

BOX ARTISTS TOUCHED UP

PORTLAND LANDED HEAVILY ON SEATTLE'S PITCHERS. Harmon Allowed Six Hits in Two Innings—Hickey Toed the Slab to Give Seven Bases on Balls.

SEATTLE, July 24.—An off-day for two of Seattle's box artists today gave the game to Portland by a score of 12 to 5. Harmon was touched up for six hits in the first two innings, besides which he gave three bases on balls and hit two men with a pitched ball, the whole netting the visitors eight runs. Hickey was put in the box in the third inning, and did but little better, giving seven bases on balls during the remainder of the game. Seattle by means of four hits, four errors by Portland and a base on balls, brought in five runs in the seventh and eighth innings. The score:

TACOMA TOOK SECOND GAME.

Poor Hitting and Stupid Base Running Gave Dudes the Victory. SPOKANE, July 24.—The second game of the series went to the Dudes because of poor batting and stupid base-running. Stutz made a couple of circus catches that cut off runs each time. Swindells had a finger nail torn off, and was relieved by Loughead in the eighth inning. Attendance, 600. The score:

CONSTITUTION BEAT COLUMBIA OVER A 30-MILE COURSE. Yachtmen Convinced the New Boat is the Faster in Light Weather—Other Sporting News.

NEW YONDON, Conn., July 24.—In a fine southwest breeze, over the 30-mile course from New Haven Breakwater to Sarah's Ledge, at the mouth of New London Harbor, the Constitution again showed what a superb racing craft she is in light weather and smooth water. She beat Columbia today 8 minutes and 23 seconds, fairly and squarely. There were no waves, the wind holding true and steady, with the exception of a shift of a couple of points after two-thirds of the distance had been covered. The breeze at no time was of sufficient strength to raise a single whisp on the waves.

Chicago Beat Washington. CHICAGO, July 24.—Chicago battled like fiends and ran bases like wildmen, making 20 hits and stealing eight bases. Attendance, 1200. The score:

Pendleton Beats Spokane Woodmen.

PENDELTON, Or., July 24.—The Pendleton nine, with Chapler and Penland as battery, defeated the Spokane Woodmen of the West this afternoon by a score of 15 to 14. This is the first game the Spokane men have lost. The score was 15 to 1 at the end of the seventh inning, after which the Woodmen recorded 13 times at the homeplate, Pendleton adding only two.

ENGEL IS SUSPENDED.

Portland's Crack Pitcher Has Trouble Over His Salary. George Engel, Portland's crack pitcher, has been suspended by President Whitehead of the American baseball club for refusing to go to Seattle with the other members of the team and play in the Seattle-Portland series this week. Engel's refusal grew out of a disagreement over a desired raise in salary.

reached, when it was taken in again for a few minutes and then sent for the run to the finish. The Constitution kept a mile closer to the Long Island shore than her rival until Bartlett's Reef was reached, and she finished a good mile in the lead, having gone 30 miles in 4 hours, 40 minutes and 30 seconds. This was remarkably fast, when the comparative lightness of the breeze is taken into consideration, and also that the tide was against her over the greater part of the course.

Knowles Will Come With Athletics.

LONDON, July 24.—Lees Knowles, M. P., the old-time runner, will accompany the Oxford and Cambridge athletic team to America. The party will leave Liverpool for Boston August 15. September 14 the Englishmen will compete against Toronto and McGill Universities at Montreal, and at New York, September 23, against Harvard and Yale.

HOT WAVE AND SUN SPOTS.

Astronomer Servis' Theory of the Present High Temperature. NEW YORK, July 24.—The Journal and Advertiser prints an article upon the hot weather by Dr. Servis, the scientific writer. The article, dated at Ithaca, N. Y., says:

"The burning heat now afflicting the whole of the United States, and felt also in the British Isles, is the Atlantic, and generally throughout the northern hemisphere, is convincing proof of the fact that the earth is the satellite of a variable sun spot, and that the nature of the source of terrible heat is directly in the sun and due to an extraordinary increase in its effective radiation on the whole surface of the earth. The nature of the present meteorological disaster is satisfactorily explained.

"All astronomers know that the face of the sun is blanketed with absorbing vapors, while its interior is molten hotter than the glowing shell that we see. Strip off the vaporous blanket entirely and the surface of the earth would probably burst into smoke and fire in the twinkling of an eye. The sun's rays are simply a gush of unbearable heat that would be poured upon it.

"Whenever, as occurs periodically, though not always to the same extent, the solar vapors are thinned, the heat from within leaps out through the weakened shell and strikes the earth and the other nearby planets as a blast of fire from the suddenly opened door of a blazing furnace. That is what has happened this summer, and the immediate agency that has done this is the opening doors and sent forth the deadly fire blast is the mysterious power whose visible manifestation is the presence of the sun spot. But it is a mistake to suppose that the sun spots themselves exercise any direct influence upon the weather or that there must be spots on the sun whenever there is extraordinary heat on the earth. The spots are simply indicators of the sun's condition, reminding in that respect the eruptions on the face of a smallpox patient. They tell the story of the sun's internal convulsions and indicate some of the places on its surface where the pent-up forces are bursting out.

"For the next four years these gigantic outbursts will increase in fury and a corresponding series of terrestrial seasons marked by great excesses of temperature, sudden contrasts and extraordinary cyclonic disturbances will follow."

Director Campbell Says It Is Not So.

SAN JOSE, Cal., July 24.—Director Campbell of the Lick Observatory, puts no faith in the theory advanced by some European astronomers that the extraordinary weather conditions in the Middle West are due to solar causes. Professor Campbell said today to a representative of the Associated Press that, in his opinion, the present weather conditions are due to local and earthly causes. "I do not connect weather conditions with solar disturbances. The spots on the sun are about at their minimum intensity. They will be at their maximum about 186 or 1908. Therefore, great heat has generally occurred at the period of the maximum of these spots, but there is no significance whatever to be attached to these incidents."

REAL CURES OF REAL PEOPLE

The Challenge of Truth and Skill to Humbug and Deception. Read the Columns of the Daily Press, Examine Carefully the So-Called Medical Testimony, and Decide for Yourself.

In these columns the manner and kind of this testimony have been contrasted very vividly with so-called medical testimony published for various purposes in the newspapers. It may be well to let this matter sink deeply into the minds of the people who may be sick or suffering. Perhaps it is not altogether a waste of time to teach those whose health and strength are failing what real medical help is, and how and where it can be obtained.

Perhaps this lesson to all the countless unfortunate and suffering may be quite as important as any that can be taught. MARK YOU—THESE CURES MEAN SOMETHING. It is no light thing for dwellers in this city and neighborhood, whose daily contact and going out are marked and known to all of you, to come forward and give their names, their addresses, and their experience regarding their sickness in the public prints.

Read then, in this record of cures, the MASTERY of disease that will cure you. It will take away that cough. It will relieve that pain in the head and limbs, it will drive out that impurity of blood that disfigures the skin; it will stop that nervous fear and trembling; it will relieve that vertigo effort to breathe which makes you an invalid; it will restore the hearing to ears that are impaired.

And why has all this been said and written? What is the necessity of enforcing this lesson and keeping it before the public? That the people may know the truth about disease, and not be misled by false teachings or false prophets; that humbugs and quackery and deception shall be made to live in the light of contrast with real skill and with professional faith and well kept through all these years.

Worthy of the Fullest Confidence Says One Who Knows. Mr. W. L. Dinmore, a well known merchant, located at 399-91 East Burnside street, Portland; from his own personal experience in the treatment of the disease, he recommends the Copeland Institute to all sufferers from catarrhal troubles. When I began my treatment I was in a wretched state of health, but now I am quite well.

Miserable Sick Headaches which became so bad that they unfitted me for work for several days at a time. I was unable to properly digest food, which lay like a load in the stomach and caused me great distress. I lost flesh and strength and my nervous system seemed completely shattered.

Thoroughly Satisfied Myself that these claims were genuine and true. I then began my treatment and have obtained the greatest possible benefit. I now breathe freely through my nose at all times, have gained 15 pounds, and my general health is better than it has been in years.

NEW YORK, July 24.—Late this afternoon it was discovered that several of the suspension rods of the north cable of the Brooklyn bridge were broken. The damage was small, but it caused a furor for a time. Some excited persons circulated a report that the bridge was in a dangerous state, and an order to suspend traffic upon the structure was issued through the office of the Commissioner of Bridges, police reserves were called out and presently the crowd of Brooklynites and other residents of Long Island which thronged the Manhattan end of the bridge at 6 o'clock were thrown into much excitement. The car service was stopped altogether, as was the driving of all vehicles through the Manhattan end of the bridge at 6 o'clock, but the Brooklyn ferries carried thousands more than usual.

When the bridge and Brooklyn Rapid Transit Company authorities found how greatly the damage had been exaggerated, the traffic was partially resumed. By 9 o'clock the bridge cars were running once more. Chief Engineer Probasco, of the Department of Bridges, said tonight that tomorrow all traffic would be resumed, and that the broken rods would be replaced in two or three days. The breakage, he said, was due to expansion, presumably from the heat.
