THE BEER THAT MADE MILWAUKEE FAMOUS

M. Pasteur, of France, invented a process for killing all possible germs in a product, and we use it. After each bottle of Schlitz beer is filled and sealed it is sterilized.

This is an extreme precaution. The beer is brewed in extreme cleanliness, cooled in filtered air, then filtered. It seems impossible for a taint of impurity to get to it. Yet we sterilize every bottle.

We, who know brewing, know the value of purity. We add vastly to the necessary cost of our beer to assure it. You who drink it get the healthful results of our precaution. Your physician knows; ask him.
