

COLUMBIA SALMON PACK

CANNERIES WILL PUT UP ABOUT 254,000 CASES.

Cold-Storage Plants Handled About 83,000 Cases—Season Closed This Morning.

ASTORIA, Or., Aug. 14.—The spring fishing season on the Columbia River will close at 4 o'clock tomorrow morning, although as fishing is permitted on the Washington side until 12 o'clock tomorrow night, operation will be continued on a small scale at the canneries until Friday. During the past week the run of fish has been very light, and as a result the pack is considerably less than it has been estimated to be. The cold-storage output of the amount of fish handled will be fully equal to that of last season. To secure exact figures is almost an impossibility, but the canneries are reticent about giving out their pack, and are rather inclined to underestimate it. Some say the season's pack will not exceed 250,000 cases, but a carefully prepared estimate places it at 254,000 cases. This is on the basis of four dozen pound cans to the case. Besides this, about 250 tons of raw fish, representing 32,000 cases, were handled by the cold-storage plants. The salmon were of the finest quality, and it is only in the last few days that the poorer quality of fish have entered the river. The estimated figures show that about 10,000 tons of raw fish were caught and sold during the season at 54 cents per pound, the average price paid, which means a total of \$5,400,000. The following are the estimated figures for the season, besides the large amount that has been expended for labor in handling the catch. The estimated pack of the individual canneries in cases is as follows:

Fishermen's Cooperative	25,000
Cutting & Sanborn	25,000
Cold River Packers Assn.	30,000
Booth	30,000
Pillar Rock	30,000
Megler	15,000
Coquille	15,000
Warren (Cascades)	11,000
Warren (Cascades)	8,000
McGowan	3,000
Seufert	6,000
Total	254,000

The traps some of the seiners and a few gillnetters were at work last night and today, but the catch was light, except by the up-river seiners. The fish did not average well, and it seems to be a bad sign for the industry. Every one connected with the industry is satisfied that the season closes tomorrow, and there will be no inclination to continue fishing longer, as the canneries and cold-storage people say they have all they want.

MARION COUNTY HOP SHORTAGE.

Salem Buyers Know of It, but Deem Estimates Premature.

SALEM, Or., Aug. 14.—Salem hop dealers confirm the report from Gervais in today's Oregonian, that the hop crop will be lighter than last year because of the continued hot weather. Some observers of hop conditions put the decrease as great as 20 per cent, while others say it will not be over 10 per cent. Perhaps the average of estimates will reach 15 per cent. Nearly all persons interviewed say it is too soon to make an estimate of the shrinkage in the crop because of the weather. It seems to be the prevailing opinion that a rain, or even cooler weather the next two days, will make a wonderful difference in the harvest.

John Carmichael, buyer for an English firm, says he has visited a number of yards in the last few days, some of them as late as yesterday, and he thinks the crop, as now indicated, will reach 25,000 to 30,000 bales. Should the dry weather continue, the crop would be less. He thinks it is too early for people to make any definite estimate of the crop, and reports of a shortage should be deferred a day or two. He thinks favorable weather the remainder of the season would bring the crop up to that of last year.

Representatives of T. A. Lively & Co. say the shortage, as judged by present conditions, will be about 20 per cent, but that rains or cooler weather will yet do a large amount of good. The hops that are showing the effects of dry weather the most are those growing on the prairie and high ground. The crop in the valleys are not suffering so much. Some of the hops are so far advanced that a rain would not help them much, but the great part of the crop is in the development that will be aided by more favorable weather.

W. T. Slater, who, as receiver of the Williams & Goodrich Bank, was until recently owner of the Beardsley yard, near Eola, says he has had occasion to observe the condition of the hop crop, and he is of the opinion that the yield will be less than last year. Even the best of weather from now on, he thinks, would not bring the yield above that estimated by the Gervais correspondent of The Oregonian.

While these gentlemen and others are agreed that the yield will be less than last year, the question of great quantities of hops would be injured, but with a change in the next two days the amount of inferior hops would not be worth mentioning.

ALLEGED ROBBER SEEN.

Passed Officer Who Was After Him and Dined at a Mine.

BAKER CITY, Aug. 14.—Stewart, the third member of the gang alleged to have stolen the clean-up of the Red Boy mine, was seen at the Don Juan mine last Saturday, where he took dinner. The people with whom he dined did not know that he was suspected of the robbery, and the Red Boy hold-up, or he would have been captured. Deputy Sheriff Baker, of Sumpter, crossed the road behind Stewart, but did not know who he was the man for whom he was looking. It is believed Stewart has left the country for good. The officers are still searching for him, however.

Will Not Sue Baker City.

Joseph Reeder, the Bonanza miner, who threatened to sue Baker City because he was assaulted by a negro pickpocket while he (Reeder) was under arrest, and had his law broken, has notified his attorney that, as his law has been broken, he finds he can talk as well as ever, he does not desire to bring the suit. Considerable interest was manifested in this suit, when it was first announced, because of the law point involved as to the liability of a municipality for damages to a prisoner injured by any person other than an officer, while under arrest.

CIVIL SERVICE EXAMINATIONS.

Schedule for Those to Be Held in the Northwest This Fall.

WASHINGTON, Aug. 14.—The Civil Service Commission has announced the schedule of Fall examinations, to be held in all parts of the United States, at field positions in almost all branches of the Government service. Examinations are to be held at two places in Oregon, Portland and Pendleton, and at three points in Washington, Seattle, Spokane and Whitman, while the Idaho examinations will be held at Boise.

On October 12 the Portland examinations will be those to fill places in class A, embracing apprentice, bookbinder, book-keeper, clerk, stenographer, typewriter and typewriter, for the General Land Office; compositor, electrotypist, elevator conductor, guard (internal revenue), messenger, messenger boy, press feeder, pressman, promotion to clerk, stenographer, stenographer and typewriter, stereotypist, typewriter, and watchman. This same class of examinations will be held at Pendleton on October 14.

MORE BEETS THIS YEAR

GRAND RONDE VALLEY WILL PRODUCE 15,000 TONS.

Yield in 1900 Was 9000 Tons—La Grande Factory Turns Out First White Sugar of the Season.

LA GRANDE, Or., Aug. 14.—The beet sugar factory yesterday turned out several hundred sacks of white granulated sugar. The factory has been running for several weeks, converting the residue sugar of last season into brown sugar, but this is the first commercial sugar of the season. The establishment in this town to keep the factory in operation with a small crew until about September 15. The beet sugar factory is a new enterprise on the part of the company last the new growth and heat had some injury to the crops, at least to the extent of reducing the amount of saccharine matter in the beets. The factory is a new enterprise on the part of the company last the new growth and heat had some injury to the crops, at least to the extent of reducing the amount of saccharine matter in the beets. The factory is a new enterprise on the part of the company last the new growth and heat had some injury to the crops, at least to the extent of reducing the amount of saccharine matter in the beets.

MORE CORRECT SCHOOL REPORTS.

Clerks Make a Great Improvement in Twelve Months.

SALEM, Aug. 14.—When the annual reports of the several County Superintendents were filed in the State Department last year it was found that about half the reports contained errors, making it necessary to return the documents for correction. This year, out of 33 reports 24 were found absolutely correct and the remaining nine were incorrect only in minor matters. This improvement is the result of Superintendent Ackerman's persistence in requiring that the reports must be correct. The most common error was that the amount of funds on hand at the beginning of the year does not correspond with the amount left on hand at the end of the preceding year. This error is probably due to the attempts of school clerks to do their books. As school districts are required to turn back into the school fund all money left on hand over the sum of \$50, some of the clerks make their books show less than \$50 in order to avoid turning any money back. Then they open their books the next day with more money than they had the night before, and as most of them are farmers, rather than bookkeepers, they do not make their books show where the extra money came from.

Oregon City Briefs.

OREGON CITY, Aug. 14.—King Spurgeon and Wash W. Smith, of Clackamas Station, are taking salmon eggs on the Siletz reservation in Lincoln County. The catch will be shipped to the United States hatchery on the Clackamas River, near here, to be hatched. Salmon will also be taken in the river near the hatchery for the eggs.

The item in this morning's Oregonian in reference to the production at the Upper Clackamas hatchery, should have been 1,500,000 eggs were hatched, instead of 250,000.

Fifty-seven teachers are taking the examination for certificates at the Court-house. The board of Examiners consists of County Superintendent Zinner, T. J. Gary and A. W. McLaughlin. Two of the women applicants are Epworth League workers, one from Clackamas and the other from Iowa. Both have concluded to remain in Oregon.

New Idaho Postmaster.

WASHINGTON, Aug. 14.—P. M. Harding has been appointed postmaster at Nez Perce, Idaho, vice Wilson Bowley, removed.

NORTHWEST DEAD.

Fred Wickman, of Astoria.

ASTORIA, Aug. 14.—Fred Wickman, a water ballist of the State Fish Commission, died here this morning of heart disease. He was a native of Finland but had resided in Astoria for many years, and in his early life was a fisherman on the Columbia River. He was a power among the local Finnish residents there, and his death was a great loss, as well as in politics. The deceased was for a number of years president of the Finnish Brotherhood of this city and largely instrumental in the formation of the National Association of Finnish Societies, and was its first president. He was also a member of the A. O. U. W., Knights of Pythias and Eagles, under whose auspices his funeral will be held on Saturday. He left a widow.

Thomas Wright, Oregon Pioneer.

MEDFORD, Or., Aug. 14.—Thomas Wright, a native of Kentucky, died at his home in Willow Springs, Precinct, Jackson County, yesterday afternoon, after a long illness, aged 78 years. Mr. Wright crossed the plains with an ox team in 1853, locating in Rogue River Valley, where he had lived since. He was a pioneer settler of the county, and was the author of the present school law of that state. Deceased was a trustee of the M. E. Church of this city. His daughter, Mrs. A. P. Fiske, resides here.

J. C. Lawrence.

BAKER CITY, Aug. 14.—News of the death of J. C. Lawrence, an ex-receiver of the Bank of Baker City, died today. Mr. Lawrence was 78 years old. He was a native of Virginia. He had lived in Nebraska for many years, where he founded the town of Tecumseh. He was a member of the Nebraska Legislature, and was the author of the present school law of that state. Deceased was a trustee of the M. E. Church of this city. His daughter, Mrs. A. P. Fiske, resides here.

Peter Moran, of Seattle.

SEATTLE, Aug. 14.—Peter Moran, for about a quarter of a century a resident and a highly respected citizen of Seattle, died of diabetes at Ketchikan, Alaska, a week ago. His remains will be shipped by the news of his death came in the Lynn Canal steamer Dolphin today.

Oregon Notes.

Big forest fires are reported in the Plume Rock, Trail Creek and Big Butte sections, of Josephine County. Some damage is being done to the timber. The Indians who have been employed at the Sand Island selling grounds near Astoria, have quit to engage in the more profitable business of berry-picking on the Washington side.

Owing to the heavy tides and bad fog near Astoria Monday night, there were seven gillnetts lost on the fish traps at head of the river, and four on the Government buoys near Fort Stevens.

Corvallis is almost the headquarters of the world for casaca-bark. No less than six, and possibly eight, carloads, of 20,000 pounds each, will be shipped from Corvallis, and several from Monroe, this season. This is the driest season the Blue Mountains have experienced for many years. The same thing was said by old-timers last summer. An unusually heavy snow fell during the past winter, and it was hoped the water supply would be ample; but the intense heat of early July melted it all very rapidly, and now the mountain streams are fed by springs alone.

Professor M. L. Miller, of the University of Chicago, with the Field Columbian Museum connected with the university, has been gathering data concerning the antiquity of man on the Pacific Coast. Among the valuable relics acquired are the petrified bones of a human being dug out of cement rock at depth of 40 feet below the surface of the country, near the Dalles, while sinking a well near the old quarries.

MORE BEETS THIS YEAR

GRAND RONDE VALLEY WILL PRODUCE 15,000 TONS.

Yield in 1900 Was 9000 Tons—La Grande Factory Turns Out First White Sugar of the Season.

LA GRANDE, Or., Aug. 14.—The beet sugar factory yesterday turned out several hundred sacks of white granulated sugar. TRUST BEGINS BUSINESS

NEW NORTHWEST SALMON COMBINE OPENS ITS DOORS.

Concern Is Said to Have the Largest Selling Agency in the United States.

SEATTLE, Aug. 14.—The Pacific Packing and Navigation Company, the new combine of the Northwest salmon canneries, opened for business today. The company is capitalized at \$25,000,000, and embraces about 20 canneries. It is expected that the Columbia River canneries will join the combine next year. The establishment in this city is said to be the largest selling agency in the United States. It will handle this year over 1,500,000 cases of fish, a value of about \$4,000,000. Deland, McGovern & Co. have been appointed selling agents for the company for the present season, and T. B. McGovern will be in charge of the full board of directors. The company's officers are: T. B. McGovern, president; Philip P. Kelly, vice president; Charles C. McGovern, secretary; and E. E. Alsworth, treasurer. The company is a new enterprise on the part of the company last the new growth and heat had some injury to the crops, at least to the extent of reducing the amount of saccharine matter in the beets.

OREGON'S GREAT CLIMATE.

Governor Geer Thinks Eastern Folk Will Soon Be Out to Enjoy It.

SALEM, Or., Aug. 14.—Governor Geer expresses the opinion that within a few years residents of the Eastern States will be coming to Oregon to enjoy the cool climate of the summer resorts. Governor Geer was just returned from a few days' outing at Newport, during which time Governor Geer delivered an address before the teachers assembled at the Summer Formal School, in speaking today of his trip he said: "I have never been to Nye Creek before, and was really surprised to see so many people settled on the coast. Most of those who are able to spend a month at the coast make the mistake of going about a month too soon. Even now it is too hot to stay, and it is not pleasant to those who go for a few days. The Summer School, which has just closed, under the able management of Professor Horner, proved a great success. It is a somewhat new idea of commerce to foster an agricultural interest in the United States."

PRESIDENT OF COOS COUNTY PIONEER AND HISTORICAL SOCIETY.

Isiah Hacker.

COQUILLE, Or., Aug. 14.—The eleventh annual reunion of the Coos County Pioneer and Historical Society took place here today. Isiah Hacker, of Coquille, presiding. The business affairs of the society were at once taken up, and the meeting was brought to a close tomorrow evening. The society is a new enterprise on the part of the company last the new growth and heat had some injury to the crops, at least to the extent of reducing the amount of saccharine matter in the beets.

STRAW FOR WALLA WALLA ROADS.

County Fixes Date for the Work Which Is to Be Done Gratis.

WALLA WALLA, Aug. 14.—Many loads of straw are to be placed on the roads of Walla Walla County August 20. This has been designated "Straw day." The County Commissioners, who have appointed two men to superintend the work. The experiment of putting straw on the roads was tried in a few places in Walla Walla County several years ago. The result was a very perceptible decrease in the dust on the roads, and a marked improvement in the health of the numerous signified petition was recently presented to the County Commissioners asking them to set aside a day for putting straw on the roads. The day has been designated "Straw day." The petitioners agreed to donate straw, work or money. The Commissioners designated August 20 as "Straw day," and appointed C. L. Whitely and Thomas C. Miller superintendents to carry out the proposal. Those gentlemen selected a man in each neighborhood to act as captain and sent to each the following circular letter:

"The County Commissioners have appointed Tuesday, August 20, as 'Straw day,' you have been chosen as one of the captains of your vicinity. Get as many farmers as possible to come out on that day and help straw the roads. However it is needed most to lay the dust. You will be expected to look out for straw and tell the people where to load their wagons. Also to keep a record, as near as possible, of the number of loads put on the road that day, so we can make a report to the Commissioners. All work and straw to be donated."

The gentlemen selected to see that the roads in their neighborhood are properly covered with straw August 20 are:

Waitsburg, J. W. Bruce, A. G. Lloyd, L. C. Shell, Gus Volmer, Carl Taylor and J. C. Lounsbury; Upperville, J. W. Joseph Braden; state road, Orlando Steeten and Clem McDonald; middle mill road, E. V.
