Turn in the Market. After the turn in the market came, which it did about noon, some noticeable selling of bonds still continued, and this

was explained as being due to a wish to secure funds to buy stocks at the at-

tractive level of prices to which the mar-

tractive level of prices to which the market had failen. In fact, the bargain-hunter was on hand and alert, and eyen in such a scene of disaster as that presented there are those who reap the benefit. The drop in prices carried the stocks of many substantial properties down to a level at which the current rate of dividends paid upon them is well assured making them good investment.

It was a very noticeable fact that throughout the most acute period of to-day's disturbance there was nothing heard to indicate doubt of the sound and

prosperous conditions of industry and business at large in the country. The stock market collapse was attributed ex-

clusively to overspeculation and over-extension of credits used in holding stock which it was designed not to keep but to sell at a higher price. The shock which caused the callapse

The incidents connected with the sale of an Aeolian Orchestrelle to His Majesty William II, Emperor of Germany, form a convincing illustration of the way in which the Aeolian has gained prominence and popularity—the chance hearing of the instrument in the homes and on the yachts of its owners and the recommendation which is universally given by those who are familiar with it.

Every new evidence of appreciation of the Aeolian must strengthen the belief that the instrument has merit of a decided character, and substantiates the remarkable claims made for it.

COLLAPSE IN STOCKS

Almost a Panic on Wall Street

Yesterday.

DUE TO NORTHERN PACIFIC DEAL

NEW YORK, May 9.—Bitter stress developed in Wall street by the second hour of trading on the Stock Exchange today. The violence of the commotion had spent much of its force at least for the time being, when the chairman's gavel fell announcing the close of the day's proceedings. The casualties were great and the field of battle was strewn with the wounded and may be with the great and the field of battle was strewn with the wounded, and may be with the dying. But of actual fatalities none was recorded of importance during the day. During the height of the panic, rumors of insolvencies were handed about more quickly than they could be reported. But no confirmation could be had of the intimations of financial wreck. Those against whom the rumors pointed refused even to show any signs of distress and professed themselves ready to meet all obligations. In more than one case the answer to these rumors was for a representative of the house to go upon the Stock Exchange and place loans to a large amount, as indicating the abundance of resources at hand.

But notwithstanding these and similar devices for keeping up credit and confidence, the fact was too obvious of the

devices for keeping up credit and confi-dence, the fact was too obvious of the crash of values on the Exchange that credits and borrowing power were shrinking at too predigious a rate not to leave the mind of the whole financial world in a condition of intense strain. But the indications at the close of the day were indications at the close of the day were strong that the principal damage had been wrought upon the speculative class or upon holders of securities on margin, for whatever purpose. The banks have been so well protected by recent extensions of the margins exacted in the market value of collateral over the amounts of loans placed that they have had little to fear short of an absolute had little to fear short of an absolute wiping out of market values. The shrinkage of collateral made it necessary for the banks in many cases to exact additional collateral during the day, and this added much to the distress for a time. But in the late dealings the principal banks in the field agreed to form a pool and raise a fund to loan the money rate down to 6 per cent on the Stock Exchange. The bid for money had been run up to 60 per cent and was threat-Exchange. The bid for money had been run up to 60 per cent; and was threatening to keep alive the panic. The dozen banks quickly came to an agreement to raise \$18,000,000, with implied willingness to increase the sum if accessary. There were very heavy loans placed also by individual banks, ranging in some cases to \$25,000,000 and \$30,000,000. Through the early part of the day bankers exacted the market rate for loans, but with the growing need to suppress but with the growing need to suppress
the panic offered the rate down to 6
per cent. Old customers of the banke
time, but when outsiders came in asking for loans, the law of supply and demand was allowed to run its course.

Excitement in Wall Street. The state of excitement was very ap parent all through the financial district during the period of the panic, but there were few sensational scenes. Now and then a white-faced woman would peer from a cab outside a broker's office and would be driven off in a fainting condi-tion after receiving a message from the interior. Whenever any near approach could be made to a ticker or to a board on which quotations were posted, there were great throngs of exciled speculators scrambling for a view of the course of the market But the real strees of the occasion came upon the men who were shut up in either their private offices or those of brokers or who were strug-gling and fighting on the floor of the

Exchange.

The outside country could obtain little The outside country could obtain little idea of the actual occurrences on the Ex-change, as the brokers are remote from the public galleries in their temporary the public galleries in their temporary quarters in the Produce Exchange and are half shut off from view by the 16-foot wall. In the brokers' offices many men sat who were reduced to absolute ruin as a result of 15 minutes' proceedings on the Stock Exchange. Some of these have been made opulent within a few weeks past as a result of the unparalleled rise in prices. With the true gambling spirit they have replaced all their winnings on new ventures on each turn. Today's drop, therefore, wiped them all out. In many cases, one could e the gambler's fortitude with which he chances of gain were accepted. But the glittering attraction of this market has brought into it a constantly increasing assortment of more staid and inexperienced speculators—men and women who have brought long-standing hoards from secret places and from savings bank deposits with the determination to make one successful stroke and to retire with the proceeds. The demonstra-tions from this class, which includes many women speculators, furnished the hysterical scenes and sensations of the

All classes of employes in the Stock Exchange district were under tremen-dous pressure throughout the day. The impression produced by contact with those was due to their coolness and nerve under the most trying and ex-citing circumstances. Brokers, messenger boys, telephone boys, clerks and the like have learned during the last few weeks to waste little time in demonstra-tions. They do things in the quickest and shortest manner, and so made things go smoothly today at a period when lack coolness might have meant disaster

o many persons. There was a strong feeling this morning before proceedings had commenced on the Stock Exchange that a panic could be averted only by the strongest meas-ures and with the greatest difficulty. The fact was apparent that the corner in Northern Pacific was still unbroken. The excited bidding last night to secur the stock for delivery today made that very apparent. The first steps to avert the panic were devoted to circulating reports that the conferences between the contending interests in Northern Pacific, which continued in one form or an-other throughout the night, had resulted in a compromise which would free the shorts in the stock from their compro

These efforts proved utterly ineffective in the face of the first quotations for Northern Pacific on the tape. The price paid for the stock ran quickly up to \$300 per share and then to \$300, to \$500 and then to \$700 per share on regular transactions and \$1000 per share for each The

stock lase night for delivery today had to pay whatever cash price the engineers of the corner chose to ask for it. The figures indicated in these opening transactions meant ruin for a large outstanding interest in the stock. The perception of this fact was the principal propelling factor in causing the demoralization in the stock market. The concerted effort to support the market by buying all stocks which might be offered, which is always the most effective manner of dissuading persons from sell-Shrinkage of Nearly Seven Hundred Millions.

velocity the farther it falls. Such a shoveling out of stocks as occurred during the second hour of today's stock market was never seen before. After a sale had been made at a fixed price a broker would throw in an additional block at anywhere from five to 10 points lower without stopping to demand any intermediate price for his offering. The extent of the decline during the half hour was as great as in some cases has taken as great as in some cases has taken weeks to attain on the advance, although all observers have agreed that the rate at which prices have been going up has exceeded any previous experience. The figures alone suffice to indicate the

The city was packed to the doors. The population of Los Angeles, according to the census, is over 100,000, but the streets must have held almost twice that number today. Pas-adena, Santa Monica and other neighbor-ing towns in Southern California were ing towns in Southern California were literally depopulated. The scenes on Broadway, where the reviewing stand was located, resembled Pennsylvania ave-nue in Washington on the day of an innue in Washington on the day of an in-auguration parade; every facade flamed with bunting and pampas grass plumes-red, green and orange, the colors of the fiests, prevailing; terraced stands of people, the windows wailed in with them, the sidewalks to the roped street pucked with them like sardines in a box. Mrs. McKinley did not witness the show, but she drove along Broadway and received the plaudits of the multi-tude just before the procession appeared. The President rode at the head of the parade in an open carriage drawn by six parade in an open carriage drawn by six spirited milk-white horses with yellow satin harness. At the head of each horse walked a Spanish caballero in green velvet with much gold braid about his bolero. The carriage was a mass of white carnations and yellow coreopsis blossoms. A troop of cavalry with yellow horsehair plumes waving above their helmets and wreaths of flowers across their shoulders and blanket rolls of red carnations behind their saddles, headed by a band playing the "Star-Spungled Banner," preceded the carriage of the Chief Magistrate to the reviewing stand. As each carriage reached the reviewing As each carriage reached the reviewing As each carriage reached the reviewing stand the ladies in it arose and smilling saluted the President with deep courtesies. The President was kept on his feet most of the time returning these charming greetings. He apparently sujoyed the experience hugely. And then remember that we are not only soldiers serving in the same army, but that we were serving for one of the noblest causes that ever engaged mankind—that of the preservation of this Republic— there is an added sanctity to our relations from '61 to '65. I am here to tell my comrades of '61 that I have only within the last week passed through the battle-fields upon which so many of you fought and upon which so many of your com-rades fell. I am here to tell you that on those battlefields and in the Southern cities and towns through which I passed those who bid me warm welcome and those associated with me were the men who were your foes 40 years ago-friends now, marching side by side as they did with the Grand Army of the Republic to with the Grand Army of the Republic to give me greeting-all now having one faith, one hope, one aspiration, one des-tiny and all loving the same old flag. Several pocketbooks were found on his person, a gold nugget which Mr. Moore's son had obtained at the Congress mine in Arkuna and Secretary Wilson's in Arisona, and Secretary Wilson's pocketbook, which contained \$175. AT THE WALDORF-ASTORIA. Hopeful View Taken of the Outlook for Today.

NEW YORK, May 9.- The lights of the Waldorf-Astoria were the camp fires to-night of hundreds of the soldiers of finance who were o nthe firing line in Wall street today and as they sat in the cheery glow they nursed their wounds and counted their dead. The casualty list was a long one, but the night had more cheer than the preceding one. There was no wild scramble for over-night loans of Northern Pacific stock and the new day seemed to be fair in prom-ise. There was intense relief at the

promised succor of the Northern Pacific shorts. It was accepted as a fact that Kuhn, Loeb & Co. and J. P. Morgan & Co. would settle for \$150, and it was believed that the action of these two great houses would fix the price for everybody. The price, it was generally agreed, was a fair one. The rumor that J. P. Morgan & Co. and J. J. Hill were after all on top in the fight to control Northern Pacific stirred the crowd, but the chief concern was for the future of the market.
