Morocco will have no trouble with France. There are still some matters to be settled, but danger of friction has passed.

There Are Still Some Matters to Be Settled, but Danger of Friction Has Passed.

PARIS, May 27.—The Sultan of Morocco has yielded in the main to the French demands. There are still some matters to be settled, but the danger of serious trouble is averted.

British Secretary of War Unpopular.

NEW YORK, May 27.—There is no doubt, the London correspondent of the Herald thinks, that Mr. Brodrick, the Secretary of State for War, is not popular with the British Army. It is learned from talk in the military clubs that no less than 100 officers have signed their papers to the War Office...

Duke and Duchess of Cornwall.

SYDNEY, N. S. W., May 27.—The British steamer "Ophir," having on board the Duke and Duchess of Cornwall and York, arrived here at 11 o'clock this morning. She was met outside the harbor by a squadron of the public school vessels, conveying the Premier, Sir William Lane, the Ministers and federal officials. The Duke and Duchess landed at 2 o'clock, and were greeted by enthusiastic crowds. The decorations were magnificent, and a brilliant military escort awaited the landing of the Duke and Duchess.

Rioting in South Russia.

LONDON, May 27.—Rioting has spread to South Russia, says a dispatch from St. Petersburg, as a result of the production of the anti-Semite play, "The Snugglers." At Kuznetz, thousands of people congregated about the theater, and stoned the police. A detachment of Cossacks collected and dispersed the crowd. Thirteen policemen and two officers were severely injured.

To Study South African Trade.

NEW YORK, May 27.—Interest is being taken in London, says the Tribune's correspondent, in the possibility that the government of the Dominion of Canada has dispatched a representative to South Africa to study the trade capabilities of that country, with a view to opening up and extending the markets for Canadian products there when the opportunity occurs for doing so.

New Submarine Cable.

NEW YORK, May 27.—A new submarine cable between England and Germany has just been put down. The cable is owned by a British company, says the Tribune's London correspondent, and the German Government has contributed to its cost, and a German firm was employed to carry out the work.

Creating an Immense Sensation.

ST. PETERSBURG, May 27.—The prohibition of the publication of the Novos Vremya for a week, because of its editorial article on the labor troubles, is creating an immense sensation, as indicating extraordinary nervousness on the part of the government.

Turkey Rescinds Order.

CONSTANTINOPLE, May 27.—In response to the protest of the foreign embassies, the order issued by the Turkish government prohibiting the entry of typewriter and rubber stamps into the country has been rescinded.

British Post Captured.

LONDON, May 27.—The Times publishes the following from Cradock, dated May 27: "Capturing the invaders of Cape Colony captured a British post of 40 men near Naraienburg, after a stout resistance."

Punishment for Blasphemy.

Gentleman's Magazine. August 17, 1848, in Catholic Bazaar, Gaston XI, husband of Eleanor of Aragon, in his Rubric de Blasphemateurs, prescribed by 20 sols Morlaques, or a day in the pillory, as an adequate punishment for him who should deny our blasphemy in a public place, God or Blessed Virgin, or commit perjury; and merely 6 sols to be paid by each of those who heard such blasphemy, without denouncing it forthwith. To give the enactment greater force it was ordered to be published with the sound of trumpets each year, on Midsummer Day and at All Saints, in every village throughout Bearn. Its preamble is as follows: "Whereas complaints have lately been made to the Prince and his High Court concerning wicked blasphemers and deniers of God, of the glorious Virgin Mary His Mother, and of the Saints of Paradise, as well as touching the vain oaths and perjuries made in His name, by reason of which said blasphemers we must presume, according to Holy Scripture, that precautions and tribulations partly come for the affliction of human nature in this world, may the Prince and his High Court, being of opinion that, in accordance with the disposition of divine and human law, Almighty God ought to be praised and honored by His reasonable creatures and not blasphemed; and inasmuch as our laws have imposed punishment upon such blasphemers: Now, etc. In and after 1832, whether owing to the odium theologum then beginning to run its course in Bearn, or by reason of some other contemporary social agency, blasphemers who offended twice had their tongues pierced, were flogged the third time, and on the fourth time were hanged. This was an example of the growing severity in December, 1846, a heretic named Charreter was whipped round Bayonne and had his tongue pierced with a hot iron, after being compelled to listen to a sermon in the cathedral in his shirt, bareheaded, with a rope round his neck, a fagot on his shoulders, and a lighted torch in his hand."

Foreign Bonds.

Theodore S. Woolsey in the Forum. A state's bonds fluctuate with its financial condition, and also with its political situation. No investor desires a drop in the value of his securities. If he buys the obligations of a foreign state he will naturally study all the factors which are likely to affect their value. If the state in question is ambitious, aggressive, or military power, it is more likely to get into difficulties than an unambitious one. War will diminish the balance available for interest. It may cost part of the creditor's security, as happened to Spain in the loss of Cuba; in any case, the price of its bonds goes down. Even British consols are with a considerable drop since the Boer war broke out. The various bond issues of a state have no settled priority other than the power of the state of creditors to demand and more effectively than another set. Therefore, the other obligations of the borrower should be scrutinized. Here politics must enter. If Russia should press Turkey for payment of the indemnity set at San Stefano the regular creditors might fare hardly.

A Triumph of Decency.

New York Times. We make our compliments to Police Captain Donohue of the West Forty-seventh Street Precinct. It was made plain days ago that the death of Father Phillips was in part due to his lamentable and periodical dipsomania. It was made especially clear that the cause of weakness, stood alone as the bluish upon an otherwise blameless and useful life. After the statements to that effect were made to the United States marshal, "yellow" to go on intimating as the French say, that it was the business of the police to "hunt the woman," or as we say, that there was "a woman in the case," the intimation was made, nevertheless. They even increased and became more sonorous. It was at this point that the police intervened to discover "the mysterious woman" who was supposed to be "connected with the case." They discovered her. They even brought her to the station-house and examine her for some hours. They satisfied themselves that she was nothing whatever to do with the tragedy in connection with which she had been sought. And, thereupon, Captain Donohue disclosed the instincts of a man of honor. He refused to give any clue to the identity of her, or to give any clue to either. Thereby he protected "the right to privacy" and gave lessons in the art of decent behavior to a number of persons who were born to sell their bodies to the lowest bidder, and as well connected as himself. Good for Captain Donohue.
