The mushroom fed to them. The eggs produced by the hens thus fed are found to be 10 per cent of iron.

THE ISTHMIAN DIFFICULTIES.

How shall we explain the confused and conflicting versions borne daily in the dispatches from Colombia and Venezuela? Each of these powers attributes the difficulties to the machinations of the other.

To begin with, the international character of the uprising is impossible to doubt. Venezuelans in arms on Colombian soil, and Colombians in arms on Venezuelan soil, demonstrate conclusively that we have something more to deal with here than the ordinary Latin-American revolution of disaffected factions.

Further significance is supplied by the fact that if such a programme were contemplated, its first strategic blow would be directed precisely at the object now engaging Uribe's attention. This is the conservative government at Bogota.

Under the non-competitive regime of the trust, these conditions have passed away. As the trust owns all the steel plants, it is a simple matter of business for it to run such plants as can be run at a profit, and close the others.

What does this mean? Well, it seems to mean, when taken in connection with the simultaneous and unwarranted outbreaks of French journals upon the inception of the present disturbances, that the isthmiian revolutions found France prepared, perhaps forewarned, if not in actual participation.

There is a future for apple-growers in Oregon. Varieties must be selected with a view to their late-keeping and marketable qualities of the fruit; trees must be intelligently planted in locations judiciously selected, and orchards must be properly cultivated and kept free from pests.

Now, what is to be the effect of this revolutionary readjustment? The workmen, it is superfluous to argue, cannot transplant themselves from place to place with the facility of boilers and furnaces.

People who need strength are often recommended by their physicians to take iron, but there is often trouble in getting it to assimilate with the blood. A German physician has devised a new scheme for administering the iron, which is found to work well.

The Kansas City papers, which last month had to be printed on asbestos, are now shouting about the delightful weather in that locality.

destroyed, and it only remains for Oregon horticulturists to revive and re-establish it upon paying basis by planting suitable lands in considerable areas to carefully selected apple trees.

BOUNDARIES OF TERRITORIAL ACQUISITIONS.

Director Merriam, of the Census Office, is entitled to thanks for a semi-authoritative definition of the boundaries of territory acquired by the United States. At his request a conference was constituted of representatives of the Department of State, the Coast and Geodetic Survey, the Geological Survey, the Census Office and the Library of Congress.

First—The region between the Mississippi River and Lakes Maurois and Pontchartrain to the west, and the Perdido River to the east, should not be assigned to the Louisiana Purchase or to the Florida Purchase, but marked with a legend indicating that title to it between 1803 and 1818 was in dispute.

The fact that in the past ten years the term of life of the people of the United States has increased 30 per cent, while the death rate has decreased 15 per cent per annum per 1000, as shown by the last census, is attributed principally to the increase of sewers and sanitary arrangements and public water supplies.

The fact that in the past ten years the term of life of the people of the United States has increased 30 per cent, while the death rate has decreased 15 per cent per annum per 1000, as shown by the last census, is attributed principally to the increase of sewers and sanitary arrangements and public water supplies.

THE HOUSEMAID'S OPPORTUNITY.

In too many cases the two sides involved in contests between capital and labor are the inside and the outside, but in the irrepressible conflict which is constantly waged in a large number of kitchens in every community there are two legitimate points of view.

Major Cauley's letter, elsewhere printed, is curiously instructive in the light it sheds upon his school of oppression to party reform.

Russell Sage has just had another birthday, and it is said that it was necessary to put more than seventy pennies in the cake.

The steel strike is making a pretty good bluff at longevity, but it should remember that the Boer War had about two years the start of it.

schedule, and treat them as employees in factories, and as strikers treated, there will be less trouble.

DEFECTS IN PENSION SYSTEM.

The New York Evening Post. The New York Times, a few days ago, in its Washington correspondence, published an item of intelligence from a member of the Pension Commission.

In yesterday's dispatches from Salem it was shown that within the past week eight new companies filed articles of incorporation, with an aggregate capital of \$2,390,250.

Medical examinations are tending to become a mere formality, to enable any community where ex-soldiers are found to "get even" with the pension law.

It is not gloom in the horizon of the State that the Democratic Convention in Philadelphia would not withstanding the clouds with which the action of that body overcast the Republican cause, as surveyed from this Republican organ's conning tower.

It is a star of hope in Mr. Bryan's proposal to fight the Ohio Democrats. He will work with all his power to defeat the Globe-Democrat.

Mr. Havemeyer's Rating. Chicago Tribune. It was reported in the Wall Street news that Mr. Henry O. Havemeyer, the president of the sugar trust, was seriously ill.

How to Prevent Lynching. Indianapolis News. It is foolish for the people of the North to make any hypocritical pretensions of supporting the South.

Chivalry is Not Dead. New York World. The seizure of a little postoffice from a Kentucky woman for spoils does not mean that chivalry is dead in the Blue Grass State.

Singing of Good Times. Frank L. Stanton, in Atlanta Constitution. Let us sing about the good times in the valleys on the hills.

date their help as per the following schedule, and treat them as employees in factories, and as strikers treated, there will be less trouble.

Singing of Good Times. Frank L. Stanton, in Atlanta Constitution. Let us sing about the good times in the valleys on the hills.

WHERE IRELAND HAS BEST OF IT. Chicago Record-Herald. Ireland, as Mr. Davitt says, has lost nearly half her population, but it is remarkable how she has held on to her representation in Parliament.

There are irregularities which would require a reapportionment for the various English counties, but taking England as a whole her representation is about 66.08. That basis would entitle Ireland to only 67 members.

Other comparisons will serve to bring out more vividly the overrepresentation of Ireland. The great manufacturing district of Lancashire has a population of 4,574,471, about 80,000 less than Ireland's, but its representation is only 57, or 4 less than Ireland's.

Such a change would affect the balance of power considerably by weakening Ireland's vote, and strengthening that of the centers of England at the same time.

Republican Solicitude for Democrats. Louisville Courier-Journal. All is not gloom in the horizon of the State that the Democratic Convention in Philadelphia would not withstanding the clouds with which the action of that body overcast the Republican cause, as surveyed from this Republican organ's conning tower.

It is a star of hope in Mr. Bryan's proposal to fight the Ohio Democrats. He will work with all his power to defeat the Globe-Democrat.

NOTE AND COMMENT. The adjournment of Parliament will drive the war correspondent back to South Africa.

President Hays' tenure of office seems to be about as insecure as that of the Czar of Russia.

General Griskel, the Governor-General of Blagovestensk, has killed himself. He was undoubtedly making an effort to tell someone who he was.

A 20-year-old feud in Vienna was settled effectively in a church not long ago. The method was two long hauls, but it is rough on the carriage companies.

Lieutenant Watterson, of Kentucky, who married a Cuban girl, will not run any chances when he smokes the cigars she buys for him.

The typhoid germ notes with considerable satisfaction that the soldiers in the desert military posts prefer to drink the water in which he abides to the bad whisky sold by the anti-canteen saloons in hot weather.

Diamond, a native of Pylaros, one of the Greek islands, is a remarkable calculator. After a mere glance at a blackboard on which thirty groups of figures are written he can repeat them in any order and deal with them by any arithmetical process.

The poet sing of blooming Spring. And April's flowers are budding May. In bricht with birds and flowers, And January's buds are budding May.

The City of Cebu has something like 200,000 inhabitants, but this population is largely made up of people who are huddled together in native huts.

Orange Citrus—Did you say he had on his chin the flower? Man-ten, he had on his chin the flower—Yankers Man-ten.
