## SHAMROCK II BEATEN

LIPTON'S OLD YACHT OUTSAILED THE NEW CHALLENGER.

Watson Believes Some of Her Plates Were Displaced by the Grounding Last Week.

WEYMOUTH, May 11 - Shamrock I to-WEYMOUTH, May 18.—Shamrock I to-day beat Sit Thomas Lapton's new boat by five minutes and five seconds over a triangular course of about 20 miles. The only possible disadvantage to the challenger was in the fact that she used challenger was in the fact that she used her old mainsail, which sits worse since its sait water bath of Thursday. There was no discoverable holding back of the challenger, slithough once or twice she pointed such a opurse as left the suspicion that the steersman was not taking advantage of every chance. There is no doubt that the result of today's trial was distinctly disappointing to those who had pinned their faith to the new challenger, especially as Shanrock I, on the previous spins, had not shown equal qualus spins, had not shown equal qualprevious spins, had not shown equal quarity with the new racer on any point of sailing with the exception of running.

The Erin towed in both the Shamrocks yearerday in a hot, hazy calm, which gave little promise of racing weather. The yachts anchored inside the Portland breakwater. During the night a fresh easterly breeze ploed up, and early this breakwater. During the night a fresh easterly breeze piped up, and early this morning it was blowing a half gale and a big white ses was running outside. On the first sign of a juli sail was made on both yachts. The wind was still hard and fresh. Shamrock I set her jib header over her full mainsail and the challenger. owed suit. Anchors were tripped

followed suit. Annors were impects shortly before midday.

The first leg of the course was from the Portland breakwater to the Shambles lightship, the second to Whitehouse Point and thence to the point of starting. The old Shamrock had a length the best of that the challenger was unable to head her and the Shambles lightship was rounded by Shamrock I 45 seconds ahead of Shamrock II. The row to Wilson. of Shamrock II. The run to Whitehouse
Point was dead to windward. Captain
Wringe was able for over half the course
to keep Shamrock I on the weather bow
of the new boat, and held all his advanof the new boat, and held all his advantage at the rounding of the second mark. As the yachts squared away for the home run. Shamrock I led by about a minute. Down the wind the two yachts sailed, with jib topsails set, the old boat adding to her lead throughout the six miles and; crossing the finish line five minutes before the 1991 challenger.

Amateurs on board the challenger were inclined to be despondent over the results of today's races. One who holds out against this feeling, however, argues

II." he said. "those tremendous booms nd gaffs carried by cup racers over-urden them in any press of wind or ea. One day on the Clyde, in conditions ery similar, the Britannia beat Val-II, although the latter afterward made the closest fight ever made for the cup. The alterations made in Shamrock I since her return are just such as would relieve her of the worst part of this burden. I argue that had the challenger's spars been changed in the same manner for today she would have beaten the old boat easily, while had Sham-rock I been in her American form, she would not have been anywhere in the neighborhood of the line when the challenger finished. In running and reaching, the shortening of spars was all in favor of Shamrock I, and in going to wind-ward, the new yacht's sack of mainsail

left her no chance."

Mr. Watson considers today's results Mr. Watson considers today's results so unsatisfactory that he had decided offhand to take the new boat back to Southampton and have her docked in order to ascertain \*\* Ther any of the plates were displaced by the grounding on Decaphank last week. Opportunity will be taken to have her new gaff and mainsail fitted. The work will proceed night and day until it is finished, and the trials will then be resumed at Weymouth.

Views of American Yachtsmen. NEW YORK, May 13.-The majority of American yachismen were not unduly excited today over the reported defeat of Shamrock II, by the '99 challenger. The general opinion seemed to be that these trials of the two Shamrocke are not regular races and that the new Shamrock is practically an untried boat yet. rock is practically an untried boat yet and that it would be unfair to judge her work by an informal trial. Outside of this, Watson, her designer, delights in mystery, and even if the new boat was minutes faster than the old Shamrock, he would not take the public into his

Constitution, when asked what he thought of the trial, said: "I do not see that the new Shamrock's defeat by the old challenger proves any-thing. We don't know what they were

doing on either boat." Mr. Duncan, in speaking of the Con-stitution, said that he did not think she would have her trial before next Mon-He said:

"We are waiting for her steel gaff and I doubt if it is finished before Monday or Tuesday of next week. I won't say post-tively that her first trial will take place next Monday, as it might be a wet day, and we would not risk bending her new mainsall in damp weather."

## LIGHT RUN OF SALMON.

### Cannery Owners and Fishermen Are Very Discouraged.

The prospects for anything like a suc-cessful fishing season on the Columbia River are not at all bright, and cannery men are feeling rather gloomy. Very few salmon are being taken at any place on the river, but more shad are caught than there is market for. The late rise in the river has discolored the water and this interferes with fishing, and it is hoped that when the water clears and gets a little warmer there will be a good run

A canneryman who was in the city yesterday says that he cruised around the fishing grounds between Astoria and Skomokawa a day or two ago, and places which used to be regular beehives a year or two ago are now very quiet. He saw only two gillnet fishermen where there used to be scores of them, and things appeared very quiet. He said if the salmon fishing falled it would be a great blow to the Columbia. Salmon are scarce all along the river. Up to Saturday last a cannery at the Cascades had put up only 100 cases.

The quantity of salmon being received here from the Willamette and Clackamas has been only about a ton a day. A litthe steamer goes up to Oregon City every day and picks up the fish at some 15 places on the way down, but the catch is light and divided among the large numof boats employed amounts to but little for each. A few years ago the boats used to bring salmon down from Oregon City every day from April to December, from 300 to 2500 per day, and on the first day of the season over 5000, averag-ing 18 pounds each. The fish are scarce now and fishermen begin to imagine that they will never be plentiful again.

## REPAIRS TO BRIDGES.

Approaches From West Side Will Be Put in Better Order.

The West Side approach to the Burn-side-street bridge is to be repaired at once, under the direction of Road Master Steele and the supervision of the County Steele and the supervision of the County Court. When a new deck of wooden blocks was piaced on the bridge several years ago, the old timbers underneath were allowed to remain, and those of the were allowed to remain, and those of the approach are now decayed, and will be replaced by new ones. The blocks will have to be taken out. They are split and broken in many instances, so that they cannot be used again, and a plank roadway will be laid instead. The blocks on the main part of the bridge and the timbers are still good. There has been considerable complaint by teamsters that on the approaches where there is considerable. the approaches where there is considerable grade the blocks are undesirable able grade the blocks are undesirable, because they are slippery. The work will be pushed to completion, as it is necessary to have it done before the high water comes. The cost will not be large. The Morrison-street bridge West Side approach will also be repaired, The planking is worn out and the underpinning is becoming rotten. The County Board has discussed the matter of closing the entrance to the lower wharf ty Board has discussed the matter of closing the entrance to the lower wharf leading from the West Side entrance of this bridge, but will not do so unless advised by the District Attorney that it is legal. The records will be examined to ascertain what shape the property is in. If the entrance to the lower wharf is closed it will interfere with a woodyard long maintained there. There are only a few ordinary repairs to be made to the Madison-street bridge. No special improvement is required.

A contract for lumber for the various bridges has been let to the East Side bridges has been let to the East Side Lumber Company for \$1134. It will be used in the repairs.
