

others were bleeding and fighting, he was reveling; while his comrades, with set teeth, were rushing against the enemy. he was sneaking to a place of safety. And yet, when the battle is all over, he has the effrontery to apply to himself the Nation's grateful shout of praise, 'Well

"This is the plan of the man who dedone good liberately proposes to spend his life in gin and repert with his last breath."

TACKASS ON THE \$10 BILL.

Just Examine Your Treasury Note

of Scries of 1880 and Find It.

Springfield Republican, An interesting story comes from Chi-cago which every citizen who has a treasury note of the 1890 series can verify. He holds a "jackass bill." It appears that the government was made the victim of a practical joker in the Bureau of Engraving and the staid, serious money of the country has become the vehicle of a puzzle picture. The treasury officials have omitted to place an inscription on the bill, "Find the jackass," The abthe bill. the bill, "Find the jackass." The ab-sence of this has kept the matter a Gov-ernment secret for some time. Although the "jackass bill" has been in existence the for several years, it was first discovered the other day by a bank clerk in Chicago, who thought it was a counterfeit and rereported its discovery to the sub-treasury officials. They had been ignorant of the puzzle picture and sought information from Washington. The answer received was not made public except so far as the bill was acknowleged as genuine. The full text of the message from Washington, it is said, was to the effect to keep the "jackass" gulet and not let the

The length of the stem causes the tobacco smoke to cool appreciably in its passage from the bow to the lips and, gives a taste almost as mild as that produced by the Oriental nargile. The tobacco used with it is of a rich red-brown color, about intermediate in flavor and appearance between Virginia and Havana leaf. These pipes make very pretty ornaments for a mantel or for a

to all smokers. They are strong and durable, but unless oiled or varnished now and then, they are apt to split in a dry climate. Collectors make it a rule to oil them on the inside once a year.

The new book in England, entitled 'Drifting," created something of a sensation. It agserts that Great Britain is going to the dogs, politically, agriculturally, commercially, financially and economically. The author conceals his identity, saying: "I wish to concentrate pub-lic attention on my book and not to di-rect it toward myself."

keep the "jackass" quiet and not let the public hear its braying. The jackass shows as plain as a life-like portrait when the bill is turned up side down. On the face of the bill is an American eagle in a little engraving to the left of the seal, and between the names of J. W. Lyons, register of the treasury, and Ellis H. Roberts, treasurer of the United States. There is nothing "peculiar in the eagle until the bill is turned up side down and the eagle be-comes a jackass, perfect in outline. The fackass' picture is on one of the most jackass' picture is on one of the most common of the \$10 notes in circulation. The surprising thing is that the puzzle or joke on the engle was not discovered long ago. None of the serious men who handled the money at Washington ever thought of turning the bill upside down, men who examine designs be-they are committed to the engraving machine and the en-graver passed the double tender, as it was facetiously termed. The bills had gone all over the country when the artist who perpetrated the joke in a spirit of ma-Belousness and revenue sent word to the treasurer of the United States to scan the portraits on the treasury \$10 bill when held unside down. The lackass was found and there was consternation in the depart-ment. For the best interests of the service and for the sake of the reputation of the department it was decided to let the combination of eagle and jackass alone the hope that the public would never

notice the picture. The story that comes from Washington to the effect that an Englishman working in the Bureau of Engraving was dis-charged for having opinions counter to those of the Republican party. Having been given the usual month's notice, he decided upon a cold-blooded revenge upon the imperial eagle of McKinley. He was working upon the new plates for the \$10 bill, and by a deft handling of the lights shadows of the sagle he produced the and shadows of the eagle he produced the jackass. From an artistic point of view his work is excellent. The head and neck of the eagle, which has a peculiar left twist, furnishes the head of the jack. The light shading at the base of the wing becomes a perfect eye from the other view point. The thighs of the eagle form the ears of the lack.

French Wines.

Andre Leban in International Monthly. The old French vineyards that for so many centuries furnished our people with their national drink, which was both quickening and refining, occupied 2,500,000 hectares, and yielded every year an aver-age of 55,000,000 hectoliters of wine. We might say that, in respect to the generations which lived some 25 years ago, the capital of the first founding of this enorus source of riches was entirely liqui-To tell the truth, the expenses incurred by the improvement of the lands had sensibly increased, consequently there arose so much of the lowering of wages for hand labor, which plays so great a role in the care of the vine, that considerable expenses were occasioned by certain diseases, relatively recent among vines, such as oldium and mildew The yield, however, continued very profitable, and little subject to change. But the phylloxera came unexpectedly; after years of fumbling we were obliged to resign ourself to pulling up the old roots of the vine. We replanted with American cuttings, which we grafted with French me million francs were set aside for this work; the substitution is today ost complete, and we have nearly got back to a state of things similar to the large returns of former times. What a fail, It is not sown in large tracts, as in the difference, however, between the present the United States, but planted in small and the former economic situation! The lots of a fraction of an acre.

there were no shipments of wheat to San Francisco. The flour shipments to the Bay City, however, were much larger than usual, a considerable quantity going south to be reshipped at San Francisco on steamers bound for South Africa. The shipments for the month of March bring the total shipments from Portland for the senson to date, up to 10,231,229 bushels wheat, and 755,709 barrels of flour. of Shipments for the same period in the previous season were 7,256,905 bushels of wheat, and 787,557 barrels of flour. Puget Sound, which was well equipped with steamship facilities to the Orient, made quite heavy flour shipments in March, but the fact that the total of 64,044 barrels for the Orient was distributed among seven steamers shows that the business was mostly on small orders. In addition to the flour for the Orient, Puget Sound scnt one cargo, that of the Ilala, to South This vessel carried 20,250 Africa. rels of flour and 1666 bushels of wheat. The Moyune, for Japan, carried wheat for Europe and flour for Japan. The Santa Anna took 500 barrels of flour to Hono lulu. The remainder was carried by the Tartar, Glenshiel, Olympia, Buckingham, and by the Empress, sailing from Van-couver. Three sailers, the Zinita, Scottish Glens, and Sierra Miranda cleared for Europe direct, the total wheat shipment to all ports amounting to 472,210 bushels. While the month of March was highly

The First National Bank of Ashland reeived its charter Tuesday from the Controller of the Currency. The safe, which has been ordered from Cincinnati, has a burgiar-proof steel chest, a triple-dial included the French days-a system which included the French Catholics within the Yale time lock, and weighs 5000 pounds.

once becomes a fact in a boarding-house he is but a grain of sand. So is it with a woman. In her own home, her interest is constantly aroused, every womanly instinct is called forth, and she constantly becomes more and more womanly and lovable. It is the woman who boards who be

Your Own.

Philadelphia Record.

comes the trifler, not the woman who has her own home. It is the woman who boards who becomes flippant, not the woman with home tice and home cares. A woman who spends a few years in a boarding-house becomes accustomed to the ease and comforts which surround without any exertion on her own part, and she becomes more and more reluctant as the years pass by to exert her-

self to make a home for her family. Children brought up in a boardinghouse lose the best part of their rightful inheritance, for their have no home asso ciation, no happy recollection of their home life, in true pleasures to which they can look back when they have become men and women. Make, then, a home, girls, in which you can look back after many years have passed with pleasant thoughts of the many happy hours that were passed beneath your own rooftree There are cares and trials in every home, but the pleasures are also to b found there rather than in the boardinghouse, where gossip and idleness are among the chief features, and where home pleasures are lacking.

Canada and France.

Sir Charles W. Dilke in the Imperial and Colonial Magazine. The French Canadians disliked the Am-

erican colonists (with whom they had constantly throughout their history been fighting) a great deal more than they did that to them, at that time, harmless abstraction, "The King of England." The French Canadians had not been happy in mothe their relations with their own ountry. They were steady, even through the severe trials of the American war, when we were fighting both our revolted colonies and also France. The French Revolution profoundly shock their senti-ments, which in those days were far more Catholic and monarchic than they were nationally French. This is a mat-ter not easy for us to understand. We have lived through the full height of the nationality period. But, except in Po-land, it was a movement which began after the Revolution. For the masses of the people there was little idea of French nationality before 1789, and as French nationality before his, and as soon as the idea of a French nation, apart from the person of the King, sprang up in the minds of the French Canadiana, it was found by them a hobgoblin, of which their fright was such as to drive them more toward ourselves. The French sentiment of Canada, not very deep in the sense of affecting political action, is based upon language and literature, and is a sentiment of our day. There was not a single printing press in Canada a: the time of the British conquest, Th first newspapers came with British rule and a loyalty immediately after the conwhich we can hardly now at firs sight explain, is not inexplicable when

icans counted on the French Canadian siding with them. In those days Roman Catholics were excluded from our colonial assemblies and we had declined to place the gov ernment of French Canada in the hand

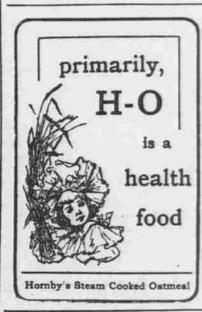

of an Assembly which would have ex-cluded the Roman Catholics, and had let it under a Governor in council, continue government. The clergy stood firm

9 It is a wonderful soap that takes hold quick and does no harm.

No harm! It leaves the skin soft like a baby's: no alkali in it, nothing but soap. The harm is done by alkali. Still more harm is done by not washing. So, bad soap is better than

What is bad soap? Imperfectly made; the fat and alkali not well balanced or not combined.

What is good soap? Pears'. All sorts of stores sell it, especially druggiata; all sorts of people use it.

DRUGGISTS MUST BE CHARY.

They Sell all Kinds of Hair Preparations, and Fear to Discriminate. Druggists sell all kinds of hair preparations, and as a rule they are wisely chary of giving preference to any par-ticular one, but many of them have come neurar one, out many of them have come out plainly for Newbro's Herpicide, the new treatment that absolutely kills the iandruff germ. H. Swannell & Son, Champaign, Ill., say: "One customer of ours who did not have a hair on top of his head when he began to use Herpicide now has a fair start toward a good head of hair. We believe Herpicide to be by 'ar the best preparation of its kind on the narket." Hundreds of similar testimo-

narket."
