

M'DANIEL MUST DO TIME

SUPREME COURT HOLDS HIS CONVICTION WAS JUST.

He is Youth Murdered Claire Fitch, of Portland, Two Years Ago This Month.

SALEM, Or., July 1.—The Supreme Court today affirmed the decision of the Circuit Court of Multnomah County in the case of the State of Oregon against Francis E. McDaniel, who was convicted of the killing of Claire Fitch, and sentenced to 2 1/2 years imprisonment in the penitentiary.

The opinion states all the facts regarding the finding of the body of Claire Fitch in Cycle Park, the testimony of the witnesses, the evidence in the case, and the reasons for the conviction.

The next assignment of error was based upon the ruling of the court in admitting in evidence a letter written by the defendant to Claire Fitch as the couple seen by a Miss Rohrer going out Twelfth street on the evening of July 25.

The fact that the letter was taken from the person of the defendant at the time of his arrest, by the officer having him in charge, is no valid objection to its admission in evidence.

STRUCK BY THUNDERBOLT

TRAGEDY OF THE LAKE FRONT AT CHICAGO.

Ten Boys and One Man Who Sought Shelter From the Storm Were Struck by Lightning.

CHICAGO, July 1.—Crowded together in a little, zinc-lined shanty under a North Shore pier, 10 boys and young men and one old man met instant death by lightning today. They had left their boats and sought shelter from the fierce thunder storm that deluged the northern part of the city, about 1 o'clock.

Rheumatism. Rheumatism is due to an excess of acid in the blood. When this escapes through the pores of the skin, as it often does, it produces some form of skin eruption—some itching disease like Eczema or Tetter—but when these little tubes or sweat glands are suddenly closed by exposure to cold and sudden chilling of the body, then the poisons thrown off by the blood, finding no outlet, settle in membranes, muscles, tissues and nerves. These parts become greatly inflamed, feverish and hot; dagger-like, maddening pains follow in quick succession, the muscles become extremely tender, the nerves break down and the sufferer is soon reduced to a state of helplessness and misery. This acid poison penetrates the joints and seems to dry out the natural oils, and the legs, arms and fingers become so stiff and sore that every movement is attended with excruciating pains.
