which they are doing indicate that orders on large weights have been surprisingly large. The sales since January 1 amounted to 40,839,830 pounds against 34,450,000 pounds for the corresponding time last year.

The Metal Markets. NEW YORK, March 13.-Prices at the start in the metal market were considera-bly higher and remained so all day, the bly higher and remained so all day, the chief factor being the advance in tin of about 20 to 40 points. Total transac-tions were of moderate proportions, but the market was not active at any time. Copper was dull at \$17 for Lake and \$15 62% for casting. The shipments of copper during this month are only 2000 tons against March shipments of last year of 18,650 tons. Lead was dull and unchanged. Spelter was unchanged at \$3 90

Pig iron warrants, unchanged. Bar silver, 61%c.

SAN FRANCISCO, March 11.-Bar stl-

ver 61%c.

LONDON, March 13.—Bar silver, 284d. London Wool Auctions.

LONDON. March 13.-The offerings at the wool auction sales today numbered 13,567 bales. A much better feeling prevalled and competition was spirited. Best scoured realized full rates and greasy was firm and sold freely at unchanged prices. There was an important demand for the Continent and buyers secured good lines of scoured merinos. Cross breds were taken freely, fine grades, selling at full rates. Inferior cross breds were irreg-ular. A smaller supply of Cape of Good Hope and Natal was offered and it sold fairly well, but there were withdrawals, as bids were 14634 below sellers' views.

Coffee and Sugar. NEW YORK, March 13.-Coffee options closed steady, 20 to 25 points not lower. Sales, 36,250, including March and April, \$5.75; May and June, \$5.85; July, \$5.90; No.
