fore 4000 People-13-11. TACOMA, May 5.-With two catchers injured, two pitchers sick and the third just out of the game on the previous day, Tacoma tried an amateur battery today. McRae, behind the bat, held up his end, but Scattle opened on McMullen, the Wilkeson pitcher, for a total of five hits, sesides drawing three passes during the first ioning. This, with three costly er-rors, gave the visitors a total of eight runs before the first chapter was closed. Then Tacoma tried Thielman in the box, but his arm was so lame that he had to be withdrawn at the end of the third into its hat. Carter went in and held the whiters down during the rest of the game. Tacoma made a desperate uphill fight, but landed two short of Seattle's total-13

The game was full of errors, but there were occasionally sensational plays, such as a dip from short infield by McCarthy out into left after a fly, which he captured, and McIntyre's running one-hand catch. Rand scooped in a bit to short center after a desperate run, but the work for both teams was marred by costly erpors. McIntyre, who had missed two chances to shut off Sentile's run-getting in the first inning, reinstated himself by detains the bell over the fence for four were occasionally sensational plays, such driving the ball over the fence for four bases immediately after he had drawn a two-bagger.

The crowd was the largest ever seen on the Tacoma grounds, between 2800 and 2000 witnessing the game. The Score. TACOMA.

SYSTEM MUST BE CHANGED Only Way to Get Honest and Capable Indian Agents.

NEW YORK, May 5.—A report by the investigating committee of the National Civil Service Reform League on conditions of the Indian service, with particular reference to the appointment of agents under the present Administration, has been presented to the council of the league. The facts and recommendations contained in the report have also been submitted to President McKinley. The report says in part:

report says in part:

"Under the system of patronage appointments, these wards of the Nation have in many cases been despoiled by fraudulent contracts, whereby the agents have obtained large sums of money in violation of law, while the morals of the Indians have been corrupted by the example of care-takers who are often ampie of care-takers, who are often drunken, brutal, licentious and dishonest. Recently the Secretary of the Interior re-quired that the bids for the leasing of the Indian lands should be opened and the leases awarded in Washington under the direct supervision of the Indian Bu-reau, and not as formerly upon the res-ervations. The result of this system, and of the exposure of the fraudulent use of Indian lands, already shows a net gain greater part of which was upon the Osage
Reservation alone. Nothing could better

of Indian administration." A number of instances are cited showing how agents have abused their power for their own pecuniary benefit and with demoralizing consequences to the Indians. The report says it seems evident that whatever temporary improvement may be made by changes in the personnel of the Indian service, no lasting reform can be inaugurated without a change in the system itself. It is submitted that under section 1752, of the revised statutes, the Chief Executive has the right to promulgate regulations declaring that all ap-pointments of Indian agents hereafter shall be made by promotion from the su-perintendents of Indian schools, and from perintendents of indual scaoos, and rollithe other higher grades on the classified Indian service and by details from the Army. RATE-MAKING MEETING.

Much Interest in Session of Western Classification Committee. SAN FRANCISCO, May 5 .- The meet-

ing of the Western: Classification Committee at Del Monte this week is at-tracting considerable attention in railroad circles, as well as among Pacific Coast jobbers, who will probably have a large representation at the meeting to protect their interests in a number of matters that will come up for consideration. The docket for the Del Monte meeting embraces 300 topics, the consideration of which will probably keep the freight officials in session three or four days. The question that is attracting the most serious attention, and one that is strenously opposed by the California line and the entire jobbing interests of the Pacific Coast, is the proposition to change the classification of a large num-ber of items of merchandise so as to permit Eastern jobbers and manufacturers to ship mixed carloads of merchandise to Pacific Coast points at rates that would prove destructive to the business of Pacific Coast jobbers. As set forth in the official circular that has just been served on the several roads that are parties to the Western Classification, the proposition embraces a scheme to establish a uniform discount for mixed carloads. It is thought that this is a new Among those who will remain, many have permit Eastern jobbers and manufacturloads. Local jobbers say they do not believe the transcontinental lines will undertake, in advance of the decision of the Interstate Commerce Commission in the St. Louis jobbers' case, to adopt any such principle of rate-making as that embraced in the scheme to establish discounts for mixed carload shipments, but they think it will be only proper precaution to be

NEW CHIEF OF ENGINEERS.

GENERAL GEORGE L. GILLESPIE.

WASHINGTON, May 5 .- General George L. Gillesple, who has just been appointed Chief of Engineers, is somewhat acquainted in Oregon and Washington. General Gillespie, then Major, was superintendent of surveys and improvements of the rivers and harbors in Oregon and Washington Territory, and of the 13th lighthouse district, and of the defenses at the mouth of the Columbia River, from October 21, 1878, to July 7, 1881. He has since been stationed at New York, where he has had immediate control of the great harbor and its improvement. For a brief period, however, he was stationed at Boston. General Gillespie is personally popular among the corps officers, and is an exceptionally equipped man, as is evidenced by the fact that he has had for many years the most important assignment of any officer in the Engineer Corps. General Gillespie graduated from West Point, June 17, 1862. At that time he entered the Army as a Second Lieutenant, going immediately into active service. Less than a year from his commission he was raised to First Lieutenancy. He was made Captain of Engineers in April, 1864, and was identifie with the battle of Cold Harbor, and later the slege of Petersburg. For gallant service in the campaign before Richmond he was, in August, 1864, brevetted Major. In April, 1865, he was brevetted Lieutenant-Colonel for gallantry in the campaign from Winchester to Appomattox, and in September, 1866, he was made a Major in the regular Army. In 1886, he was advanced to the rank of Lieutenant-Colonel, from which rank he promoted to the head of the Engineer Corps.

A committee of Atiantans was here today to deliver \$1000 worth of provisions, promising another car during the week. Atlanta also furnished 1000 feet of hose. Martial law is being rigidly enforced, and the town is quiet, although much anxiety prevails because of threats said to have been made by the negroes that they would obtain provisions by force at their first opportunity. flames is anticipated.

Tomorrow morning the citizens' committee will meet to further organize the mittee will meet to further organize the relief work. Every portion of the city will be visited, and food and provisions offered wherever there is suffering. At a meeting of the relief committee today a resolution was adopted offering work to every unemployed person in the city, to be paid for at the rate of \$1 per day and relief. and rations. The men will be put to work clearing away the debris in the ruined district. It is believed this plan will prove a happy solution of the race

situation, and will prevent any anticipated trouble.

The majority of the property-owners who suffered losses have announced their intention of rebuilding as soon as the debris can be removed. The city is rapidly recovering from the shock and ex-citement following the fire, and work actually begins tomorrow on several sites in the fire-demolished district.

While the occupants of the burning

building were struggling with the smoke and flames in hopes of forcing their way to safety, the firemen who were respond-ing to the alarm were vainly waiting for a freight train, which blocked the way of the fire engines, to move away from the crossing and give an open road to the fire. Marshal Driscoll, in charge of the firemen, called to the conductor and brakemen to move the train, but they refused to comply with his request. The refused to comply with his request, the police were sent for and the train crew was arrested. Then, under orders of the Fire Marshal, the train was backed from the crossing, but by the time the firemen reached the burning building the structure. ture had been destroyed. After an investigation by the police officials, the train crew was released on bonds tonight. The fire was fraught with an incident of the most distressing character. The little 2-year-old daughter of Christiansen, who lived on the third floor, was terribly burned, her left arm and her face being roasted. Her father, a follower of Dr. Dowle, refused to allow the little one to have medical attention, and fought desperately when she was taken from desperately when she was taken from desperately when she was taken from him. Permanently Cured by Dr. Kessler .

The reasons why Dr. Kessler is so successful in the permanent cure of the above chronic diseases are simple and easy of comprehension, yet extremely important. First, let it be said that to cure these lingering diseases requires many years' experience. By treating hundreds of such diseases every year the specialist becomes intimately acquainted with their every phase and condition, which enables him to know at once just what form of treatment is required to effect a speedy relief and a permanent cure. A specialist becomes to receive only homest, pains-

and a permanent cure. A spe-cialist's ability to cure deep-scated diseases is in proportion to his years of experience. to his years of experience.
